⁽Performance calculation is based on official dealing net asset value (NAV) per share)

Performance

Key contributors to performance included Mahindra & Mahindra, as it reported better-than-expected earnings results led by higher average selling prices and improved gross margins (sales proceeds minus the cost of goods sold). Taiwan Semiconductor Manufacturing (TSMC) continued to benefit from AI-related demand for its cutting-edge chips. On the negative side, China Mengniu Dairy has been affected by weak consumer demand in China. Dairy Farm (DFI Retail) fell amid lacklustre demand and economic conditions in Hong Kong. Profits have improved from the lows with a better focus on margins, but the biggest challenge remains its Hong Kong customers who are shopping outside the city.

Portfolio Changes

The Fund bought President Chain Store (PCS), the largest convenience store company in Taiwan, as there are signs that growth is beginning to pick up again. The Fund also purchased DBS, the largest bank in Southeast Asia by assets. DBS has a solid track record, with much-improved returns under the leadership of Piyush Gupta, its CEO.

The Fund sold Great Eastern and Shiseido to consolidate the portfolio. Great Eastern is being taken private by its parent company, Oversea-Chinese Banking Corp (OCBC).

Outlook

While Asian markets have bounced somewhat, there doesn't appear to be much evidence of underlying economic transformation. However, while economic growth may well be lower, a higher cost of capital and greater financial as well as management discipline often augurs an improvement in performance. This is why the combination of people, franchise and a reasonable valuation remains the primary focus for the Investment Manager. The Investment Manager expects quality companies to perform better in such times, as there is less competition and investors are more focused on certainty, persistency, track-record, management capability and even survivability (i.e. balance sheets).

[^] Dividend adjustment return

[#]Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment Manager's Report (Unaudited) (continued)

Outlook (continued)

The Investment Manager believes this is the reason the Fund's performance, at least historically, has typically held up well in more difficult times.

⁽Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which announced solid earnings growth despite a challenging market environment. The bank's asset quality has also remained strong. Tencent reported a significant jump in profits due to sustained improvements in its gross margin (sales proceeds minus the cost of goods sold). This was mainly due to the acceleration of its plans to boost its video accounts and mini games business. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. Guangzhou Kingmed Diagnostics declined on weak earnings results, as the company reported lower revenue and a net loss over the recent quarter.

Portfolio Changes

New purchases included ZTO Express, the biggest parcel delivery company in China. Throughout its history, ZTO has always emphasised profitability and service quality, and should benefit from the ongoing consolidation among express delivery players. The Fund also bought Meituan, the largest local services e-commerce platform in China. Meituan offers products and services that are bought online but consumed offline "in the real world". It is the leader in food delivery services and domestic hotel bookings, while in-store dining and travel services are major profit centres.

The Fund sold Sino Biopharmaceutical and Sany Heavy Industry to consolidate the portfolio.

^{**}Inception date - 1 December 2022

Investment Manager's Report (Unaudited) (continued)

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

⁽Performance calculation is based on official dealing Net asset value (NAV) per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included bioMérieux (France: Health Care) which weakened due to concerns over increased competition, particularly in the area of molecular diagnostics where they have a majority market share, DHL (Germany: Industrials) which experienced downward pressure due to challenging macroeconomic conditions and EPAM Systems (United States: Information Technology) which saw weakening orders due to near-term budget concerns prompting customers to delay investments in the next generation of technologies. The Fund sold EPAM during the period, in preference for other ideas.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which continues to grow as it invests in building a more robust franchise, Arista Networks (United States: Information Technology) which has seen strong revenue growth boosted by investment into artificial intelligence infrastructure and Costco Wholesale (United States: Consumer Staples) which continued to grow market share and has been improving its e-commerce business.

Portfolio Changes

The Fund initiated a position in Taiwan Semiconductor Manufacturing (Taiwan: Information Technology), the world's leading manufacturer of semiconductors, Ashtead (United Kingdom: Industrials), an industrial and construction equipment rental company and Sysmex (Japan: Health Care) a global leader in haematology and invitro disease testing diagnostics.

The Fund exited Unicharm (Japan: Consumer Staples) due to concerns over prospects for future growth. It also sold Oversea-Chinese Banking Corp (Singapore: Financials) and Kotak Mahindra Bank (India: Financials) due to the increasingly competitive environment facing Asian banks impacting their ability to grow.

Outlook

The Investment Manager's focus is to identify high-quality management teams, leading businesses that contribute to human development. The Fund aims to buy companies with strong financials that are capable of withstanding challenges, that can benefit from a wide variety of diverse growth drivers such as improving energy efficiency, the rise of living standards in India and building clean infrastructure in the United States, and that are also reasonably valued. The Investment Manager believes that these companies should continue to deliver good results in stable or ever-changing economic conditions.

⁽Performance calculation is based on official dealing Net asset value (NAV) per share)

Performance

Key contributors to performance included China Merchants Bank, which announced solid earnings growth despite a challenging market environment. The bank's asset quality has also remained strong. Tencent reported a significant jump in profits due to sustained improvements in its gross margin (sales proceeds minus the cost of goods sold). This was mainly due to the acceleration of its plans to boost its video accounts and mini games business. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. China Resources Beer also faced weak consumer demand amid a tough operating environment, though the premium beer segment has been solid.

Portfolio Changes

New purchases included HSBC, a global bank with a major presence in Hong Kong, China and the rest of Asia. Whilst this is clearly a complicated bank, it is refocusing its business model towards Asia; and it is moving in the right direction in net zero and fossil fuel lending. The Fund also bought ZTO Express, the biggest parcel delivery company in China. Throughout its history, ZTO has always emphasised profitability and service quality, and should benefit from the ongoing consolidation among express delivery players.

The Fund sold Sino Biopharmaceutical and Yum China to consolidate the portfolio.

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

Performance

Key contributors to performance included Blue Star, which rose amidst strong air-conditioner sales across the industry during the summer season, which forms the majority of the company's volumes. Mahindra & Mahindra reported better-than-expected earnings results led by higher selling prices and improved gross margins (sales proceeds minus the cost of goods sold). On the negative side, Kansai Nerolac Paints declined due to intense competition in the decorative paints industry with a new entrant, though this is expected to be partially offset by its stronger industrial coatings business. DBH Finance (Delta Brac Housing) declined after reporting a year-on-year profit decline.

Portfolio Changes

New purchases included ICICI Prudential Life Insurance, one of the largest private life insurance companies in India. Its business and distribution mix are among the most diversified in the industry, which should mean superior profitability over time. The Fund also bought Mahindra & Mahindra Financial Services (MMFS) on positive changes being driven by the parent Mahindra Group. The new CEO, Raul Rebello, comes with a strong background, and is young and driven. He seems to be making sensible changes, strengthening risk management and diversifying the loan book.

There were no complete disposals over the period.

Outlook

Indian equities were among the best performing markets in the Asia region in 2023 and 2024 to date. The Investment Manager remains cautiously optimistic, as the environment for companies in India is the strongest it has been in many years. However, as valuations are high in some areas of the market, the Investment Manager believes it is important to stay disciplined and focused with their investment approach. They continue to seek out well-run companies with high levels of governance, strong competitive advantages and long-term growth potential. In particular, they look for owners and management teams that are engaged and accessible and focused on returns.

⁽Performance calculation is based on official dealing NAV per share)

Performance

The Fund underperformed its benchmark over the first half of the year.

Portfolio Changes

The Fund's long interest rate position hurt performance as US interest rates climbed higher on the back of delayed interest rate cuts due to a resilient US economy.

The Fund's position in Australian Government Bonds detracted from returns as Australian interest rates rose, but a long position in Malaysian Government Bonds added value from an income perspective. Given the strength of the US dollar over the first half of the year, currency exposure in the Australian dollar was negative for returns.

An underweight in Japanese government bonds was positive for performance as interest rates rose in Japan. Towards the end of June, the Fund closed its long exposure in the Japanese yen on possible near-term weakness of the yen.

