## Who we are

Janus Henderson Investors (Janus Henderson) is a global asset manager offering a full suite of actively managed investment products across asset classes.

As a company, we believe the notion of 'connecting' is powerful – it has shaped our evolution and our world today. At Janus Henderson, we seek to benefit clients through the connections we make. Connections enable strong relationships based on trust and insight as well as the flow of ideas among our investment teams and our engagement with companies. These connections are central to our values, to what active management stands for and to the long-term outperformance we seek to deliver.

Our commitment to active management offers clients the opportunity to outperform passive strategies over the course of market cycles. Through times of both market calm and growing uncertainty, our managers apply their experience weighing risk versus reward potential – seeking to ensure clients are on the right side of change.

## Why Janus Henderson Investors

At Janus Henderson, we believe in linking our world-class investment teams and experienced global distribution professionals with our clients around the world.

### Active because active matters

We selectively invest in what we believe are the most compelling opportunities. Our investment teams are free to form their own views and seek to actively position portfolios to connect clients with their financial goals.

### Global strength to deliver local solutions

We offer true global reach with a presence in all major markets, combined with the responsiveness, tailored solutions and personal touch you would expect from a local partner.

### Empowering clients through Knowledge Shared

We connect our clients with insights and knowledge that empower them to make better investment and business decisions.

# Directors' Report

## Introduction

Janus Henderson Horizon Fund (the 'Company') is an open-ended investment company organised as a société anonyme under the laws of the Grand Duchy of Luxembourg and qualifies as a SICAV. The Company was incorporated in Luxembourg on 30 May 1985 pursuant to the Luxembourg laws of 10 August 1915 on commercial companies (as amended) and is qualified as a UCITS under Part 1 of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as amended (the 'Law').

The Company is structured as an umbrella company which has the ability to issue various classes of shares. Each sub-fund within the umbrella is treated as an independent entity, with its own portfolio of investments, objective and investment policy.

Shareholders of each sub-fund are entitled only to the wealth and yield of the sub-fund to which they have subscribed. Each sub-fund bears the appropriate amount of liabilities attributable to it and the commitments entered into in the name of one sub-fund covered solely by the assets of that sub-fund. The Company will not be liable as a whole to third parties. Separate accounts and records are maintained for each sub-fund.

## Financial Statements

The Board of Directors of the Company (the 'Board') presents its report and the audited annual financial statements for the year ended 30 June 2022.

A copy of the latest annual and interim financial statements may be obtained upon request from either the offices of the companies registered as Distributors or from the Registered Office of the Company and at [www.janushenderson.com](http://www.janushenderson.com).

The Net Assets at 30 June 2022 amounted to USD 12.86 billion.

At the year end, the Company consisted of 27 active sub-funds.

## Other information

- Details of share class launches, closures and share class name changes can be found on pages 274 to 275.
- Pan European Absolute Return Fund changed its benchmark from the Euro Main Refinancing Rate to the Euro Short Term Rate (€STR) on 1 July 2021 and performance target to outperform €STR by at least 1% per annum, after deduction of charges, over any 3-year period on 25 February 2022.
- Sustainable Future Technologies Fund launched on 3 August 2021.
- US Sustainable Equity Fund launched on 3 August 2021.
- Global Equity Income Fund closed on 23 November 2021.
- New performance fee calculation methodology for all relevant Janus Henderson Horizon Funds and classes from 1 July 2021, the details of which can be found in Note 6 of the Notes to the Financial Statements.
- The legal entity name for Janus Capital Management LLC changed to Janus Henderson Investors US LLC on 3 January 2022.
- Global Natural Resources Fund changed its name to the Responsible Resources Fund on 25 February 2022.
- Pan European Smaller Companies Fund changed its benchmark from the EMIX Smaller European Companies Index to the MSCI Europe Small Cap Index and changed its performance target to outperform the MSCI Europe Small Cap Index, after the deduction of charges, over any 5-year period on 25 February 2022.
- A number of funds have changed from being an Article 6 to Article 8 on 25 February 2022. Please refer to the Appendix for details.
- Janus Henderson Horizon Fund Asian Growth Fund changed its Sub-Investment Managers with effect from 1 March 2022, from Janus Henderson Investors (Singapore) Limited to Janus Henderson Investors US LLC.
- The legal entity name for Henderson Global Investors Limited changed to Janus Henderson Investors UK Limited on 15 March 2022.

The Directors may from time to time close or merge sub-funds as well as add further sub-funds with different investment objectives, subject to the approval of the Commission de Surveillance du Secteur Financier (CSSF). Notifications will be provided to shareholders on closure and merger of sub-funds, which are also subject to review by the CSSF.

## COVID-19

The outbreak of the novel coronavirus ('COVID-19') and subsequent global pandemic began impacting financial markets and economies during the first quarter of 2020. The worldwide spread of the virus led to uncertainty on an unprecedented scale. The impact of COVID-19 has been taken into account in the measurement of the assets and liabilities in the primary statements for the year to 30 June 2022.

## Russia/Ukraine conflict

Janus Henderson continues to monitor the situation very closely and has established processes incorporated in the business as usual activities to be able to respond timely to changes. We have well established and tested business continuity and crisis management processes in place, which cover a large number of disruptive scenarios, including cyber threats and market events. Janus Henderson incorporates modelling potential scenarios to inform our investment decisions, as we continue to monitor the ongoing situation.

## Directors' Report (continued)

### **Corporate Governance Statement**

The Board adheres to the Association of the Luxembourg Fund Industry (ALFI) code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

On behalf of the Janus Henderson Horizon Fund Board, I would like to thank you for your continued support.

Kevin Adams  
Chairman  
18 October 2022

# Market review

For the year 1 July 2021 to 30 June 2022

## Overview

Global equity markets, as measured by the MSCI World Index, decreased by 13.9% in US Dollar terms, on growing anxiety about a global economic recession as soaring inflation prompted major central banks to tighten monetary policy more aggressively than expected. Russia's invasion of Ukraine, the emergence and spread of new COVID-19 strains, and the return of lockdowns in China in 2022 further pressured shares. The darkening mood on markets dragged global equity benchmark the MSCI ACWI Index to a record first-half loss in 2022. Economic optimism, as COVID-19 restrictions were eased in Europe and the US in 2021, positive earnings momentum and relief that the impact of the Omicron variant of COVID-19 would not be as bad as initially feared limited the overall losses, however.

## Equities

### Continental Europe

European stocks moved lower, the MSCI Europe (ex UK) Index decreased by 11.3% in Euro terms, as concerns about inflation, economic growth, geopolitical uncertainty and the pandemic hurt sentiment. Some strong corporate results and receding worries about the Omicron variant counterbalanced these negative factors somewhat. The Eurozone annual inflation rate hit a record 8.6% in June 2022, up from 2.2% in July 2021. The European Central Bank initially insisted that the price rises were transitory, although it turned increasingly hawkish and, in June, paved the way for an interest rate rise in July, while warning of a potentially larger hike in September. In the same month, the Swiss central bank announced a surprise interest rate increase. The Eurozone economy expanded by 0.6% over the first quarter of 2022, up from 0.2% growth over the previous three months. The Euro weakened against the US Dollar, although it was little changed against Sterling.

### UK

The FTSE All Share Index increased by 1.6% in Sterling terms, as some favourable corporate results and economic optimism stemming from loosened lockdown restrictions in the summer of 2021 offset anxiety about inflation and the risk of an economic downturn. Worries about the pandemic, particularly the emergence of the Omicron strain, and the conflict in Ukraine also exerted significant downward pressure. The Bank of England (BoE) raised interest rates five times, taking the benchmark rate from 0.1% to 1.25%, as inflation surged – the annual rate hit a 40-year high of 9.1% in May 2022, up from 2.0% in July 2021. Economic growth weakened, with GDP expanding by 0.8% over the first quarter of 2022, down from 1.3% over the fourth quarter of 2021. Sterling fell against the US Dollar, with the latter currency boosted by the prospect of quickening interest rate rises.

