Shareholder Information

Automatic Exchange of Information

The OECD has developed a common reporting standard ("CRS") to achieve a comprehensive and multilateral automatic exchange of information AEOI on a global basis. On 9 December 2014, Council Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (the "Euro-CRS Directive") was adopted in order to implement the CRS among the Member States.

The Euro-CRS Directive was implemented into Luxembourg law by the law of 18 December 2015 on the automatic exchange of financial account information in the field of taxation ("CRS Law").

The CRS Law requires Luxembourg financial institutions to identify financial assets holders and establish if they are tax resident in countries with which Luxembourg has a tax information sharing agreement. Accordingly, the Company may require its investors to provide information in relation to the identity and tax residence of financial account holders (including certain entities and their controlling persons) in order to ascertain their CRS status. Responding to CRS-related questions is mandatory. The personal data obtained will be used for the purpose of the CRS Law or such other purposes indicated by the Company in the data protection section of the Prospectus in compliance with Luxembourg data protection law. Information regarding a shareholder and his/her/its account will be reported to the Luxembourg tax authorities (Administration des Contributions Directes), which will thereafter automatically transfer this information to the competent foreign tax authorities on a yearly basis, if such account is deemed a CRS reportable account under the CRS Law.

In addition, Luxembourg signed the OECD's multilateral competent authority agreement ("Multilateral Agreement") to exchange information automatically under the CRS. The Multilateral Agreement aims to implement the CRS among non-Member States; it requires agreements on a country-by-country basis.

The Company reserves the right to refuse any application for Shares if the information provided or not provided does not satisfy the requirements under the CRS Law.

On 25 May 2018, the EU Council adopted a directive (2018/822 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation) that imposes a reporting obligation on parties involved in transactions that may be associated with aggressive tax planning ("DAC6"). DAC6 has been implemented in Luxembourg by the law of 25 March 2020 (the "DAC6 Law"). More specifically, the reporting obligation will apply to cross-border arrangements that, among others, meet one or more "hallmarks" provided for in the DAC6 Law that is coupled in certain cases, with the main benefit test (the "Reportable Arrangements"). In the case of a Reportable Arrangement, the information that must be reported includes inter-alia the name of all relevant taxpayers and intermediaries as well as an outline of the Reportable Arrangement, the value of the Reportable Arrangement and identification of any member states likely to be concerned by the Reportable Arrangement. The reporting obligation in principle rests with the persons that design, market or organize the Reportable Arrangement or provide assistance or advice in relation thereto (the so-called "intermediaries"). However, in certain cases, the taxpayer itself can be subject to the reporting obligation. Intermediaries (or the case maybe, the taxpayer) may be required to report a Reportable Arrangement from 30 January 2021. The information reported will be automatically exchanged between the tax authorities of all Member States. In light of the broad scope of the DAC6 Law, transactions carried out by the Company may fall within the scope of the DAC6 Law and thus be reportable.

8. Dividend Purification

The Shariah Committee has issued guidelines to quantify the annual amount of income of the Company that should be donated to charity, being derived from companies eligible for investment pursuant to the investment objective, policy and restrictions set out in the Prospectus for each sub-fund, but that are engaged in an activity or activities of a marginal nature which is or are proscribed by the Shariah Committee and which is not or are not screened out by the investment restrictions. The purification ratios will be provided by the relevant index provider for each sub fund, for all companies in which the sub-funds have invested. For companies, whose purification ratios are not provided by the index provider, purification ratios will be calculated based on the financial information of these companies received from the Investment Advisers. Such income will be disbursed as a charitable donation to one or more worthy causes approved by the Shariah Committee.

An invoice for a total amount of USD 119,709 for purification fees was charged to HSBC Islamic Global Equity Index Fund for the year 2023.

Notes to the Financial Statements

for the period ended 30 June 2024 (continued)

9. Forward Foreign Exchange Contracts

The Company may use Shariah compliant Forward Foreign Exchange Contracts for hedging purposes. As at 30 June 2024, there were no open Forward Foreign Exchange contract entered into.