The Fund maintained small credit exposures via investments in short-dated, high quality USD credits.

Outlook

Barring scenarios that would cause interest rates to rise further, the Fund maintains its long exposure in US interest rates with a higher conviction that the market has seen the peak in US policy rates. Asian economies have been resilient thus far, but effects from China's slowdown are not negligible. The growth outlook in Asia is showing signs of weakness especially for export-oriented countries including Singapore, South Korea and Taiwan, caused not only by China's slowdown, but also reflective of the lackluster demand from developed economies. We believe that this trend is likely to stay. Within the Asian region, countries with a stronger domestic story, such as India, are likely to fare better. Against this weakening external backdrop, most Asian central banks have paused rate hikes as inflation moderated and shifted attention to supporting growth. The Fund remains optimistic on the region's longer-term growth prospects as Asian economies continue to move up the value chain in the global economy.

⁽Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing (TSMC), as it continued to benefit from AI-related demand for its cutting-edge chips. MediaTek rose on market optimism around "Edge AI", which could bring new upgrade opportunities to smartphones. The company is one of the leading providers of System-on-Chip (SoC) and wireless technology chips globally. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. Shenzhen Inovance Technology declined on generally negative market sentiment.

Portfolio Changes

New purchases included H World (formerly Huazhu), a multi-brand hotel group in China. The company has scale, strong brands, advanced IT systems and good cost control. As China's economy continues to shift towards domestic consumption, branded hotels should gain market share and benefit from the growing spend on travel and leisure activities.

The Fund sold Sino Biopharmaceutical and Minth to consolidate the portfolio.

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

Performance

Key contributors to performance included FPT, which expects strong revenue growth in IT services, driven by Japan and Asia Pacific, as well as a demand recovery in the US. Philippine Seven reported strong earnings results and announced a higher-than-expected dividend payment. On the negative side, Jardine Cycle & Carriage (JCNC) declined on concerns about rising competition from Chinese electric vehicle (EV) companies affecting its subsidiary in Indonesia. Unilever Indonesia was impacted by a recent boycott of its products.

Portfolio Changes

The Fund purchased Bank Rakyat Indonesia (BRI), a leading micro-finance lender in Indonesia with high returns on assets and solid business operations that is hard to replicate. Microloans and ultra-microloans (small business loans) are a large social contributor to the 37 million borrowers in Indonesia who cannot otherwise access formal credit. The Fund also bought Metropolitan Bank and Trust (Metrobank) on attractive risk/reward metrics. As the second largest bank in the Philippines, the valuation seemed attractive for a bank with good deposits business, low rates of bad loans, and a low loans-to-deposit ratio (with room for improvement).

The Fund sold Great Eastern and Delfi to consolidate the portfolio. Great Eastern is being taken private by its parent company, Oversea-Chinese Banking Corp (OCBC).

Outlook

Whilst the Investment Manager believes there is support for long-term growth in the ASEAN region, they do not profess to know which way market sentiment will swing in the near term. As bottom-up stock pickers and long-term investors, the Investment Manager instead focuses on and draws comfort from the quality of its holdings and their largely inexpensive valuations. The companies owned in the strategy have long-term owners (or managers who act like long-term owners) as stewards of the business. The Investment Manager believes this often ties in with good business decisions, and attractive shareholder returns by extension.

⁽Performance calculation is based on official dealing Net asset value (NAV) per share)

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Mahindra & Mahindra, as it reported better-than-expected earnings results led by higher average selling prices and improved gross margins (sales proceeds minus the cost of goods sold). Taiwan Semiconductor Manufacturing (TSMC) continued to benefit from AI-related demand for its cutting-edge chips. On the negative side, China Mengniu Dairy has been affected by weak consumer demand in China. Dairy Farm (DFI Retail) fell amid lacklustre demand and economic conditions in Hong Kong. Profits have improved, but the biggest challenge remains its Hong Kong customers who are shopping outside the city.

Portfolio Changes

New purchases included Café de Coral (CDC), a diversified Hong Kong restaurant group, on attractive risk-reward metrics. After a challenging few years through the COVID-19 pandemic, performance is now recovering. The Fund also purchased DBS, the largest bank in Southeast Asia by assets. DBS has a solid track record, with a muchimproved return on equity (ROE) under the leadership of Piyush Gupta.

The Fund sold Haw Par and Great Eastern to consolidate the portfolio. Great Eastern is being taken private by its parent company, Oversea-Chinese Banking Corp (OCBC).

Outlook

While Asian markets have rebounded somewhat, there doesn't appear to be much evidence of underlying economic transformation. However, while economic growth may well be lower, a higher cost of capital and greater financial as well as management discipline often augurs an improvement in performance. This is why the combination of people, franchise and a reasonable valuation remains the primary focus for the Investment Manager. The Investment Manager expects quality companies to perform better in such times, as there is less competition and investors are more focused on certainty, persistency, track-record, management capability and even survivability (i.e. balance sheets). The Investment Manager believes this is the reason the Fund's performance, at least historically, has typically held up well in more difficult times.

First Sentier Investors (Hong Kong) Limited July 2024

⁽Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included Mahindra & Mahindra, as it reported better-than-expected earnings results led by higher average selling prices and improved gross margins (sales proceeds minus the cost of goods sold). Taiwan Semiconductor Manufacturing (TSMC) rose as it continued to benefit from AI-related demand for its cutting-edge chips. On the negative side, China Mengniu Dairy has been affected by weak consumer demand in China. China Resources Beer also faced weak consumer demand amid a tough operating environment, though the premium beer segment has been solid.

Portfolio Changes

New purchases included Axis Bank, one of India's largest private banks. Axis has a strong deposits business and should benefit from the structural trend of private sector banks taking market share from the state-owned sector. The Fund also purchased Shenzhou International, a leading knitwear manufacturer focused on sportswear. In the longer term, Shenzhou could gain market share as brands become more conscious about their supply chain and consolidate in favour of the best quality operators.

The Fund sold China Resources Land and Ping An Insurance to consolidate the portfolio.

⁽Performance calculation is based on official dealing NAV per share)

##No performance return has been presented for the year as the share class has not been in existence for a full year.

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

With rising interest rates, the Fund delivered a small negative return over the first half of the year.

Portfolio Changes

On views that US interest rates had peaked, the Fund's focus on bonds with a longer maturity detracted from returns as US rates crept higher on the back of a resilient US economy.

Amid the strong performance in corporate bond holdings, the Fund took the opportunity of selling positions at a profit, reducing its exposure to corporate bonds.

China's policy support remained strong to revive the Chinese property sector, but market sentiment remained volatile. The Fund sold select names during periods when prices were strong and added positions when prices offered greater value.

Despite Bank of Japan's exit from its negative interest rate era, the Fund's yen currency positions detracted from performance as we saw further weakening of the yen against the dollar due to the higher interest rates available in the US. Towards the end of June, the Fund closed its exposure to the Japanese yen on views that the yen would remain weak for the foreseeable future.

The Fund benefitted from the performance of investment grade bonds (higher quality bonds generally considered to have a relatively low risk of loss) over the first half of the year. Positions in Indonesian quasi-sovereigns (bonds with full or partial government ownership) were positive for performance, as did allocations to new bonds which were attractively priced. Tactical trades in Chinese property bonds added to performance as more distressed property developers made constructive progress in agreeing new terms with their lenders and bond holders.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Fund remains weighted towards Asian Investment Grade corporate bonds which currently earn interest of above 5% making this asset class attractive from an income generating perspective. That said, we believe that at current valuations levels, there is some risk of a sell-off that could impact bond markets. In Investment grade corporate bonds, the Fund has a bias towards higher quality issuers of bonds as the market continues to move higher. High Yield (HY) corporate bonds (i.e. bonds paying higher interest rates reflecting a relatively high risk of losing money) have had a good run year-to-date, although not all bonds have performed well and we believe this variation in performance is set to continue. In distressed areas of Asian HY, the Investment Manager believes value is beginning to emerge among potential distressed issuers of bonds as they emerge from a challenging property crisis in China.