### US

US stocks, as measured by the S&P 500 Index, decreased by 10.6% in US Dollar terms. The index hit record highs in 2021, buoyed by optimism about new economic stimulus measures and generally strong corporate results. However, its 20% drop in the first half of 2022 – fuelled by anxiety about inflation and the economy – was the biggest for the period since 1970. Tensions with Russia and worries about Omicron also created volatility. Annual inflation reached a more than 40-year high of 8.6% in May, up from 5.4% in July 2021. The US Federal Reserve (Fed) raised interest rates three times in 2022, from 0.25% to 1.75%, with June's 75bps hike the largest in 28 years. US GDP unexpectedly contracted by an annualised 1.6% in the first quarter of 2022, following 6.9% growth in the prior quarter. The US Dollar strengthened – it hit 20-year highs – helped by monetary policy tightening.

### Japan

The TOPIX decreased by 1.4% in Japanese Yen terms. Optimism about further government stimulus measures, following the resignation of Prime Minister Yoshihide Suga, boosted equities in September, after they had largely trended sideways. In November, the government – led by Fumio Kishida after he won a general election – announced a huge spending package, which supported the market. Worries about the increasingly hawkish Fed, geopolitical uncertainty and the pandemic pressured shares thereafter, although news that China had eased some COVID-19 restrictions provided some support towards the end of the reporting year. Annual consumer price increases steepened to a seven-and-a-half-year high of 2.5% in April – and remained there the following month – compared with a fall of 0.3% in July 2021. Japan's economy shrank by an annualised 0.5% in the first quarter of 2022, following growth of 4.0% in the previous quarter. The Bank of Japan retained its ultra-loose monetary policy stance, which saw the Japanese Yen sink to 24-year lows against the US Dollar in June.

### Asia

The MSCI AC Asia Pacific ex Japan Index sold off, decreasing by 23.1% in US Dollar terms, led by sharp falls in China. Chinese equities slumped on extended COVID-19 lockdowns in the country, economic concerns, the property sector's debt problems, electricity rationing and a regulatory crackdown. A relaxation of COVID-19 curbs helped stocks rebound towards the end of the reporting year. South Korean shares plummeted as inflationary and economic worries grew. Similar concerns plagued Taiwan's market, which also fell, albeit less severely. Tensions with China added further pressure and helped offset a technology-led rally in late 2021 and early 2022. Australian shares declined, as worries about accelerating interest rate rises in the US outweighed the benefits of commodity price increases.

### Emerging markets

The MSCI Emerging Markets Index sank, decreasing by 25.0% in US Dollar terms. Indian shares were lower in US Dollar terms. Loosened COVID-19 restrictions, continued GDP growth and economic optimism propelled the benchmark S&P BSE Sensex Index to record highs in 2021, while major central banks' increasingly hawkish tone underpinned weakness in 2022. Brazilian shares dropped on investor caution ahead of a general election in October 2022 and concerns about the government's fiscal position, while the central bank implemented a series of large interest rate rises to tame inflation. Russian equities plummeted as the invasion of Ukraine got underway. In March, Russia was excluded from MSCI's emerging market indices, because Western sanctions had made stocks 'uninvestable' in the country. South African equities, which dropped in US Dollar terms, initially benefited from commodity price rises and relief about the weaker-than-expected health impact of Omicron, although damaging floods and power cuts hurt the market.

## Market review (continued)

For the year 1 July 2021 to 30 June 2022

### Fixed income

Within fixed income, the JPM Global Government Bond Index decreased by 5.6% in US Dollar terms. Yields on core government bond markets – including the US, UK, Germany and Japan – rose sharply (prices fell, reflecting their inverse relationship) as investors became increasingly concerned about inflation and monetary policy tightening. In the US, the yield on benchmark 10-year Treasuries finished the reporting year at about 3% – having reached a more than 10-year high of almost 3.5% in intraday trading on 14 June – up from almost 1.5% a year earlier. Part of the Treasury yield curve inverted in March and June – the two-year bond yield moved above that of 10-year notes – a possible sign of an impending recession. German 10-year bund yields moved into positive territory in late January – the first time since May 2019 – and largely remained there. In corporate debt markets, global fundraising by businesses, including bond issuance, totalled US\$4.9trn in the first half of 2022, down by 25% from an all-time high a year earlier. The decline largely stemmed from worries about monetary policy tightening.

### Commodities

In commodity markets, oil prices increased sharply, with US benchmark West Texas Intermediate (WTI) up by more than 40%. The conflict in Ukraine fuelled anxiety about possible supply disruptions and helped lift WTI to a 14-year high in March. The geopolitical uncertainty pushed natural gas prices to record highs in Europe, while prices also rose sharply in the US. Spot gold prices neared a record high in March, although they were only modestly higher overall as a stronger US Dollar weighed on demand for the precious metal. Copper prices hit record highs in early March, although they retreated thereafter and were weaker overall, because of concerns about a global economic downturn.

# Emerging Market Corporate Bond Fund

Investment report for the year from 1 July 2021 to 30 June 2022

## Investment Fund Managers

Herve Biancotto and Ales Koutny

The fund fell 18.0% (Net), 17.3% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 14.3% in the JP Morgan Corporate Emerging Market Bond Index (CEMBI) Broad Diversified and a fall of 13.0% in the Target Index + 1.5%, US Dollar terms.

During the second quarter of 2022, optimism about the global economy reopening and pick-up in activity as the pandemic became more controllable, thanks to effective vaccine roll-outs, waned. Inflation, which was expected to be high due to transitory circumstances, remained 'sticky', forcing central banks to start a rate tightening cycle. The US 10-year Treasury yield rose 153 basis points (bps) during the reporting year. The US Dollar appreciated by 7.6% on a nominal trade-weighted basis. The tightening of US Dollar funding conditions is typically a challenging environment for emerging market external assets.

During the year, China accelerated a crackdown against the education, technology and real estate sectors to curb excessive investment and leverage. The authorities underestimated the effects of these policies, which pushed the China high-yield default rate to a record high of 19.4%, driven by the property sector, where the rate reached nearly 30% or about US\$33bn. The segment contributed five of the 11 largest emerging market corporate defaults of all time: China Evergrande, Kaisa, China Fortune Land Development, Fantasia and China Aoyuan. During the first quarter of 2022, another 12 Chinese developers defaulted on US\$16.7bn of debt. In February 2022, Russia invaded Ukraine, prompting Western countries to impose sanctions against Moscow and the exclusion of all Russian assets from international benchmarks.

The JP Morgan Corporate Emerging Market Bond Investment Grade sub-index returned -13.5% during the year, while the JP Morgan Corporate Emerging Market Bond High Yield sub-index returned -15.4%. However, weakness in higher-quality investment-grade bonds was driven by rising US interest rates. On a spread basis, investment grade was down by only -6.4%, equivalent to a widening of 54bps. Meanwhile, high-yield spreads widened by more (221bps), resulting in a loss of -10.6%.

The first half of 2022 saw a reversal of all inflows accumulated in 2021, equivalent to about US\$52bn. However, low refinancing needs from emerging market corporates and subdued primary activity mitigated this headwind.

Among Chinese developers, Kaisa was the worst performer. Contrary to our expectations, the company was unable to sell assets to raise cash at a time when funding channels on the international market or through banks were shut. Kaisa missed repayment in December 2021 and defaulted after the grace period expired a month later. Similarly, Agile, another Chinese developer, hurt returns as default fears spread. The fund gradually reduced its exposure to three issuers in the Chinese real estate sector (Country Garden, CIFI and Yanlord Land), which were in the upper range of the quality spectrum for non-sovereign-owned entities. We believed the low cash prices reflected investors' temporary aversion, rather than intrinsic credit risks. The fund's exposure to a basket of sovereign issuers also weighed on returns. Sovereign emerging market bonds, which are more liquid than corporates, underperformed as outflows from emerging market assets grew. The fund started 2022 with an underweight position in Russian corporates, as we witnessed growing tensions with Ukraine, which contributed to relative returns. However, an exposure to Russia's VTB Bank weighed on performance. An investment in Jamaican telecommunications operator Digicel was among the largest contributors. We expected Digicel to continue rationalising its capital structure and bring down leverage through asset disposals. A structural underweight holding in Macau gaming companies also helped relative returns, as China's 'zero-COVID-19' policy drastically hindered tourism activity.