10. Commitment Approach

There are currently no derivative positions in the sub-fund, however, if approved by the Shariah Committee, the sub-funds may, to a limited extent, enter into simple positions in financial derivative instruments transactions for investment purposes other than hedging techniques and efficient portfolio management, in particular to gain exposure on financial markets when the relevant sub-fund Investment Adviser believes that it is more efficient to purchase financial derivative instruments than the corresponding physical securities. The sub-fund will use the commitment approach.

The commitment approach is generally calculated by converting the derivative contract into the equivalent position in the underlying asset embedded in that derivative, based on the market value of the underlying. Purchased and sold financial derivative instruments may be netted in accordance to the CESR's guidelines 10/788 in order to reduce global exposure. Beyond these netting rules and after application of hedging rules, it is not allowed to have a negative commitment on a financial derivative instrument to reduce overall exposure and as such, risk-exposure numbers will always be positive or zero.

11. Disclosure requirements for Index-tracking UCITS: HSBC Islamic Global Equity Index Fund

The HSBC Islamic Global Equity Index Fund is the sole index tracking sub-fund existing at the date of this report.

The annualised tracking error for the period ended 30 June 2024 is 0.1057%.

The annualised tracking errors are internally calculated by HSBC Global Asset Management (UK) Limited, based upon investment accounting performance returns using close of market prices, gross of fees, based on monthly data points. For example, 12 monthly points for 1 year, 36 monthly points for 3 years and 60 monthly points for 5 years.

The anticipated level of tracking error between the HSBC Islamic Global Equity Index Fund and the index "Dow Jones Islamic Market Titans 100 index", in normal market conditions is 0.20%. The HSBC Islamic Global Equity Index Fund is in line with anticipated tracking error.

12. Total Expense Ratio

The Total Expense Ratio ("TER") has been computed by the Administrator as required per the Swiss Funds & Asset Management Association "AMAS" guidelines on the calculation and disclosure of the TER of collective investment schemes. The actual expenses incurred during the year are annualised and calculated as a percentage of the average Assets Under Management of the share class for the year.

Synthetic TER is applicable for a sub-fund that invests at least 10% of its net assets as a fund of funds in other collective investment schemes (target funds) which publish a TER within the meaning of the present guidelines. A composite (synthetic) TER of the fund of funds is to be calculated by the administrator, as of the closing date of the financial year or the end of the first half of the financial year.

13. Anti-Dilution Mechanisms

There are two Anti-Dilution Mechanisms available to each sub-fund, a Swing Pricing Adjustment and an Anti-Dilution Levy, both mechanisms aim to protect shareholders in a sub-fund.

When investors buy or sell Shares in a sub-fund, the Investment Adviser may need to buy or sell the underlying investments within the sub-fund. Without an Anti-Dilution Mechanism to take account of these transactions, all Shareholders in the sub-fund would pay the associated costs of buying and selling these underlying investments. These transaction costs can include, but are not limited to, bid-offer spreads, brokerage and taxes on transactions.

Until Anti-Dilution Mechanism's threshold rate is triggered, no Anti-Dilution Levy or Pricing Adjustment is applied and the transaction costs will be borne by the sub-fund. This will result in a dilution (reduction in the Net Asset Value per Share) to existing Shareholders. Investors should note that sub-distributors may levy the sales charge (if any) on an investor's full subscription and may not take into account the application of an Anti-Dilution Levy. For the avoidance of doubt, it is clarified that fees other than the sales charge will continue to be calculated on the basis of the unadjusted Net Asset Value for Pricing Adjustment.

There is an adjustment of the Net Asset Value per Share only when a Pricing Adjustment is applied. When Anti-Dilution Levy is applied, in the case of net capital inflows, the Anti-Dilution Levy will be deducted from each subscription amount and accordingly reduce the number of Shares received by an investor or, in the case of net capital outflows, will be deducted from each redemption amount and accordingly reduce the redemption proceeds received by an investor.