⁽Performance calculation is based on official dealing NAV per share)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark ##No performance return has been presented for the year as the share class has not been in existence for a full year. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

The Fund underperformed its benchmark over the first half of the year.

Portfolio Changes

The Fund's long interest rate position hurt performance as US rates crept higher with the Fed keeping interest rates high on the back of a resilient US economy.

Amid strong demand-supply dynamics in the credit market, the Fund gradually reduced credit exposure as credit spreads tightened. Properties exposures were trimmed on price rallies. Given the inverse yield curve, longer dated positions were also switched into shorter dated bonds as part of duration management as well as for the attractive yield pick-up.

Despite Bank of Japan's exit from its negative interest rate policy, the Fund's long position in the yen detracted from performance due to the high interest rate differential between the US and Japan. Towards the end of June, the Fund closed its long exposure in the Japanese yen on views that the yen would remain weak for the foreseeable future.

The Fund benefitted from the improvement in investment grade credit spreads over the first half of the year. Positions in Indonesian quasi-sovereigns (bonds with full or partial government ownership) were positive for performance as did allocations in primary issuances that yielded attractive issuance premiums.

Investment Manager's Report (Unaudited) (continued)

Outlook

While Asian Credit fundamentals have remained stable, the short supply of bonds remains the bigger driver of credit performance in the near term. The Fund remains constructive in Asian Investment Grade (IG) credit; given how high yields relative to historical levels present an attractive return proposition for investors. That said, valuation is not at the cheapest levels. Barring scenarios that would cause interest rates to rise further, the Fund maintains its long exposure in US interest rates with a higher conviction that the market has seen the peak in US policy rates.

First Sentier Investors (Hong Kong) Limited July 2024

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included EPAM Systems (United States: Information Technology) which saw lower earnings expectations as the shift from Eastern Europe to India has taken longer than expected, WuXi Biologics (China: Health Care) which continued to suffer from challenging market conditions and Jerónimo Martins (Portugal: Consumer Staples) who faced short-term pressure from concerns that a decrease in food prices will be greater than the increase in costs in their core Polish market.

Positive contributors included Taiwan Semiconductor Manufacturing (Taiwan: Information Technology) which continued to perform well as the broad adoption of artificial intelligence (AI) fed through into stronger financial results, Mahindra & Mahindra (India: Consumer Discretionary) which has benefitted from improving demand outlook for tractors and SUVs, and Delta Electronics (Taiwan: Information Technology) which has also benefited from the AI boom with stronger sales and higher profit margins coming through in their results.

Portfolio Changes

The Fund initiated a position in Ping An Insurance (China: Financials), the second largest life and general insurer in China and Bidcorp (South Africa: Consumer Staples), a specialist logistics company focused on fresh and frozen foods. It also re-initiated a position in Estun Automation (China: Industrials), a leading robotics franchise.

The Fund exited Hoya (Japan: Health Care) on account of valuation and to fund better opportunities elsewhere, Tech Mahindra (India: Information Technology) as profit margins reduced alongside an expensive valuation and Dabur (India: Consumer Staples) which has delivered good results, but future growth is expected to be lower.

Outlook

Falling rates should in theory help emerging markets as an asset class as the relative attractiveness of United States Dollar (USD) denominated assets fall and the USD currency weakens. Given the large number of elections in 2024, with changes so far including the first female President of Mexico and the incumbent Bharatiya Janata Party (BJP) in India losing an absolute majority, it is likely that geopolitics will continue to create near-term volatility. All eyes will now be on the US election in November and the impact it may have on US – China trade relations.

^{*}Inception date - 23 February 2024

Investment Manager's Report (Unaudited) (continued)

Outlook (continued)

The Fund continues to focus on bottom-up* analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development tailwinds these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

*Analysing individual companies rather than countries or sectors.

- Class VI	25.52%	-27.54%	9.62%	-4.68%

⁽Performance calculation is based on official dealing NAV per share)

Performance

At the most recent June Federal Open Market Committee (FOMC) meeting, the committee left the target range unchanged at 5.25-5.5%. Expectations are now for the Federal Reserve to cut rates by 25 basis points (bps) twice by the end of 2024, starting in September.

Elsewhere, we have seen both the Riksbank and the European Central Bank (ECB) starting the cutting cycle, with 25bps cuts in May and June, respectively, while the Bank of England (BoE) is expected to act either in August or September.

The largest contributor to performance was the overweight holding in US multi-family housing REIT Apartment Income Real Estate Investment Trust, which was privatised in the period. Similarly, the Fund's holdings in the multi-family sector Equity Residential and AvalonBay Communities benefitted from a more resilient than expected US employment market.

The largest detractors from the Fund's performance were investments in US Industrial REITs Rexford Industrial Realty and Americold Realty Trust. Increases in industrial vacancies due to new supply has deterred investor sentiment in the short term.

Portfolio Changes

The Fund accumulated a conviction-based position in AvalonBay Communities, the coastal US apartment owner/operator, due to an observed disconnect between public and private market pricing. The Fund also added to its position in German residential company LEG Immobilien. The stock pulled back and provided an opportunity to add.

The Fund reduced its position in American Homes 4 Rent, the third largest US single-family rental owner/operator in the period. The rationale for the partial sale is a combination of trailing outperformance and right-sizing the Fund's active weight given subsequent valuation and market set-up heading into 2024. The Fund also reduced its position in seniors housing REIT, Welltower which was a top performer for the Fund up 37.5% last year.

Outlook

Potential interest rate reductions in the 2nd half of 2024 could be an important catalyst for the REIT sector, following large increases in interest rates. REITs are well-positioned to take advantage of external growth opportunities by acquiring undervalued private and public assets, should the cost of capital continue to improve.

⁽Performance calculation is based on official dealing NAV per share)

Performance

Property markets throughout Asia continue to be influenced by challenging market conditions as the timing of interest rate decisions and varying macroeconomic conditions across the region.

The Hong Kong property sector continues to be influenced by China's lacklustre economic performance. Whereas markets such as Japan, Singapore and Australia have been more reactive to monetary policy (using interest rates to control inflation) decisions.

The largest contributors to performance were overweight holdings in large Japanese property companies Mitsui Fudosan, Nomura Real Estate and Tokyu Fudosan. All companies continued to benefit from elevated global inflation expectations and earnings upgrades in the period. The Fund also benefitted from its exposure to the Australian lifestyle and communities sector in Ingenia Communities.

The Fund's positions in Hong Kong property companies Link Real Estate Investment Trust, Sun Hung Kai Properties and Hang Lung Properties detracted from performance in the period due to continued subdued economic data from China.

Portfolio Changes

The Fund increased its exposure to logistics and data centre company Goodman Group. The well-timed transition into data centres is expected to continue to drive performance. The Fund also increased its weighting in Japanese REIT KDX Realty Investment and initiated a position in logistics JREIT Nippon Prologis REIT.

The Fund exited its positions in diversified JREIT United Urban Investment. The Fund took the opportunity to reallocate its Japanese exposures. The Fund also exited its position in diversified Australian REIT General Property in the period.

[^]Dividend adjustment return

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager's overall strategy in Asia is to have a balanced portfolio with a focus on having a low-risk balance sheet and strong earnings and dividend growth potential in the region.

In Japan, the Fund remains invested in large property companies that have benefitted from sustained levels of higher inflation and are receiving strong earnings momentum. In Hong Kong, the residential market showing signs of recovery, with higher demand leading to positive sell-through rates of new projects.

In Singapore, the lodging sector is particularly well placed in the medium term as flight capacity and China's tourist arrivals continue to normalise.

In Australia, the Investment Manager remains positive on exposures that demonstrate strong capital management credentials in periods where interest rates are higher.

Performance

Key contributors to performance included China Merchants Bank, which announced solid earnings growth despite a challenging market environment. The bank's asset quality has also remained strong. Tencent reported a significant jump in profits due to sustained improvements in its gross margin (sales proceeds minus the cost of goods sold). This was mainly due to the acceleration of its plans to boost its video accounts and mini games business. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. Guangzhou Kingmed Diagnostics declined on weak earnings results, as the company reported lower revenue and a net loss over the recent quarter.