As the market weakened in the fourth quarter of 2021, liquidity became challenging and the spread between bid and offer prices widened, making it expensive to transact in cash securities. The fund used credit default swap instruments to adjust its spread exposure in a cost-aware way. The fund also used US Treasury futures to mitigate its duration exposure as US Treasury yields marched higher.

Emerging market assets continue to suffer from a tightening in global financial conditions in the form of a stronger US Dollar and higher US Treasury yields. China, the only country that has loosened monetary and credit policy, has reduced the number of COVID-19 cases to zero for now, albeit at a huge economic cost to Chinese households. These costs are unlikely to deter the authorities from their policy.

Reopening hopes in China, combined with increasing credit stimulus, offer some prospects for investors, especially compared with the rest of the world. The second half of 2022 might be one where Chinese assets perform again. Outside of China, we think the prospects are less optimistic. Emerging market countries have entered this challenging period with weak balance sheets, especially commodity importers. As long as the US Dollar continues to appreciate, both the cost of imports and the cost of external debt increase, making a wave of defaults increasingly likely. Expectations of recession in major developed economies and a global demand slowdown add another challenge to an already bleak picture for emerging markets. In our view, adverse macroeconomic conditions still favour defensive positioning in emerging market assets, where tactical and liquid trades prevail. We prefer companies in high-grade commodity exporting regions such as the Middle East and Asia.

There have been changes to the Investment Fund Managers during the year under review. From 1 December 2021 Herve Biancotto and from 15 April 2022 Ales Koutny now co manage the fund.

# Emerging Market Corporate Bond Fund

## Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the JP Morgan Corporate Emerging Market Bond Index (CEMBI) Broad Diversified by 1.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 70% of its assets in bonds of any quality, including high yield (non-investment grade) bonds, in emerging markets. The fund may invest up to 20% of its net assets in contingent convertible bonds (CoCos); asset-backed and mortgage-backed securities; distressed debt; and/or China onshore bonds traded through Bond Connect.

Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the JP Morgan CEMBI Broad Diversified, which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager generates investment ideas using 'bottom-up' credit (corporate bond and issuer) research, informed by 'top-down' sovereign and geopolitical views. Sovereign risk factors helps to time investments in specific countries and Environmental, Social and Governance (ESG) considerations can help to highlight hazards. The process focuses as much on downside risks as it does on research of bonds and issuers.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%
Emerging Market Corporate Bond Fund	H2 USD (Net)*	(1.90)**	8.37**	4.64**	8.99**	(18.01)
JP Morgan CEMBI Broad Diversified		(0.14)	10.21	3.74	8.67	(14.25)
Emerging Market Corporate Bond Fund	H2 USD (Gross)*	(0.99)**	9.30**	5.51**	9.92**	(17.34)
JP Morgan CEMBI Broad Diversified + 1.5%		1.35	11.85	5.31	10.30	(12.97)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 USD share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Euro Corporate Bond Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Tim Winstone and Tom Ross

The fund fell 13.8% (Net), 13.1% (Gross), based on Class H2 in Euro terms over the year under review, compared with a fall of 12.9% in the iBoxx Euro Corporates Index and a fall of 11.6% in the Target Index + 1.5%, Euro terms.

Euro investment-grade corporate bonds generated a negative total return during the reporting year. Excess returns (versus government equivalents) were also negative, with Euro investment-grade credit spreads (the additional yield over an equivalent government bond) closing 140 basis points (bps) wider.

Supply bottlenecks caused by economies reopening from COVID-19 lockdowns drove up inflation, causing many central banks to pivot sharply to tightening policy. Russia's invasion of Ukraine in February further fuelled inflationary pressures that contributed to inflation hitting 40-year highs in the US and a record high in the Eurozone. The European Central Bank suggested it would start raising interest rates in July, and that eight years of negative rates might end in September. The Fed raised rates by 25bps in March, by 50bps in May and, in its biggest move in almost three decades, by 75bps in June. The Bank of England hiked rates five times in as many meetings. Ten-year yields in Germany and the US rose by 170bps and 157bps, respectively. The year ended with inflation remaining uncomfortably high for policy makers and markets increasingly concerned that aggressive monetary policy tightening could trigger recession.

The fund's performance benefited from having no direct exposure to Russia and Ukraine, with an underweight allocation to Russian utility Gazprom the largest single name contributor. An exposure to Austria's Raiffeisen Bank International (RBI) was also positive. We established a position in RBI in early March, believing that a disposal of Russia-related assets would not negatively impact the bank's capital position. We bought short-dated, preferred senior bonds at attractive levels and the bonds have since tightened to pre-invasion levels.

Portuguese insurer Fidelidade was a standout performer in late 2021. The previously unrated name received an A- default rating from Fitch Ratings, which led to a better-than-expected rating for the fund's lower tier 2 bond holdings. This triggered a further significant tightening of the bonds, and we took profit on the position.

An overweight exposure to European real estate was the main detractor, given overweight holdings in names such as VGP, Heimstaden Bostad, Castellum, Adler and CPI Property. While credit fundamentals across European real estate issuers generally remained strong, technical conditions such as ample supply weighed on performance. We reduced the fund's positioning as a result, and for risk management purposes.

Off-benchmark positioning predominantly focused on BB rated securities we identified as 'rising star' (high-yield issuers expected to be upgraded to an investment-grade rating) candidates hurt performance. While we deemed these to be select, high-conviction, idiosyncratic risk positions, the securities were hurt in the 2022 sell-off given their greater sensitivity to market movements. We mitigated some of the high-yield underperformance through short high-yield risk hedges (via credit default swap indices).

We entered the year positioned with a small overweight exposure to credit risk relative to the benchmark. We gradually moved to an underweight position in April 2022, by rotating out of bonds with valuations that did not compensate for beta or cyclical risk.

We maintained a more defensive stance, with an underweight position in credit relative to its benchmark. This position reflected concerns about the deteriorating economic growth outlook and uncertain macro backdrop. Inflation control remains central bank's focus and is likely to climb higher before peaking over the next few months, while the 'sticky' components have not seen signs of slowing down.

We acknowledge that we have seen an improvement in the level of investment-grade corporate bond yields, which has led to a pick-up in demand for the asset class. Corporate bonds are now offering more attractive income and diversification than before and the hunt for yield is proving to be a positive dynamic for the asset class. However, in our view, the spread picture undercompensates investors for rising recessionary risks in the US and a deep recession in Europe. In the US, the likelihood of a recession seems around 20-30% priced into current valuations. In Europe, it seems that markets are underestimating the risks and impact of a full-blown energy crisis, which could trigger a deep recession. For example, with the Nord Stream pipeline shut for maintenance, we may see planned outages for chemicals manufacturers and production facilities. Plus, there is an increasing risk that Europe will experience a winter without gas.

The fundamental picture for credit remains robust for now, with default rates expected to remain low. However, we would expect earnings guidance to be revised lower and thus to see a meaningful margin contraction in the second half of this year, which will pressure corporate fundamentals. Consequently, we stay vigilant for risks that may arise, and in this uncertain environment we have been tilting the fund's investment-grade holdings into higher-quality, non-cyclical companies with strong liquidity and fundamentally robust corporate balance sheets. We think investors should remain nimble if, for example, bouts of increased volatility lead to greater idiosyncratic dispersions or inefficiencies across fixed income markets. As we navigate these uncertainties, we will continue to adhere to our research-driven investment process, with a focus on taking what we view as the right amount of risk throughout the cycle.

# Euro Corporate Bond Fund

## Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the iBoxx Euro Corporates Index by 1.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in investment grade corporate bonds and other types of investment grade bonds, denominated in Euros. The fund may invest up to 20% of its net assets in CoCos; and/or asset-backed and mortgage-backed securities.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the iBoxx Euro Corporates Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager seeks to provide a total return in excess of that generated by the benchmark over a market cycle by investing primarily in Euro denominated investment grade rated corporate bonds. The investment process combines asset allocation views with rigorous fundamentally driven security selection from the credit analysts. The fund promotes environmental and/or social characteristics, which include the application of Greenhouse Gas (GHG) intensity related criteria and support for the United Nations' Global Compact (UNGC) Principles.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%

\* The share class closed in the year.