Notes to the Financial Statements

for the period ended 30 June 2024 (continued)

13. Anti-Dilution Mechanisms (continued)

The amount of the Anti-Dilution Levy be up to a maximum of 2% and may be reduced or waived at the discretion of the Board of Directors. In the case of Pricing Adjustment, the adjustment will not exceed 2%. However, it may be significantly higher during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress.

Detail of each Mechanism are specified in the latest Fund's Prospectus from page 23 to 24.

Details of which Anti-Dilution Mechanism is applicable on the sub-fund can be obtained from the Management Company. Should the Company decide to change the Anti-Dilution Mechanism in operation for the sub-fund (i.e. from a Pricing Adjustment to Anti-Dilution Levy or vice versa), prior approval will be sought from relevant regulators (where required) and affected investors will receive at least one month's prior written notification.

14. Significant Events

Mr. Jean de Courrèges resigned from the Board of Directors effective 31 March 2024 and Carine Feipel was appointed effective 2 April 2024.

Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia including, among other actions:

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, which include (but not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the portfolios' investments beyond any direct exposure to Russian issuers. They also give rise to material uncertainty and risk with respect to markets globally and the performance of the Portfolios and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted. The Company does not have any exposure to Russian securities.

15. Subsequent Events

There were no events subsequent to the annual report date which would require adjustments to or disclosures in these financial statements.

Appendix II (Unaudited Additional Disclosures) – UK SORP Disclosure

Investment Risk

Information in relation to certain investment risks are disclosed for selected sub-fund as follows:

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as market prices, foreign exchange rates and investment income rates. It comprises of three major types of risks i.e. currency risk, investment income rate risk and other price risk.

As it is invested in equities, the Fund is exposed to the risk that the equity markets decline. This risk is monitored in absolute terms by the equity exposure and relative to the benchmark by the calculation of the ex-ante tracking-error.

The Sharia committee has expressly declared the use of financial derivatives instruments as inappropriate for the sub-fund, unless otherwise approved by the committee.

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.

Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations. The Fund does not enter into any FX hedging transactions in order to manage its exposure to foreign exchange movements.

The table below summarises the sub-fund's exposure to currency risks.

Sub-fund	Currency	Net currency exposure in Sub-fund currency
HSBC Islamic Global Equity Index Fund		
	Other	319,397,796

(ii) Interest rate risk

Investment income rate risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market investment income rates.

HSBC Islamic Global Equity Index Fund aims to track the performance of the Dow Jones Islamic Market Titans 100 Index, through investment in a diversified portfolio of securities as defined by the relevant index. The sub-fund does not invest in fixed income securities; hence the Fund's portfolio is not exposed to interest rate risk.

(iii) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

HSBC Islamic Global Equity Index Fund aims to track the performance of a world index, i.e. Dow Jones Islamic Market Titans 100 Index, through investment in a diversified portfolio of securities as defined by the relevant index, which meets Islamic investment principles as interpreted and laid down by the Shariah Committee and provided to the Board of Directors. The sub-fund does not invest in fixed income securities, thus the Fund is not exposed to credit risk.

Credit ratings

All amounts due from brokers, cash and short-term deposits are held by parties with a credit rating of AA-/Aa or higher.

(iv) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Other price risk arises principally in relation to the sub-fund's return seeking portfolio which includes shares and depositary receipts.

The sub-fund manages this exposure to other price risk by constructing a diverse portfolio of investments across various markets.

At the period end, the sub-fund's exposure to investments subject to other price risk was:

Depositary Receipts	10,834,565	

Fair Value Hierarchy

Fair value is the amount for which an asset could be exchanged, a liability settled, or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm's length transaction.

The fair value of financial instruments has been determined using the following fair value hierarchy:

Category (a) The quoted price for an identical asset in an active market.

Category (b) When quoted prices are unavailable, the price of a recent transaction for an identical asset adjusted if necessary.

Category (c) Where a quoted price is not available and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is determined by using a valuation technique which uses:

C (i) observable market data; or

C (ii) non-observable data.

All the investments of HSBC ISLAMIC FUNDS detailed in the "Portfolio of Investments and Other Net Assets" are classified as "Transferable Securities admitted to an official stock exchange listing", hence are classified under category (a).