Portfolio Changes

New purchases included Yadea, the leader in China's electric two-wheeler industry. The industry has seen rapid development in recent years and has become a daily necessity for many. The Fund also bought China Resources Mixc Lifestyle, which operates shopping malls and manages offices and residential properties. This is an asset-light business with minimal capital needs and robust operating cash-flow.

The Fund sold DaShenLin Pharmaceutical and Haitian International to consolidate the portfolio.

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

⁽Performance calculation is based on official dealing NAV per share)

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

NextEra Energy (United States: Utilities / Renewables) gained on a growing investor awareness of the increasing demand for energy within the United States, driven in part by data centres and AI. Holdings in Targa Resources and DT Midstream (both United States: Energy Midstream) were buoyed by favourable operating conditions and a positive demand outlook.

Elevated bond yields weighed on CCR (Brazil: Toll Roads) and Transurban (Australia: Toll Roads). Xcel Energy (United States: Utilities / Renewables) underperformed on concerns that it may be held liable for a wildfire in part of its northern Texas service territory.

Portfolio changes

The Fund added a holding in National Grid (United Kingdom: Utilities / Renewables) following its recent £7 billion capital raising. The company plans to modernise and expand the country's energy networks over coming years. American Electric Power (United States: Utilities / Renewables) was added to the portfolio on the back of its appealing valuation multiples. A position was also initiated in GFL Environmental (Canada: Water / Waste). The fourth-largest North American waste management company, it has operations in every Canadian province and in 24 US states.

[#] Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. ## No performance return has been presented for the year as the share class has not been in existence for a full year.

Investment Manager's Report (Unaudited) (continued)

Portfolio changes (continued)

The Fund divested a position in Entergy (United States: Utilities / Renewables) on concerns that the upcoming Caribbean hurricane season may harm its US Gulf Coast-focused service territory. CSX (United States: Railroads) was sold after share price gains reduced mispricing. A holding in FirstEnergy (United States: Utilities / Renewables) was divested in favour of positions in higher conviction US utility stocks.

Outlook

The outlook for global listed infrastructure is positive. Earnings growth for the asset class is likely to be underpinned by a number of structural growth themes over coming years. We are optimistic about the substantial investment opportunities for utilities, associated with growing power demand and the decarbonisation of the world's energy needs.

⁽Performance calculation is based on official dealing NAV per share)

Performance

Key contributors to performance included Mahindra & Mahindra, as it reported better-than-expected earnings results led by higher average selling prices and improved gross margins (sales proceeds minus the cost of goods sold). Taiwan Semiconductor Manufacturing (TSMC) continued to benefit from AI-related demand for its cutting-edge chips. On the negative side, China Mengniu Dairy has been affected by weak consumer demand in China. Unilever Indonesia was impacted by a recent boycott of its products.

Portfolio Changes

New purchases included HCL Technologies, a leading IT services company. It has shown improved performance with an internally promoted management team and has solid capabilities in high-potential areas like cloud and engineering services. The Fund also bought ICICI Prudential Life Insurance, one of the largest private life insurance companies in India. Its business is among the most diversified in the industry – and the Investment Manager believes this will show up in superior profitability over time.

The Fund sold Gree Electric Appliances and Astra International to consolidate the portfolio.

Outlook

Selectively, the Investment Manager has started to find opportunities in well-established businesses with high governance standards, where valuations are starting to moderate. Overall, the Investment Manager believes the prospects for the portfolio's holdings are bright.

In India, the Investment Manager still sees significant growth potential across most categories. Meanwhile the governance standards and the quality of companies have improved consistently over the years. But one concern is that the market's valuations have become more expensive, so there is a need to be selective.

In China, investors are concerned about sluggish consumer demand, which has led to lower valuations for consumer companies. Longer-term, the Investment Manager believes rising incomes and consumers' aspirations will still drive consumption upgrades (i.e. buying more expensive goods and services) and the emergence of brands. Meanwhile, valuations are looking attractive.

⁽Performance calculation is based on official dealing NAV per share)

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing (TSMC) as it continued to benefit from AI-related demand for its cutting-edge chips. JNBY Design reported resilient financial performance, despite the weak consumer sentiment in China. On the negative side, China Mengniu Dairy has been affected by weak consumer demand in China. HDFC Bank declined on concerns about weaker deposit growth and higher funding costs.

Portfolio Changes

New purchases included Tata Motors, a leading Indian automotive manufacturer that also owns Jaguar Land-Rover (JLR). Over the past five years, the business has undergone intensive restructuring, improving its profitability. The Fund also bought JNBY Design, the largest designer apparel retailer in China. The company enjoys strong brand recognition and customer loyalty and has been resilient despite various difficulties.

The Fund sold Bank Central Asia and HDFC Bank to consolidate the portfolio.

Outlook

Selectively, the Investment Manager has started to find opportunities in well-established businesses with high governance standards, where valuations are starting to moderate. Overall, the Investment Manager believes the prospects for the portfolio's holdings are bright.

In India, the Investment Manager still sees significant growth potential across most categories. Meanwhile the governance standards and the quality of companies have improved consistently over the years. But one concern is that the market's valuations have become more expensive, so there is a need to be selective.

In China, investors are concerned about sluggish consumer demand, which has led to lower valuations for consumer companies. Longer-term, the Investment Manager believes rising incomes and consumers' aspirations will still drive consumption upgrades (i.e. buying more expensive goods and services) and the emergence of brands. Meanwhile, valuations are looking attractive

The Taiwan market has performed well on the back of AI excitement and related technology advancements. Taiwan is a global leader in various technology areas and provides a good balance to China which is largely driven by domestic demand.

⁽Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.\

Performance

Key contributors to performance included Recruit, which reported better-than-expected earnings. The management announced plans to reduce its cash, which could boost shareholder returns. Tokio Marine rose after announcing plans to sell its strategic shareholdings over the next six years, as well as a JPY200 billion share buyback. This focus on improving shareholder return has been welcomed by the market. On the negative side, BayCurrent Consulting declined after the company reported weaker-than-expected profits, as its fees and the usage of its consultants declined. SMS was weak, largely due to the market's response to its aggressive spending plans.

Portfolio Changes

New purchases included Yamaichi Electronics, a global leader of sockets used in the semiconductor production process to test the reliability of integrated circuits/semiconductor chips. The Fund also bought T&D, one of the leading life insurance companies in Japan. The company has shown steady growth with its niche target-market strategy and differentiated product offering.

The Fund sold Olympus Corp and MonotaRO to raise cash.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Investment Manager believes that the strong fundamental characteristics of the companies in the portfolio should provide attractive returns in the long run, but it is difficult to predict when market sentiment might change. The portfolio's performance should improve if 1) Japanese yen starts to appreciate against the US dollar and the global economy turns out to be weaker than expected, as this will benefit quality companies with sustainable growth; and 2) performance starts to broaden out to more sectors and smaller-cap companies.

First Sentier Investors (Hong Kong) Limited July 2024

⁽Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

NextEra Energy (United States: Utilities / Renewables) and Innergex Renewable Energy (Canada: Utilities / Renewables) both gained on a growing investor awareness of the increasing demand for energy in North America, driven in part by data centres and AI. Shares in GFL Environmental (Canada: Waste Management) rose following reports that it was evaluating potential takeover offers.

Solaria Energia (Spain: Utilities / Renewables) lagged as lower power prices, owing to mild European winter weather and high storage levels, weighed on its share price. Concerns that freight haulage rates may not increase as quickly as had been hoped weighed on Union Pacific (United States: Railroads). Xcel Energy (United States: Utilities / Renewables) underperformed on concerns that it may be held liable for a wildfire in part of its northern Texas service territory.