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The fund is not subject to performance fees.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

# Euro High Yield Bond Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Tim Winstone and Tom Ross

The fund fell 16.0% (Net), 15.3% (Gross) based on Class H2 in Euro terms over the year under review, compared with a fall of 15.0% in the ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged) and a fall of 13.5% in the Target Index + 1.75%, Euro terms.

European high-yield bonds delivered a negative return during the reporting year, according to the ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged). Excess returns (versus equivalent government debt) were negative at -9.6%. Credit spreads widened during the year, undermined by increased investor risk aversion due to hawkish central banks and rising inflation rates.

High-yield credit spreads widened as central banks began monetary policy tightening cycles to curb inflation that hit multi-decade peaks in the US and UK and record levels in the Eurozone, prompting worries that rising interest rates might drive economies into recession. Inflation sped up in the latter months of the year as Russia's invasion of Ukraine interrupted commodity supply, triggering sharply higher prices for a variety of raw materials. In June, the Fed announced its largest rate rise in almost three decades and the Bank of England's key rate touched a 13-year high, while the relatively dovish European Central Bank confirmed plans to raise borrowing costs in July. The pandemic receded as a concern among financial markets, aside from the emergence of the Omicron variant of COVID-19 near the end of 2021 and related lockdowns across China.

This backdrop was unfavourable for yields on core government bonds, which increased sharply. The yield on benchmark 10-year UK gilts rose by 151 basis points (bps) to 2.23%, while yields on equivalent US Treasuries gained 154bps to 3.01% and German bunds were up 154bps to 1.34%.

The reporting year saw rating decompression, with CCC rated issues underperforming, followed by BB rated ones and then B rated ones.

The fund generated a negative return during the year and lagged the benchmark, which also fell. At a rating level, an overweight exposure to B and below rated credit and underweight allocation to BB rated issues detracted. However, security selection made the largest negative contribution, especially in cyclical segments such as real estate, basic industry and automotive.

An overweight exposure to European real estate detracted from returns, as did positioning within the sector, such as overweight allocations to hybrid bonds from CPI Property and Heimstaden Bostad.

Security selection within energy, leisure and retail, however, contributed to relative returns. Within energy, a full underweight exposure to Russian gas company Gazprom was beneficial to relative returns, as the company suffered amid the outbreak of conflict in Ukraine and the sanctions that Western countries imposed on Russia. Meanwhile, an overweight exposure to EnQuest – no longer held – also aided performance.

The fund remains positioned with a flat risk stance versus the benchmark, which reflects our view that excess returns for the asset class are likely to be close to flat during the second half of 2022, with further spread widening. The main risks driving this view are higher and/or 'stickier' inflation, particularly in core components, further energy disruption risks impacting Europe in particular and weaker global economic data.

We acknowledge that valuations have improved further, given the widening of spreads, although we do not believe they have moved meaningfully wide enough to warrant becoming more positive. That said, sector and issuer dispersion levels have increased, which has created more alpha generating opportunities.

From a market dynamic perspective, demand for yield remains relatively constructive, particularly within the institutional community, while net supply expectations are manageable. Corporate fundamentals are also healthy, which should provide a buffer to absorb a further mild growth slowdown.

We intend to reduce the fund's beta risk marginally, although it will remain close to flat. We remain vigilant for risks that may arise and continue to utilise our active and flexible approach to exploit idiosyncratic dispersions or inefficiencies across credit markets. As we navigate these uncertainties, we will adhere to our research-driven investment process, with a focus on taking the right amount of risk throughout the cycle.

# Euro High Yield Bond Fund

## Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 70% of its assets in high yield (non-investment grade, equivalent to BB+ rated or lower) corporate bonds, denominated in Euros or Sterling. The fund may invest up to 20% of its net assets in CoCos; and/or asset-backed and mortgage-backed securities.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged), which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to provide a high overall yield and potential for capital growth by investing primarily in Euro and Sterling denominated sub investment grade rated corporate bonds. The investment process combines rigorous fundamentally driven security selection from the credit analysts, which is expected to be the largest driver of performance, with asset allocation views. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria and support for the UNGC Principles.

# Global High Yield Bond Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Seth Meyer, Tom Ross, Tim Winstone and Brent Olson

The fund fell 17.2% (Net), 16.5% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 15.0% in the ICE BofAML Global High Yield Constrained Index (100% Hedged) and a fall of 13.5% in the Target Index + 1.75%, US Dollar terms.

Global high-yield bonds recorded a negative return during the reporting year, according to the ICE BofAML Global High Yield Constrained Index (hedged to US Dollars). This largely reflected negative excess returns (versus sovereign issues), driven by a widening of credit spreads. On an excess return basis, US high yield outperformed, followed by Europe and then emerging markets.

High-yield credit spreads widened as central banks began monetary policy tightening cycles to curb inflation that hit multi-decade peaks in the US and UK and record levels in the Eurozone, prompting worries that rising interest rates might drive economies into recession. Inflation sped up in the latter months of the reporting year as Russia's invasion of Ukraine interrupted commodity supply, triggering sharply higher prices for a variety of raw materials. In June, the Fed announced its largest rate rise in almost three decades and the Bank of England's key rate touched a 13-year high, while the relatively dovish European Central Bank confirmed plans to raise borrowing costs in July. The pandemic receded as a concern among financial markets, aside from the emergence of the Omicron variant of COVID-19 near the end of 2021 and related lockdowns across China.

This backdrop was unfavourable for yields on core government bonds, which increased sharply. The yield on benchmark 10-year UK gilts rose by 151 basis points (bps) to 2.23%, while yields on equivalent US Treasuries gained 154bps to 3.01% and German bunds were up by 154bps to 1.34%.

The reporting year saw rating decompression, with CCC rated issues underperforming, followed by B rated ones and then BB rated ones.

At the sector level, an above-benchmark allocation to Chinese real estate was unhelpful, given that the sector was significantly impacted by ongoing negative news and weak investor sentiment. Within the sector, overweight holdings in China Aoyuan, Kaisa and China SCE were the main detractors. We reduced the fund's positions in some of these names and the sector as a whole during the year, moving from a small overweight holding in the third quarter to an underweight position in the fourth quarter. We continued to hold this underweight risk stance to Chinese real estate companies, Chinese risk overall and emerging markets.

An overweight allocation to European property names was another headwind for returns as investor sentiment towards the sector was weak. In terms of individual issuers, overweight positions in hybrid bonds from CPI Property and Heimstaden Bostad were key detractors.

Security selection overall detracted from relative returns. While the fund held no direct exposure to Russia, it had a small overweight position in Ukrainian iron ore company Metinvest, which suffered in February and March with the geopolitical tensions. This position was exited in March, due to the continuing uncertainty about potential sanctions and increased risk that liquidity in the name might diminish.

At the other end, returns benefited from underweight holdings in Russian names affected by Western sanctions imposed following the Ukraine invasion, including energy firm Gazprom, telecommunications business VEON and leasing company GTLK. Given concerns about the outlook for China's property sector, the below-benchmark allocations to indebted developers China Evergrande and Kaisa were supportive.

The fund remains positioned with a flat risk stance versus the benchmark, which reflects our view that excess returns for the global high yield bond market are likely to be close to flat during the second half of 2022, with further spread widening. The main risks driving this view are higher and/or 'stickier' inflation, particularly in core components, further energy disruption risks and weaker global economic data.

On a regional basis, the fund continues to hold an overweight risk stance to the US, flat risk to small underweight exposure to Europe (on a net exposure basis) and an underweight risk position in emerging markets and others.

We acknowledge that valuations have improved further, given the widening of spreads, although we do not believe they have moved meaningfully wide enough to warrant becoming more positive. That said, sector and issuer dispersion levels have increased, which has created more alpha-generating opportunities.

From a market dynamic perspective, demand for yield remains relatively constructive, particularly within the institutional community, while net supply expectations are manageable. Corporate fundamentals are also healthy, which should provide a buffer to absorb a further mild growth slowdown.