Portfolio Changes

The Fund added a holding in National Grid (United Kingdom: Utilities / Renewables) after the company's recent £7 billion capital raising removed a key overhang from the stock. A position was initiated in Severn Trent (United Kingdom: Water / Waste), after the company filed a constructive business plan with the United Kingdom water regulator in the second half of 2023. PG&E (United States: Utilities / Renewables) was added to the portfolio on the basis of its appealing valuation multiples and robust growth prospects.

Grupo Aeroportuario del Sureste (Mexico: Airports) and Republic Services (United States: Water / Waste) were sold after strong share price gains in recent months for both companies reduced mispricing. A holding in Edison International (United States: Utilities / Renewables) was also divested in favour of higher conviction United States utility names.

Investment Manager's Report (Unaudited) (continued)

Outlook

The Fund invests in a range of listed infrastructure assets including toll roads, airports, railroads, utilities and renewables, wireless towers and data centres. These sectors share common characteristics, like barriers to entry and pricing power, which can provide investors with inflation-protected income and strong capital growth over the medium-term. The Investment Manager believes the Fund's focus on sustainable development, guided by the United Nations Sustainable Development Goals, can create opportunities for positive risk-adjusted performance. It can generate investment ideas, as well as lowering the overall risk profile of a portfolio through a better understanding of Responsible Investment-related risks.

⁽Performance calculation is based on official dealing NAV)

Performance

Key contributors to performance included Taiwan Semiconductor Manufacturing (TSMC), which continued to benefit from AI-related demand for its cutting-edge chips. Despegar climbed after reporting better-then-expected earnings, driven by an increase in gross bookings on its platform. On the negative side, TravelSky Technology declined after issuing a surprise profit warning. Regional fell after the recent presidential elections in Mexico spurred concerns that banks would be targeted with higher taxes.

Portfolio Changes

New positions included Netease, the second largest gaming company in China. The company has a portfolio of midsized games with sustained popularity among users. It also has a strong list of new games that should support its growth prospects. The Fund also purchased Bank Rakyat Indonesia (BRI), a leading micro-finance lender in Indonesia with high returns on assets and solid business operations that is hard to replicate. Microloans and ultramicroloans (small business loans) are a large social contributor to the 37 million borrowers in Indonesia who cannot otherwise access formal credit.

The Fund sold JD.com and Maruti Suzuki India to consolidate the portfolio.

Outlook

Competitive advantages in the form of strong brands, distribution advantages, cost leadership or simply providing a service/product that customers cannot live without, are the main traits that characterise the Investment Manager's portfolio companies. The Investment Manager believes the current correction in share prices presents an excellent opportunity for long-term investors like themselves to accumulate leading franchises at attractive prices.

^{*} Inception date - 24 March 2023

[#]Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Investment Manager's Report (Unaudited) (continued)

Outlook (continued)

The Investment Manager believes the Fund's holdings continue to offer long-term attractive growth opportunities, with attractive earnings growth and reasonable valuations. Thus, the Investment Manager is optimistic from both an absolute and a relative perspective.

commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Spectris (United Kingdom: Information Technology) due to concerns that a decrease in demand for their products combined with selling off a part of their business, could lower their potential earnings, EPAM Systems (United States: Information Technology) which were affected by weaking orders due to near-term budget concerns prompting customers to delay investment in the next generation of technologies and Jerónimo Martins (Portugal: Consumer Staples) as concerns over food price deflation outpaces continuing cost inflation in their core market of Poland.

Positive contributors included Halma (United Kingdom: Industrials) as investor sentiment brightened following an improving outlook for organic growth across many of its underlying businesses and a health acquisition pipeline, Edwards Lifesciences (United States: Health Care), due to better than expected full year results combined with a recognition of the growth potential of its core markets which remain underpenetrated and Taiwan Semiconductor Manufacturing (TSMC) (Taiwan: Information Technology) as markets anticipated the clearing of inventories and a restocking cycle to drive demand for logic chips along with increased revenues flowing through to their artificial intelligence segment.

Portfolio Changes

The Fund initiated a position in TSMC (Taiwan: Information Technology) and Samsung Electronics (South Korea: Information Technology), the world's first and second leading semiconductor manufacturers. The Fund also bought Tata Communications (India: Communication Services), which provides network and digital infrastructure for enterprise customers globally.

The Fund exited Admiral (United Kingdom: Financials) and Cochlear (Australia: Health Care) due to valuations. It also sold Kotak Mahindra Bank (India: Financials) due to the increasingly competitive environment facing Indian banks impacting on its ability to grow.

Investment Manager's Report (Unaudited) (continued)

Outlook

As always, the Fund remains focused on buying companies with high-quality management teams and exceptional franchises that are driving human development and alleviating environmental pressures. The portfolio is well diversified, not only across sectors and geographies, but also growth drivers such as improving energy efficiency, the rise of living standards in India and the growth of diagnostics.

(Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included EPAM Systems (United States: Information Technology) which saw lower earnings expectations as the shift from Eastern Europe to India has taken longer than expected, Raia Drogasil (Brazil: Consumer Staples) suffered as inflation lifted through May and June causing the market to worry about the ability of the Brazilian central bank to cut rates and Jerónimo Martins (Portugal: Consumer Staples) who faced short-term pressure from concerns that a decrease in food prices will be greater than the increase in costs in their core Polish market.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which has benefitted from improving demand outlook for tractors and SUVs, Taiwan Semiconductor Manufacturing (Taiwan: Information Technology) which continued to perform well as the broad adoption of artificial intelligence (AI) fed through into stronger financial results and Tube Investments of India (India: Consumer Discretionary) which gained as the business reiterated a focus on consistent profitability.

Portfolio Changes

The Fund initiated a position in Allegro (Poland: Consumer Discretionary), the largest e-commerce platform in Poland and MediaTek (Taiwan: Information Technology), a fabless (outsourced production) semiconductor company who are leaders in integrated chip system solutions.

The Fund exited Tech Mahindra (India: Information Technology) due to high valuations, Infineon Technologies (Germany: Information Technology) to fund better ideas elsewhere and Vinda International (China: Consumer Staples) after it received a takeover bid at a much higher premium than the published market price.

Investment Manager's Report (Unaudited) (continued)

Outlook

Falling rates should in theory help emerging markets as an asset class as the relative attractiveness of United States Dollar (USD) denominated assets fall and the USD currency weakens. Given the large number of elections in 2024, with changes so far including the first female President of Mexico and the incumbent Bharatiya Janata Party (BJP) in India losing an absolute majority, it is likely that geopolitics will continue to create near-term volatility. All eyes will now be on the US election in November and the impact it may have on US – China trade relations.

The Fund continues to focus on bottom-up* analysis of the fundamental quality of stewards, franchises, and financials and the sustainable development tailwinds these businesses might enjoy. The Investment Manager believes this remains the best way to continue protecting and growing clients' capital in emerging markets.

*Analysing individual companies rather than countries or sectors.

(Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Shenzhen Inovance Technology (China: Industrials) on softer demand for factory automation and electric vehicles, Unicharm (Japan: Consumer Staples) due to concerns around competition in the Southeast Asian disposable diaper market as birth rates decline plus stagnating consumption in China, and WuXi Biologics (China: Health Care) which continued to suffer from challenging market conditions in China and rising geopolitical tensions between the United States and China. The Fund sold WuXi during the period.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which has benefitted from improving demand outlook for tractors and SUVs, Taiwan Semiconductor Manufacturing (Taiwan: Information Technology) which continued to enjoy strong momentum as a beneficiary of increasing enthusiasm for artificial intelligence (AI) and demand for logic chips, and Godrej Consumer Products (India: Consumer Staples on expectations of improving volume growth in domestic and international markets.

Portfolio Changes

The Fund initiated a position in MediaTek (Taiwan: Information Technology), a fabless (outsourced production) semiconductor company who are leaders in integrated chip system solutions, Samsung C&T (South Korea: Industrials), a holding company for high-value businesses in health and electronics as well as direct operating businesses in construction and trade and Techtronic Industries (Taiwan: Industrials), who are dominant internationally in an array of cordless, hand, measuring and trade power tools for both home and commercial use.