We intend to reduce the fund's beta risk marginally, although it will remain close to flat. We remain vigilant for risks that may arise and continue to utilise our active and flexible approach to exploit idiosyncratic dispersions or inefficiencies across credit markets. As we navigate these uncertainties, we will adhere to our research-driven investment process, with a focus on taking the right amount of risk throughout the cycle.

Please note that as of 1 September 2021, Tim Winstone and Brent Olson also manage the fund.

# Global High Yield Bond Fund

## Investment objective and policy

The fund aims to provide an income with the potential for capital growth over the long term.

Performance target: To outperform the ICE BofAML Global High Yield Constrained Index (100% Hedged) by 1.75% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in high yield (non-investment grade, equivalent to BB+ rated or lower) corporate bonds, in any country. The fund may invest up to 20% of its net assets in CoCos; and/or asset-backed and mortgage-backed securities.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the ICE BofAML Global High Yield Constrained Index (100% Hedged), which is broadly representative of the bonds in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to provide a high overall yield and potential for capital growth by investing primarily in sub investment grade rated corporate bonds across global high yield markets. The investment process combines rigorous fundamentally driven security selection from the credit analysts, which is expected to be the largest driver of performance, with asset allocation views at the fund and regional levels.

## Performance history (unaudited)

# Strategic Bond Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Jenna Barnard and John Pattullo

The fund fell 12.7% (Net) based on Class H2 in US Dollar terms over the year under review.

The year under review splits almost perfectly by calendar year: the first half was characterised by late-cycle complacency, speculation and euphoria, tight credit spreads, suppressed volatility and record equity markets – the Nasdaq Composite Index peaked in late November while the S&P 500 Index peaked in early January 2022. All of this changed in late December as the Fed started signalling concerns about both the persistence of inflation and the very tight labour markets. In hindsight, a US\$9trn fiscal and monetary stimulus was too much, too fast for an economy grappling with the post-COVID-19 recovery. The strength of the labour market has been a surprise to many – half a million fewer people are working in the US than before the pandemic (the so-called 'great resignation'). These excess demand problems were compounded by the continuation of quantitative easing until March 2022.

The strength of inflation has been caused not only by the well-documented bottlenecks in the global supply chain, but further compounded, again, by the conflict in Ukraine. This has extended and heightened energy prices, which feed straight into headline inflation. The Fed had a late panic and discussed plans to end quantitative easing and raise interest rates. The problem, however, was that it was well behind the curve, meaning the window for raising rates in an already slowing economy was limited, which led to 'front-end loading' and an increasingly aggressive magnitude of rate hikes. This has significantly strengthened the US Dollar, flattened the US Treasury yield curve, and induced much volatility and capital losses into all bond markets. During the reporting year, sovereign bonds, and investment grade and high yield corporate bonds all fell by about 9-13%, with the second half being the worst on record for many asset classes. Only cash, the US Dollar and energy performed well. Credit spreads took a while to widen as the initial shock was via the rates market, which then spread to tightening liquidity and, hence, activity. A recession now seems unavoidable, in our opinion.

The significant capital losses were all during the second half of the reporting year, whereas the first half was relatively flat and late in the cycle. As we said last year, we avoided running too much high beta credit into a late-cycle environment and have reduced credit exposure since the COVID-19 snap-back rally. This has been a gradual and managed process. We accelerated our selling of high yield bonds in the spring, as it became evident that data showing an economic slowdown was even worse than our models predicted. The fund's sovereign bond exposure has increased, gradually replacing the shrinking credit book, and we are pleased about how we have pragmatically thinned the credit book over time. At year end, we had a record low high yield exposure and 'lowish' investment grade weighting, with the majority of the interest rate risk coming from sovereign bonds and interest rate futures. This is exactly what a strategic bond fund should be doing regarding asset allocation.

Unfortunately, our duration management detracted from the relatively favourable positioning in credit. We came into 2022 with record low duration of just over three years, which was implemented via interest rate future shorts. We closed this short position and built a long position on interest rate risk too early, and were caught out by the extraordinary and increasingly hawkish Fed and the Ukraine conflict. We did not, in effect, have any credit issues during the reporting year and we remained very light on credit versus the peer group. The fund's credit books remained heavily invested in US and global large-cap, non-cyclical, 'reason-to-exist' companies. We were too early to add sovereign duration, although we kept this position. In June, we further added sovereign duration following another bond volatility and liquidity shock.

We find the increased pace of monetary tightening alarming. We are witnessing demand destruction in many sectors and geographies around the world. Recessions destroy inflation – time will tell as to the extent of collateral damage done along the way. Arguably, a number of Western economies are already in recession. We feel it is only a question of time before something breaks. Consequently, we feel fairly well positioned holding significant sovereign exposure with a modest credit book. 'Boom-and-bust' economics is back. We expect shorter and more violent economic cycles going forward. Markets are already pricing rate cuts into next year.

Please note that as of 8 September 2021 Rebecca Young no longer manages this fund.

# Strategic Bond Fund

## Investment objective and policy

The fund aims to provide a return, from a combination of income and capital growth, over the long term (5 years or more).

The fund invests in bonds of any quality, including high yield (non-investment grade) bonds, asset-backed and mortgage-backed securities and distressed debt, issued by governments, companies or any other type of issuer, in any country.

Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Investment Manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed without reference to a benchmark. The Investment Manager has complete freedom to choose individual investments for the fund and to vary allocations between different types of bonds.

## Strategy

The Investment Manager follows a flexible strategy that seeks to deliver total returns (capital appreciation and income) from investments across the entire spectrum of fixed income assets. Using careful macroeconomic research and credit analysis, the portfolio managers actively vary the allocation to different types of bonds to suit the prevailing economic environment. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria, political rights and civil liberties, and support for the UNGC Principles.

# Total Return Bond Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Andrew Mulliner and Helen Anthony

The fund fell 10.4% (Net), 9.7% (Gross) based on Class H2 in Euro terms over the year under review, compared with a fall of 0.6% in the €STR and a return of 1.9% in the Target Index + 2.5%, Euro terms.

Supply bottlenecks caused by economies reopening from COVID-19 lockdowns drove inflation higher, causing many central banks to pivot sharply to tightening monetary policy. Russia's invasion of Ukraine in February 2022 further fuelled inflationary pressures that contributed to the Consumer Price Index setting 40-year highs in the US and a record high in the Eurozone. The Fed raised interest rates by 25 basis points (bps) in March, 50bps in May and, in its biggest move in almost three decades, 75bps in June. The European Central Bank suggested it would start raising rates in July, and that eight years of negative rates might end in September. The Bank of England (BoE) hiked rates five meetings in a row. Benchmark 10-year government bond yields in the US and Germany rose by 157bps and 170bps, respectively. Credit spreads widened during the reporting year, with fears about the Omicron variant of COVID-19 causing a sell-off in late 2021, while investor concerns about downside economic risks (notably, rampant inflation and recession) and risk aversion grew during the second half of the year. The year ended with inflation remaining uncomfortably high for policy makers and markets increasingly concerned that aggressive monetary policy tightening might trigger recession.

In the first half of the year, performance benefited from an allocation to higher-yielding credit markets and active management of interest rate duration. During the summer, tactical additions to eurozone duration exposure benefited performance as government bond yields moved lower. We subsequently reduced overall duration exposure by positioning for yields to rise in the UK, Sweden and Germany. This proved additive as yields started to climb in late 2021 in the face of rising inflation rates and growing expectations of central bank policy tightening. Government bond duration remained at the lower end of the range into the end of the year. Inflation positions hurt performance in the third quarter, where the fund was positioned for UK breakeven inflation pricing to fall from elevated levels. The position was subsequently closed.

Exposure to issuers in China's corporate sector weighed on relative performance for much of the year, as concerns about developer China Evergrande spilled over into the broader sector, despite some soft support from the Chinese authorities. Credit spreads moved sharply wider as the conflict in Ukraine escalated and equity markets fell.

The second half of the year was hostile for fixed income market returns, with rates moving higher and credit spreads widening. This resulted in poor returns across the fixed income spectrum.

The main detractor from performance was credit exposure, in particular to high-yield and emerging market corporate bond issuers, given weak sentiment amid aggressive central bank tightening, steeply rising oil prices and growing fears of recession. However, despite weak returns generally in emerging credit markets, the fund's positions in government bonds in China and Indonesia were relative outperformers.

Within developed rates markets, exposure to Switzerland detracted as the market priced in a more aggressive path of interest rate hikes. The Swiss National Bank raised interest rates by 50bps in June, although our conviction remained that we did not expect the aggressive rate hiking profile that was priced in the market to be delivered. The holding detracted from performance, and we reduced the position size, although we continued to own outright and paired against the Eurozone. Yield curve positions made gains in Japan, where we expected the yield curve to steepen, although they made losses in the Eurozone, where the fund was positioned for the yield curve to flatten. We continued to own a position in the UK expecting front-end rates to outperform relative to intermediate maturities, as we anticipated that downside risks to growth would require the BoE to temper its rate hikes. This detracted from performance during the year.

We maintained the fund's asset-backed security/mortgage-backed security exposure at the top end of the range, which was beneficial as total returns were more resilient. We also reduced emerging market credit, where we expected recession concerns and a stronger US Dollar to be challenging for the asset class.

The market narrative has moved quickly from inflation concerns to recession worries. While recessionary risks have risen (particularly in Europe), we believe that we are still late in the cycle and that credit spreads have already moved significantly wider to reflect these risks in investment grade (less so in high-yield debt). With higher total returns available due to the combination of higher rates and wider spreads, we expect greater resilience from higher-quality investment-grade assets in developed markets. Despite encouraging signs of a peak in core inflation in the US, we expect headline inflation to remain 'sticky' over the summer and the bar for central banks to deviate from rate hikes to be high. For now, we continue to manage the fund's government bond duration tactically, although over the medium term, we see more scope to potentially add government duration.

# Total Return Bond Fund

## Investment objective and policy

The fund aims to provide income and capital growth, exceeding that of cash, over a rolling 3-year period.

Performance target: To outperform the €STR by at least 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests in bonds of any quality, including high yield (non-investment grade) bonds and distressed debt, of governments, companies or any other type of issuer in any country. The fund may invest up to 30% of its assets in asset-backed and mortgage-backed securities (ABS/MBS), including up to 10% of which may be high yield (non-investment grade, equivalent to BB+ rated or lower). The fund may invest up to 20% of its assets in China onshore bonds traded through Bond Connect.

Where investments are made in assets in currencies other than the base currency of the fund, the fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The fund makes extensive use of derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the €STR, as this forms the basis of the fund's performance target. For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison. The Investment Manager has complete discretion to choose investments for the fund and is not constrained by a benchmark.

## Strategy

The Investment Manager follows a highly flexible, 'go anywhere' approach to investing in bonds globally, without restrictions of a benchmark. The disciplined investment process considers the relative risks and potential returns from a wide variety of bond assets while seeking to maintain a moderate level of volatility.

## Performance history (unaudited)

# Asian Dividend Income Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Michael Kerley and Sat Duhra

The fund fell 17.3% (Net) based on Class H2 US Dollar terms over the year under review, compared with a fall of 10.5% in the MSCI AC Asia Pacific ex Japan High Dividend Yield Index, US Dollar terms.

The Asia-Pacific region endured a number of challenges during the reporting year. Economic activity stalled following the spread of COVID-19 and sentiment towards China turned negative. In addition, uncertainty about the nature of increasing inflation rates and the path of interest rate rises created further volatility, with rising bond yields and a more hawkish stance from the Fed. Given this backdrop, the benchmark MSCI AC Asia Pacific ex Japan High Dividend Yield Index fared better than the broader MSCI Asia Pacific ex Japan Index, as value stocks rebounded while growth stocks were out of favour as earnings expectations fell. Markets were also impacted by the spread of the Omicron variant of COVID-19, rising oil prices and elevated inflation readings. This was followed by the conflict in Ukraine and further upward pressure on inflation.

The final quarter of the reporting year brought further challenges, and the index fell sharply on elevated fears of a stagflationary environment as the Fed hiked rates by 50 basis points (bps) in May. It followed with a 75bps rise in June, as inflation continued to remain unfavourable. Earnings continued to be downgraded because of a more difficult scenario for consumers as household costs escalated. However, China saw a rebound in the final quarter, following a challenging period in which sentiment had suffered because of a regulatory clampdown in numerous sectors. This was followed by elevated credit risks as Evergrande, a property group in China, struggled under the weight of its high leverage. China then suffered a further blow as a resurgence in COVID-19 cases led to lockdowns. Cases decreased in the final quarter, followed by a number of support measures that included a 15bps cut in the five-year loan prime rate (a key mortgage benchmark) and tax rebates.

Indonesia bucked the trend with a strong performance, reflecting a much improved COVID-19 outlook and a rapidly improving macroeconomic outlook as a beneficiary of high commodity prices. By sector, energy was the standout performer following strong gains in oil prices, a better outlook for demand and undemanding valuations for the sector. The communication services sectors performed well, given its defensive qualities in a period of elevated market volatility as investors sought out safe havens. In an environment of lower growth expectations, the information technology sector was the weakest as demand expectations were significantly lowered. This, in turn, impacted markets dominated by large technology constituents, namely Taiwan and South Korea, which were the weakest performers during the year.

The main detractor during the year was China, with the slump in consumption trends and economic data impacting the likes of Chinasoft International, China Yongda Automobile Services, Topsports International and China National Building Material, which were some of the biggest detractors. Holdings in telecommunications companies were the key positives, as the likes of Telekomunikasi Indonesia Persero, HKT Trust & HKT, KT and Digital Telecommunications Infrastructure Fund were all top contributors, given their combination of defensive qualities and compelling growth from 5G penetration and fixed-line potential. These positions were funded by reducing the weighting in financial stocks, as expectations of rising rates were tempered by the increasing volatility and anticipation of lower corporate profitability.

We significantly reduced the position in China during the year with the disposal of two banks, given the increased regulatory and credit risks from a weakening property market. In addition, we sold Topsports International, because of rapidly deteriorating consumer trends in the sportswear sector, and Venustech, a Chinese cybersecurity specialist, given a weaker outlook and more compelling opportunities elsewhere. These transactions partly funded a significant increase in the allocation to Singapore, with the purchase of Singapore Telecommunications and United Overseas Bank. We expected both companies to benefit from the reopening of the economy. In addition, Singapore's banks have been key beneficiaries of rising interest rates, with a robust outlook for loan growth and dividends. In terms of other activity, we opened a position in Li Ning, a sportswear brand in China, following a sharp decline in the share price. The fall provided an entry point into a domestic China consumption business at what we saw as an attractive valuation.

During the year, the fund wrote three options to generate premium income and take advantage of periods of elevated volatility. At the end of the year, the three options had all expired.

The weaker consumer outlook from stubbornly high inflation will create some risk for corporate earnings and the possibility of more earnings downgrades in an already volatile environment, with investors facing the prospect of significantly higher interest rates and tighter liquidity from central banks. However, despite the global equity sell-off in recent months, Asian equity valuations continue to look attractive relative to global equities. Inflationary pressures also remain less pronounced in the region. We are more confident on the outlook for dividends, considering the excess cash being generated and the low level of dividends paid out compared with earnings. We remain focused on domestically orientated companies with strong cash flows and sustainable and growing dividends.

# Asian Dividend Income Fund

## Investment objective and policy

The fund aims to provide an income in excess of the income generated by the MSCI AC Asia Pacific ex Japan High Dividend Yield Index with the potential for capital growth over the long term (5 years or more).

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the Asia Pacific region (excluding Japan) and may include China A-Shares. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region.

The fund is actively managed with reference to the MSCI AC Asia Pacific ex Japan High Dividend Yield Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's income target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager aims to capture the income and capital growth potential of companies in Asia, one of the world's fastest-growing regions. The strategy looks to tap into the region's strong structural growth opportunities and the shift toward a more progressive dividend culture. The disciplined, value-driven investment process places an emphasis on dividend growth and high-yielding companies.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%
Asian Dividend Income Fund	H2 USD (Net)*	5.36**	5.86**	(11.80)**	24.36**	(17.26)
MSCI AC Asia Pacific ex Japan High Dividend Yield Index***		9.57***	3.28****	(10.73)	26.86	(10.49)

Class H2 USD is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 USD share class.