The Fund exited Infineon Technologies (Germany: Information Technology) due to concerns over long-term competition, HDFC Life Insurance (India: Financials) due to the increased level of competition in the sector and Altium (Australia: Information Technology) after it received a takeover bid at a much higher premium than the published market price.

Investment Manager's Report (Unaudited) (continued)

Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations

(Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included WuXi Biologics (China: Health Care) which continued to suffer from challenging market conditions in China and rising geopolitical tensions between the United States and China, Shenzhen Inovance Technology (China: Industrials) on softer demand for factory automation and electric vehicles and Glodon (China: Information Technology) which continued to face concerns around economic growth and construction activity in China.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which has benefitted from improving demand outlook for tractors and SUVs, CG Power and Industrial Solutions (India: Industrials) which performed well thanks to continued progress in improving the quality of their franchise alongside robust demand across their end customer markets and Taiwan Semiconductor Manufacturing (Taiwan: Information Technology) which continued to enjoy strong momentum as a beneficiary of increasing enthusiasm for artificial intelligence (AI) and demand for logic chips.

Portfolio Changes

The Fund initiated a position in MediaTek (Taiwan: Information Technology), a fabless (outsourced production) semiconductor company who are leaders in integrated chip system solutions, Info Edge (India: Communication Services), a leading recruitment website in India and some other internet businesses and Samsung C&T (South Korea: Industrials), a holding company for high-value businesses in health and electronics as well as direct operating businesses in construction and trade.

The Fund exited Vinda International (China: Consumer Staples) after it received a takeover bid at a much higher premium than the published market price, Amoy Diagnostics (China: Health Care) which is exposed to regulatory risk from forced pricing cuts as the government reduces healthcare spending and WuXi Biologics (China: Health Care) to fund better ideas elsewhere. In hindsight, it was a mistake to invest in WuXi Biologics given the geopolitical risk to which it is exposed.

Investment Manager's Report (Unaudited) (continued)

Outlook

Views on investment opportunities in Asia have not changed; the Fund continues to look to invest in high-quality companies that are aligned with sustainable development. The Fund looks for stewards who are low profile, competent, long-term decision makers, franchises free from political agendas and financials that are resilient, not frail. Focus is on quality and the Fund remains indifferent to many of the large, well-known companies, regardless of lower valuations.

⁽Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark. Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which announced solid earnings growth despite a challenging market environment. The bank's asset quality has also remained strong. Beijing New Building Materials rose after the company announced plans to acquire Carpoly, a top 10 Chinese paint producer, as well as a share incentive plan which has ambitious profit growth targets through to 2026. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. Guangzhou Kingmed Diagnostics declined on weak earnings results, as the company reported lower revenue and a net loss over the recent quarter.

Portfolio Changes

New purchases included Wanhua Chemical, a specialty chemicals manufacturer with high technical barriers to entry. Over the past 45 years, Wanhua has become a leader in the polyurethane industry and continues to gain market share as the clear cost leader. The Fund also purchased China Jushi, the world leader in fibreglass production, a material with a wide range of uses. Its key competitive advantages include its cost leadership due to economies of scale, geographic proximity to raw materials and continuous technology investment.

The Fund sold China Taiping Insurance and China Resources Land to consolidate the portfolio.

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

First Sentier Investors (Hong Kong) Limited July 2024

Performance

Detractors to performance included Alfen (Netherlands: Industrials), which was impacted by pressures in their electric vehicle charging station segment. Endava (United States: Information Technology) and EPAM Systems (United States: Information Technology) also saw short-term pressures on customer budgets pushing out digitalisation spending.

Positive contributors included Nexans (France: Industrials) which continues to benefit from structural trends towards power grid upgrades and industrial electrification, Halma (United Kingdom: Information Technology), due to its strong execution in the acquisition of niche businesses across healthcare, environmental analysis, and safety, and Judges Scientific (United Kingdom: Industrials), following continued resilience in its sales and order-book growth.

Portfolio Changes

The Fund initiated a position in Dino Polska (Poland: Consumer Staples), a low-cost grocery retailer, Ashtead (United Kingdom: Industrials), which rents construction and industrial equipment to a range of customers in the United States and further afield, and Allegro (Poland: Consumer Staples), Poland's number one e-commerce platform that is expanding into Eastern Europe.

The Fund exited Alfen (Netherlands: Industrials) after issues around destocking, Admiral (United Kingdom: Financials) due to valuation concerns and Komerční banka (Czech Republic: Financials) in preference for other opportunities.

Outlook

The Investment Manager believes that the Fund has a portfolio of great sustainability companies which are adaptable, high-quality, with consistent cash flow capabilities and strong competitive positions in different market segments. The leaders of these companies understand the value of staying close to their customers. They steward their balance sheets carefully. They ensure their companies are as well placed to deal with emergent risks as they are to capitalise on long-term opportunities. The Fund will stay focused on the long-term, fundamental prospects of the companies held and those being watched closely. While the composition of the Fund portfolio is in good shape, the Investment Manager will keep searching for companies that might improve overall portfolio risk-return characteristics.

First Sentier Investors (Hong Kong) Limited July 2024

⁽Performance calculation is based on official dealing NAV)

Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Key contributors to performance included China Merchants Bank, which announced solid earnings growth despite a challenging market environment. The bank's asset quality has also remained strong. Tencent reported a significant jump in profits due to sustained improvements in its gross margin (sales proceeds minus the cost of goods sold). This was mainly due to the acceleration of its plans to boost its video accounts and mini games business. On the negative side, China Mengniu Dairy was affected by weak consumer demand in China. Guangzhou Kingmed Diagnostics declined on weak earnings results, as the company reported lower revenue and a net loss over the recent quarter.

Portfolio Changes

New purchases included Kangji Medical, a leading Chinese company in minimally invasive surgical instruments and accessories. The company leads in several product categories given its high product quality and long-term relationships with doctors. The Fund also bought Cloud Music, the second largest music-streaming platform in China. The company has several drivers to improve the profitability of the music business but given its stage of development it is still focused on growing the subscriber base and improving market share.

The Fund sold SF and Silergy to consolidate the portfolio.

Outlook

Despite concerns around "down-trading" (i.e buying less expensive goods) in the near term, Chinese people are still expected to become wealthier in the long run, due to increasing urbanisation and rising incomes. As this happens, they will likely want to improve their health and lifestyle, which favours consumer companies with premium brand strategies like Midea, China Resources Beer and China Mengniu Dairy.

During the Investment Manager's regular research trips to China, they look for companies that are either bucking the negative trends or are strengthening their market positions in the down-cycle. They believe there are still plenty of quality companies in China with strong brands and proven franchises that can achieve decent earnings growth over the long run.

(Performance calculation is based on official dealing NAV)

#Benchmarks are being included for illustrative purposes and there is no guarantee that a fund will outperform a benchmark.
No performance return has been presented for the year as the share class has not been in existence for a full year.
Past performance is no indication of current or future performance and the performance data does not take account of commissions and costs incurred in the issue and redemption of units.

Performance

Detractors to performance included Cyient (India: Information Technology) due to concerns around short-term results, GMM Pfaudler (India: Industrials) which had muted performance over the period as a challenging demand environment led to a miss in quarterly expectations, and Kotak Mahindra Bank (India: Financials) which came under pressure after the regulator imposed a short-term ban to adding customers to their online products.

Positive contributors included Mahindra & Mahindra (India: Consumer Discretionary) which has benefitted from improving demand outlook for tractors and SUVs, CG Power and Industrial Solutions (India: Industrials) which performed well thanks to continued progress in improving the quality of their franchise alongside robust demand across their end markets and Triveni Turbine (India: Industrials) who reported good results following positive momentum in export sales and strong domestic and international order books.

Portfolio Changes

The Fund initiated a position in VST Tillers Tractors (India: Industrials), India's leading maker of small farm equipment and SKF India (India: Industrials), India's largest maker of ball bearings which are important for the functioning of manufacturing plants, automotive products and railway moving stock.

The Fund exited HDFC Life Insurance (India: Financials) due to an increased level of competition in the sector, Tata Consultancy Services (India: Information Technology) to fund attractive opportunities in companies at an earlier stage of their evolution, and Delta Brac Housing Finance (Bangladesh: Financials) due to concerns around increased regulatory intervention within the sector.

Outlook

India recently elected her incumbent government (the Bharatiya Janata Party) back to power albeit in a coalition with a few regional parties. Indian election results are important but their importance is overstated in the context of long-term investment returns since 1991. India's development changed significantly following the economic crisis in 1991 known as the balance of payments crisis. Since then, India's growth and development has been fairly steady and predictable. This has been driven by continuity in policy and reform and a vibrant private sector that is contributing to, and benefitting from, India's development.

Stewart Investors Indian Subcontinent Sustainability Fund

Investment Manager's Report (Unaudited) (continued)

Outlook (continued)

The Investment Manager believes this trajectory should continue for many decades to come.

The Investment Manager remains focussed on identifying, and investing in, quality companies that are trading at reasonable valuations and which contribute to, and benefit from, sustainable development over the long term.

^{*} Stewart Investors Global Emerging Markets Leaders Sustainability Fund launched on 18 January 2022 and closed on 12 December 2022. The name of Stewart Investors Global Emerging Markets Leaders Sustainability Fund changed to Stewart Investors GEM Leaders Sustainability Fund 2023 on 12 December 2023.

Sustainability Fund 2023 on 12 December 2023.

** Stewart Investors Indian Subcontinent Sustainability Fund launched on 17 January 2023.

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited)

1. Organisation

First Sentier Investors Global Umbrella Fund plc (the "Company") was incorporated on 18 June 1998 and registered as an open-ended umbrella investment company with variable capital in Ireland under the Companies Act, 2014. The authorised share capital of the Company is five hundred billion shares of no par value initially designated as unclassified shares.

The sole objective of the Company is the collective investment in transferable securities and/or in other liquid financial assets referred to in the Central Bank UCITS Regulations of capital raised from the public and which operates on the principle of risk spreading.

The Company appointed First Sentier Investors (Ireland) Limited as its UCITS management company on 30 November 2023.

2. Principal accounting policies

(a) Basis of presentation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board (IASB), and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB.

The comparative figures included for the Statement of Financial Position ("SFP") relate to the previous year ended 31 December 2023, while the comparative figures included for the Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and Statement of Cash flows relate to the six-month period ended 30 June 2023.

The accounting policies used in the preparation of these financial statements are consistent with those used in the Company's most recent annual financial statements for the financial year ended 31 December 2023.

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. If in the future such estimates and assumptions, which are based on management's best judgement at the date of the financial statements deviate from the actual outcome, the original estimates and assumptions will be modified as appropriate in the financial period which the circumstances change.

The financial statements have also been prepared in accordance with the Central Bank (Supervision and Enforcement Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations") and the Hong Kong Securities and Futures Commission ("SFC") Code on Unit Trust and Mutual Funds (the "Code").

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

3. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and any deemed disposal of shares for Irish tax purposes arising as a result of the holding of shares for an eight-year period or more. No Irish tax will arise on the Company in respect of chargeable events in respect of:

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations and such authorisation has not been withdrawn; and

(b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

4. Exchange rates

The following exchange rates were used to translate assets and liabilities into the presentation currency United States Dollars or US\$ at 30 June 2024.

	30 June 2024	31 December 2023

United States Dollar	1.07090	1.10650

5. Soft commission

All research and advisory services are paid by the Managers/Sub-Managers and there are no soft commissions as part of trading.

6. Financial assets and liabilities designated at fair value through profit or loss

In determining an instrument's placement within the fair value hierarchy, the investment portfolio is separated into two categories: investments and derivative instruments. Each of these categories can further be divided between financial assets or financial liabilities.

Investments

Investments whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include active listed equities and bonds, certain U.S. government and sovereign obligations, and certain money market securities. The quoted prices for such instruments are not adjusted, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include certain U.S. government and sovereign obligations, most government agency securities, certain mortgage products, investment-grade corporate bonds, certain bank loans and bridge loans and less liquid listed equities, bonds state, municipal and provincial obligations and investments in other funds. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments include certain investments valued using an estimate of fair value. When observable prices are not available for these securities, one or more valuation techniques are used (e.g., the market approach or the income approach) for which sufficient and reliable data is available. Within Level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors.

Level 3 valuations are reviewed on a monthly basis by First Sentier Investors' Fair Value Pricing Committee ("FVPC"). The FVPC considers the appropriateness of the valuation model inputs, as well as the valuation result using various valuation methods and techniques generally recognised as standard within the industry.

There were no level 3 holdings held by the Company as at 30 June 2024 (31 December 2023: Nil).

Derivative contracts

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as warrants and future contracts, and OTC derivatives, such as forward currency contracts, credit default swaps and interest rate swaps, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

The Company considers the transfers between different levels to occur when there is a change in significant observable and unobservable inputs for a particular investment.

The Company's assets and liabilities (by class) not measured at fair value but for which fair value is disclosed have the following levels: Level 1 - cash and cash equivalents, margin accounts, bank overdrafts, Level 2 - remaining classes of financial assets and liabilities on the Statement of Financial Position. These assets and liabilities are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

The following table presents the financial instruments carried on the Statement of Financial Position by caption and by level within the valuation hierarchy as at 30 June 2024 and 31 December 2023.

^{*} Stewart Investors Indian Subcontinent Sustainability Fund launched on 17 January 2023.

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

6. Financial assets and liabilities designated at fair value through profit or loss (continued)

Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. These include fees and commissions paid to brokers and counterparties and have been classified within the Transaction cost line item of the statement of comprehensive income. Transaction fees paid to the Depositary on trade settlement are expensed as incurred and included in the Statement of Comprehensive Income.

7. Incorporation and share capital

As of 30 June 2024, 3 fully paid subscriber shares of EUR 1.25 were in issue. The subscriber shares are not entitled to any dividends or to participate in the profits of the Company beyond the amount of capital paid up on issue, have not been included in the financial statements, and are held by First Sentier Investors (Hong Kong) Limited and First Sentier Investors Nominees (Hong Kong) Limited.

The Company may issue up to 500,000,000,000 participating shares of no par value.

Holders of participating shares of the Funds are entitled to one vote per participating share. Participating shares of the Funds are also entitled to share in any dividends and profits of those specific Funds, and are redeemable at the option of the shareholder.

An anti-dilution adjustment may be payable by the shareholders from time to time as determined by the Investment Manager in respect of net subscriptions or net redemptions in a Fund. The amount of the anti-dilution levy is intended to cover dealing costs in order to protect continuing shareholders in that Fund.

Transactions in shares during the financial period were as follows:

Subscriber shares	At	At
	30 June 2024	31 Dec 2023
Issued at a price of €1.25	3	3

^{*} Stewart Investors Indian Subcontinent Sustainability Fund launched on 17 January 2023.

Notes forming part of the financial statements for the year ended 31 June 2024 (continued)

8. Derivative contracts

Future contracts

Future contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily. Future contracts have little credit risk because the counterparties are futures exchanges. Future contracts result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates, indices, and securities' values underlying these instruments. In addition, because of the low margin deposits normally required in relation to notional contract sizes, a high degree of leverage may be typical of a futures account.

As a result, a relatively small price movement in an underlying of a futures contract may result in substantial losses to the Company.