\*\*\* From 3 September 2018, the fund changed benchmark from the MSCI AC Asia ex Japan Index to the MSCI AC Asia Pacific ex Japan High Dividend Yield Index. Past performance before 3 September 2018 is shown for the previous fund benchmark.

\*\*\*\* Performance is a blend of the old and new benchmark.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Asian Growth Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Daniel J. Graña and Matthew Culley

The fund fell 27.4% (Net), 26.6% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 23.3% in the MSCI AC Asia Pacific ex Japan Index and a fall of 21.8% in the Target Index + 2%, US Dollar terms.

Global stocks experienced heightened volatility during the reporting year, as concerns about the pandemic, supply chain disruptions and soaring inflation raised risk premiums and increased economic uncertainty. The outlook for higher interest rates led to a rotation away from more growth-oriented stocks. It also fuelled fears of a potential recession in the US and other markets, with implications for global economic growth. Against this backdrop, there was a notable sell-off in risk-related assets, particularly in countries, industries and companies sensitive to slowing global demand.

During the year, management of the fund transitioned to Daniel Graña and Matthew Culley. The fund's relative performance was hindered by several investments in China, which faced economic headwinds due to renewed COVID-19 lockdowns and a liquidity crisis in the property sector. Regulatory uncertainty also pressured Chinese investments, given the heavy-handed and sometimes capricious approach of the country's regulators. Adding to this uncertainty, the US Securities and Exchange Commission targeted several US-listed Chinese companies with more rigorous auditing requirements under the 2020 US Holding Foreign Companies Accountable Act. This development, combined with heightened rhetoric around trade policy, led to a broad-based sell-off in Chinese equities, especially in the first quarter of 2022. Regulatory uncertainty and market volatility negatively impacted several of the fund's holdings, notably a legacy position in New Oriental Education & Technology. The adverse regulatory environment made it difficult for this private educational services company to make a profit or raise capital. We exited the position, as we believed the company's business was no longer viable. We also believed it was a poor fit for our investment process.

While the fund's exposure to China detracted from relative performance, we started to see some encouraging developments for the market by the end of the second quarter of 2022. In particular, there were indications that the Chinese government was starting to relax some of its regulatory scrutiny. We also believed the economic outlook for China had improved as major cities emerged from lockdowns and the government signalled it might take a more active role in stimulating economic growth through monetary and fiscal policies.

Outside of China, the less certain global economic environment pressured several holdings. These included Samsung Electronics, which makes consumer and industrial products such as semiconductors, personal computers and smartphones. The stock declined on concerns about slowing capital spending in the communication equipment market.

The fund's relative performance benefited from its investment in Indonesia's Bank Central Asia. This well-capitalised bank reported strong earnings performance, aided by a positive macroeconomic backdrop in Indonesia. The country benefited from higher commodity prices and shifting supply chain relationships, as corporations sought non-Russian sources of raw materials such as coal, palm oil, natural gas and crude oil. As commodity exports have surged, Indonesia moved to a current account surplus for the first time since 2010, leading to currency appreciation. In our view, Bank Central Asia was well positioned to benefit from this favourable economic backdrop, as well as strong domestic consumption and higher global interest rates.

Another contributor, Varun Beverages, which is a prominent bottler of Pepsi products, has expanded its footprint in India's soft drink market. Per-capita consumption of soft drinks in India is a fraction of what it is in other countries, and we took the view that the company was well placed in the market. Varun Beverages business trends slowed initially during the pandemic, as reduced mobility hurt soft drink sales. In response, the company took measures to encourage at-home consumption, and these steps helped support its revenue growth. As declining COVID-19 rates led to improved consumer mobility in the first quarter of 2022, on-the-go beverage sales started to rebound even as at-home consumption remained strong. Against this backdrop, Varun Beverages delivered strong financial results that supported its share price performance.

Equity markets may remain volatile in the near term, given the risks around inflation, higher interest rates and the potential for recession. We believe our disciplined investment approach can help us navigate this period, guided by our multi-lens approach that considers company fundamentals and governance as well as the macroeconomic and policy landscape. In keeping with this approach, we have welcomed recent developments in China, including signs of more accommodating regulatory policy. China is one of the few emerging market countries with the ability to conduct independent macroeconomic policy. While other central banks are tightening monetary and fiscal conditions, China appears to be going in the opposite direction with measures to stimulate growth. The country also appears to be moving beyond the worst effects of COVID-19, which could lead to improved logistics, supply chain conditions and consumer mobility. For these reasons, we have looked for opportunities to add to the fund's exposure to China, where stock valuations appear attractive, both relative to history and to other emerging markets. Above all, we remain committed to seeking a combination of good companies, good governance and good countries. We believe this strategy may lead to favourable investment outcomes over the longer term.

There have been changes to the Investment Fund Managers during the year under review. From 1 March 2022 Daniel J Graña and Matthew Cully co manage this fund.

# Asian Growth Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI AC Asia Pacific ex Japan Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the Asia Pacific region (including the Indian subcontinent and Australasia, but excluding Japan). Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The fund may invest up to 20% of its assets in China A-Shares.

The fund is actively managed with reference to the MSCI AC Asia Pacific ex Japan Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to identify quality companies and capture growth in the dynamic and fast-growing Asia Pacific region through different market conditions. The investment process is driven by stock selection, based on in-depth research, resulting in a high-conviction portfolio.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Manager

Nick Sheridan

The fund fell 13.7% (Net) based on Class H2 in Euro terms over the year under review, compared with a fall of 13.8% in the MSCI EMU Net Return EUR Index, Euro terms.

The pandemic remained a permanent feature during the reporting year, although in the second half of 2021, life was beginning to normalise in developed countries as vaccination rates accelerated. Mid-2021 saw a continuation of the previous year's trend as 'glamour/growth' stocks (those with a good story to tell but little else and/or those on outrageous multiples relative to their likely returns) continued to perform strongly. This was surprising given that this did not come from better underlying returns (which would be healthy), but rather from revaluation upwards. During this period, value stocks as an asset class saw their returns improve relative to glamour/growth, although they de-rated. Markets can and do often defy logic for a time.

However, towards the end of the September 2021 things began to change when the Fed indicated that liquidity might begin to be drained from the financial system and that US interest rates could rise towards the end of 2022. Low interest rates and easy credit are generally seen as supportive of markets, and high interest rates and restrictive credit are not. Rising interest rates are also perceived to hurt long duration assets (glamour/growth stocks) as they increase the discount rate and lower the value of future returns. Consequently, we began to see a reversal in market leadership away from growth and towards value.

October 2021 was probably the month in which investors began to think that 'transitory' inflation might be something else. Inflation expectations globally had been rising as economies recovered and bottlenecks/shortages, among other things, had developed, not least in silicon chips. None of this was helped by China's 'zero COVID-19' policy. By November, the inflation cat jumped firmly out of the bag as Fed Chairman Jerome Powell decided that he had misspoken when calling inflation transitory. Apparently, market participants had misunderstood the length of time that transitory implied. Better wording was required. November also saw the appearance of a new COVID-19 variant called Omicron, which further delayed the global economic reopening.

The start of a new year, as always, was a reason for much debate and prediction about the year ahead. This always seems rather pointless as a new year is, after all, man-made and trends both economic and political rarely change overnight. This year, however, saw markets change rapidly as investors seemed to have accepted the potential for inflation rates to be problematic. Growth stocks, which for so long had benefited from low rates and high liquidity, sold off as value stocks came to the fore. As ever when markets move quickly, high leverage magnified these moves. In value, cheap and low quality were the order of the day. On the one hand, the fund benefited from investors paying attention to value stocks, although on the other, excessive leverage is something we try and avoid.