Futures trading may also be illiquid. Certain futures exchanges do not permit trading in particular futures contracts at prices that represent a fluctuation in price during a single day's trading beyond certain set limits. If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

Notional amounts are the underlying reference amounts to stock exchange indices, equities and foreign currencies upon which the fair value of the futures traded by the Company are based. While notional amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the Company's futures, the underlying price changes in relation to the variables specified by the notional amounts affect the fair value of these derivative financial instruments. The fair value of future contracts entered into by the Company as at 30 June 2024 is disclosed in the Schedule of Investments. Realised and unrealised gains or losses on derivatives are disclosed separately in the Statement of Comprehensive Income. The counterparty for all futures contracts is JP Morgan Securities LLC.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Funds may enter into forward foreign exchange contracts to manage the currency risk arising from the Funds' investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies. Realised and unrealised gains or losses on derivatives are disclosed separately in the Statement of Comprehensive Income. The counterparties for all the forward contracts are HSBC Bank plc, Citi London and Australia and New Zealand Banking.

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

8. Derivative contracts (continued)

Interest rate swaps

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. Interest rate swaps relate to contracts taken out by the Company with major brokers in which the Company either receives or pays a floating rate of interest in return for paying or receiving a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Company may obtain interest rate swaps for the purposes of efficient portfolio management and to hedge against interest rate risk. Realised and unrealised gains or losses on derivatives are disclosed separately in the Statement of Comprehensive Income. As at the period end date there were no interest rate swaps held (31 December 2023: none).

Credit Default Swaps

Credit default swaps represent a commitment with a counterparty to provide a level of credit protection in exchange for a commitment to pay interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Realised and unrealised gains or losses on derivatives are disclosed separately in the Statement of Comprehensive Income. As at the period end date there were no credit default swaps held (31 December 2023: none).

Warrants

Warrants give the holder the right to purchase securities from the issuer at a specific price within a certain time frame. Warrants are recorded as an asset or liability at their fair value on the Statement of Financial Position. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Comprehensive Income. Realised gains or losses on warrants are shown in the Statement of Comprehensive Income. On the expiry of a warrant the amount previously recognised in the Statement of Financial Position is recognised in the Statement of Comprehensive Income as a realised gain or loss. As at the period end date there were no warrants held (31 December 2023: none).

9. Delegation to investment and sub-investment managers

First Sentier Investors (Ireland) Limited (the "Manager") delegates the investment management of the Funds to First Sentier Investors (UK) IM Limited, First Sentier Investors (Singapore), First Sentier Investors (Australia) RE Ltd, First Sentier Investors (Australia) IM Ltd. and First Sentier Investors (Hong Kong) Ltd.

The table below sets out the details of the Funds whose investment management activity is delegated to each Investment Manager or Sub-Investment Manager:

10. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. Under IAS 24 "Related Party Transactions", any transactions carried out with the Company by the Promoter, Manager, Investment Managers and/or associated or group companies are considered to be related party transactions. All such transactions were entered into in the ordinary course of business and on normal commercial terms.

Kerry Baronet is Head of Product, First Sentier Investors.

Laura Chambers is Group Head of Financial Planning and Analysis at First Sentier Investors, and is also a Director of the following companies: CFSIM Limited, First Sentier Investors (Malta) Limited, First Sentier Investors (Malta) Holdings Limited, and SI Holdings Limited.

The Directors and the Secretary (including family interests) had no shareholdings in the Company at any time during the financial period from 1 January 2024 to 30 June 2024.

Matsack Trust Limited does not (including family interests) hold any participating shares in First Sentier Global Umbrella Fund as at 30 June 2024.

Mitsubishi UFJ Securities International plc (MITSU) is a connected party to the Company, through its ultimate parent company Mitsubishi UFJ Financial Group.

There were no investments related to the Mitsubishi UFJ Trust and Banking Corporation (31 Dec 2023: US\$ Nil) and there were no purchase and sales during the financial period of these investments and derivatives (31 Dec 2023: Purchases: US\$Nil, Sales: US\$500,000).

There were no transactions of the Funds affected through MITSU, in the ordinary course of their investment sales and purchase activities (whether as principal/agent) for each of the Funds, or brokerage commission paid to MITSU for the financial period ended 30 June 2024 (31 Dec 2023: Nil).

Notes forming part of the financial statements for the period ended 30 June 2024 (Unaudited) (continued)

10. Related parties (continued)

The Investment Managers may conduct cross trades with other sub funds which are also managed by each of the Investment Managers. During the period ended 30 June 2024, the Company transacted with another sub fund which is also managed by one of the Investment Managers.

This was in relation to the First Sentier Global Credit Income Fund (formally First Sentier Wholesale Global Credit Income Fund), managed by First Sentier Investors (Australia) IM Ltd which is a Sub-Investment Manager of the Company.

As at the 30th of June First Sentier Global Credit Income Fund held Nil (31 December 2023: 100%) of Class V units in the First Sentier Global Credit Sustainable Climate Fund. The First Sentier Global Credit Sustainable Climate Fund closed on 9 May 2024, when the holding was redeemed.

The transaction was carried out at the fair value of the investment on the date of the transaction. The decision was in the best interest of the Fund and fell within the investment objectives and policies of the Fund.

Connected parties

In accordance with the requirements of the Central Bank UCITS Regulations and SFC Code, all transactions carried out with the Company by the promoter, manager, depositary, investment manager and associates/group companies ("connected parties") must be carried out as if negotiated at arm's length and be in the best interests of shareholders. The Directors are satisfied that there are arrangements in place to ensure that the obligations set out in the Central Bank UCITS Regulations and SFC Code are applied to all transactions with connected parties and transactions with connected parties entered into during the period complied with the obligations set out in the Central Bank UCITS Regulations and SFC Code.

11. Significant shareholders

The table below represents the number of shareholders who had an entitlement of 20% or more in shares in issue of the Funds of the Company as at 30 June 2024 and 31 December 2023.

^{*******}Closure date - 5 June 2024

The above ratios are based on the Net Asset Value calculation as stated in the Prospectus. This calculation includes the amortisation of expenses incurred in the formation of new-sub funds over five years. As at 30 June 2024 unamortised preliminary expenses amounted to: \$34, \$35, \$35, \$35 and \$9,723 in relation to the Worldwide Sustainability Fund, Global Emerging Markets Sustainability Fund, Asia Pacific Leaders Sustainability Fund, Asia Pacific Sustainability Fund and Stewart Investors Indian Subcontinent Sustainability Fund.

2. Publications

The Articles of Association of the Company, the Prospectus, the Supplements and Key Information Documents for each sub fund and the annual and semi-annual reports of the Company can be obtained, free of charge from the Swiss Representative and Paying Agent, the Distributor and the Administrator.

^{*} First Sentier High Quality Bond Fund closed on 19 October 2023.

^{**} First Sentier Long Term Bond Fund closed on 19 October 2023.

^{***} First Sentier Global Credit Sustainable Climate Fund closed on 9 May 2024.

^{****} Stewart Investors Indian Subcontinent Sustainability Fund launched on 17 January 2023.

Unaudited Appendix

Cybersecurity Risk

Regardless of size, sector or location, all organisations are subject to a level of risk from cyber-attacks. The consequences of a cyber-attack, or other type of security incident, could adversely impact the Company and the Shareholders and lead to financial loss, reputational damage, theft/disclosure of sensitive company/client information, breach of legal/regulatory requirements or disruption of business operations (e.g. the loss of the ability to process transactions, calculate the Net Asset Value of a Fund or allow Shareholders to transact business). Depending on the nature and severity of the incident, financial impact could include Funds losing value, regulatory penalties, legal costs and additional costs associated with response, recovery and implementing corrective and preventive measures, to that end First Sentier Investors have a continuous programme that looks at strengthening security posture, being proactive in the identification and cyber defence as well as building resilience.

The Securities Financing Transaction Regulation Disclosure

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the Securities Financing Transaction Regulation ("SFTR") as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 30 June 2024, the Company did not hold any type of SFT.

Important Information

First Sentier Investors routinely monitors the portfolios for Russian, Ukrainian and Belarusian companies that derive a material portion of their revenues/ profits from Russian, Ukrainian and/or Belarusian business relationships and actively screens existing and prospective clients. First Sentier Investors has controls in place to ensure it is, and will remain, compliant with sanctions – these controls include investment restrictions and ongoing monitoring of sanctions from authorities globally – and will adapt risk and control policies as required.