February saw Russia invade Ukraine. Fortunately, such events are rare, although the implications for markets were profound as the European peace dividend disappeared, inflation moved higher, energy independence became more important and supply chains for both goods and food inevitably came under more pressure. European defence budgets also began to rise. The response to the invasion has been economic sanctions by the West against Russia. While Russia only accounts for around 3% of global GDP, China (which seems to be supportive of Russia) accounts for 18% and as such any decoupling of China from global trade would have severe consequences for all.

In March, in response to rising inflation levels, the Fed started moving interest rates higher. Following this, investor uncertainty coalesced into an air of certainty that global recession would be caused by central banks raising rates too high, too quickly. Investors are anticipating that the future direction of corporate operating margins will be down and stocks have fallen. With producer price inflation in Europe running hot, it seems likely that either consumer price inflation moves higher, or margins get squeezed. Little wonder then that investor sentiment, as measured by the Bank of America Fund Manager Survey, was so low, with a record 72% (net) of participants (May data) expecting global growth to slow. The good news, over the longer term, surveys such as this tend to be a contrarian indicator.

The European Central Bank (ECB) announced in June that its asset purchases would conclude at the end of the same month, committed to a 25 basis point (bps) interest rate rise at its next meeting and indicated that we should expect a further 50bps increase in September, subject to the proviso of inflationary pressure not abating sooner rather than later. Given the ECB is behind the Fed in its reactions to inflation, this seems unlikely. Eurozone uncertainty and Euro weakness resulted as yield spreads across the region moved to reflect the financial strength of individual countries.

Against this background, turnover in the fund was low, and although we made some changes, the majority of our activity was adjusting weightings within existing holdings. Examples of positions introduced include OCI (a low-cost manufacturer of fertiliser), Kering (a luxury goods provider) and Bekaert (a provider of steel wire transformation and coatings technologies).

# Euroland Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI EMU Net Return EUR Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in shares (equities) and equity-related securities of companies, of any size, in any industry, in the Eurozone. Companies will be incorporated in or having their principal business activities in the Eurozone.

The fund is actively managed with reference to the MSCI EMU Net Return EUR Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager follows a disciplined investment process that sets aside sentiment in order to benefit from market mispricing. The investment process combines 'bottom-up' (company-level) analysis with a qualitative overview that helps the team to control risk while seeking to maximise performance. The process seeks to construct a portfolio of companies with established track records that are priced at a level that does not reflect their intrinsic value or future prospects.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%
Euroland Fund	H2 EUR (Net)*	(0.53)**	(0.38)**	(4.17)**	32.04**	(13.72)
MSCI EMU Net Return EUR Index		3.30	2.04	(5.55)	30.21	(13.82)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 EUR share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# European Growth Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Simon Rowe and Marc Scharzt

The fund fell 7.9% (Net) based on Class H2 Euro terms over the year under review, compared with a fall of 10.3% in the FTSE World Europe ex UK Index, Euro terms.

The year to the end of June 2022 was disappointing for equities. After strong post-COVID-19 performance in the first half of 2021, equity markets then ran out of steam because of concerns about lagging economic growth and rising inflation rates. Central banks were slow to realise the risks from inflation, and the prospect of higher interest rates and the likely withdrawal of central bank stimulus drove a sell-off of higher-valued growth stocks and technology shares, with a rotation into value stocks including automotive and banks. The situation deteriorated further at the end of February with the Russian invasion of Ukraine. Oil and gas prices, which had already been rising on tight supply, surged to new levels because of the risk that Russia would use its position as an energy supplier in the conflict. Markets sold off on the risks of yet higher input costs, potential supply chain disruption, defaults on Russian debt and derivatives. The energy crisis reinforced the inflationary situation and central banks increased rates faster than expected, with their desire to control inflation taking priority over risks of recession. Lastly, the prospect of rising interest rates in Europe reignited concerns about debt sustainability in Italy, with spreads over German debt widening significantly.

The fund benefited from its lower exposure to highly valued growth companies, especially technology stocks and riskier financial companies. It also benefited from an underweight exposure to consumer stocks and our decision to reduce exposure to industrials. More obviously, it benefited from a holding in German defence group Rheinmetall, which we had continued to hold in 2020 and 2021 when perception of the stock had suffered from a poor ESG profile. We took the view that defence and security were important preconditions for social and economic activities and that the negative ESG view was incorrect. Rheinmetall rose sharply in February and ended with an overall gain of 161% over the reporting year, in response to the new security situation and rapid increases in defence spending. The fund's larger position in MTU Aero Engines, also with some defence exposure, was another strong performer. Other notable contributors included defensive growth plays such as RELX, where growth picked up. Some of the fund's holdings were beneficiaries of higher interest rates, such as insurers ASR Nederland and Sampo. Concessions group Getlink was so strong we took profits. Other good performers included fish farmer Salmar and support services group SPIE. These contributions were offset by Worldline, which slipped on concerns about competition and debt. KION was very weak, as it was hit by higher input costs and supply chain problems on top of recessionary fears. We sold the position in French care home operator Korian after its key competitor was engulfed in scandal. French computer games studio Ubisoft Entertainment was weak despite it being identified as bid target. The fund ran a near benchmark equivalent weighting in energy, principally through a holding in TotalEnergies, which rose sharply on higher energy prices.

In terms of changes, prior to Russia's invasion of Ukraine we had taken profits in a number of good performers such as Smurfit Kappa, Moncler, DiaSorin and Infineon Technologies. As the economic outlook darkened, we sold Autoliv, Volvo and DCC. Despite the challenging environment, we bought new holdings in Solvay and Hugo Boss, as both underwent turnarounds by new management teams. We also took advantage of the sell-off of growth stocks with selective purchases such as chemical distributor Azelis, which has been helped by supply chain dislocation and inflation. We also purchased Edenred, as it was well placed to benefit from an inflationary environment. Reflecting on the urgent need for energy security, we also bought smaller positions in Burckhardt Compression, Meyer Burger and Vestas Wind Systems.

In the face of widespread investor gloom, equities staged a sharp rally in July, driven by the idea that central banks would have to scale down or scale back interest rate increases because of the weaker economy. This drove a rotation back into growth stocks and technology companies: the Nasdaq Composite Index rose more than 12% in July, for example. Ten-year bond yields, having risen sharply in the first half of 2022 with expectations of rising interest rates, have tumbled – even spreads on Italian debt have retreated, despite political turmoil. Some commodities – metals, oil and some soft commodities – have fallen back significantly, although it may be too soon to assume a swift fall in inflation rates (and therefore a more benign interest rate scenario). There still is significant upward pressure on wage rates, reflecting the squeezed consumer, and the Ukraine conflict remains unresolved. This situation seems more like a pause than a strong upward signal for equities. We have not added significant cyclical exposure outside some selected positions in semiconductor equipment.

# European Growth Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe ex UK Index, after the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, in any industry, in Europe (excluding UK). Companies will be located, listed or do most of their business in this region. The fund will normally have a strong bias towards medium sized companies.

The fund is actively managed with reference to the FTSE World Europe ex UK Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to identify companies with hidden quality by focusing on company profitability and the efficiency with which capital is used. The fund will have a bias to medium sized companies as these often have attractive niches, potential to grow, or could be potential takeover targets in the future. The Investment Manager takes a long term view, looking beyond short term data, while the risk management process focuses on identifying risks specific to the companies and industries in which the fund may be exposed rather than in relation to the wider market.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18 %	1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %
European Growth Fund	H2 EUR (Net)*	0.31**	0.91**	(2.05)**	27.65**	(7.91)
FTSE World Europe ex UK Index		1.79	6.67	(1.02)	30.07	(10.33)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 EUR share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Manager

Junichi Inoue

The fund fell 19.9% (Net), 18.9% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 19.8% in the Tokyo SE First Section Index (TOPIX) and a fall of 18.2% in the Target Index + 2% .

The reporting year was an unusual one. During the first half, global equities advanced strongly as monetary policy remained accommodative, while the global economy was stronger than expected. Supported by earnings upgrades, cyclical sectors performed very well. Market sentiment gradually changed towards the end of the fourth quarter of 2021, as the US Consumer Price Index started accelerating. During the latter half of the reporting year, high inflation risks, fuelled by Russia's invasion of Ukraine, became real. Equity markets dropped sharply from the beginning of 2022, as the Fed priority shifted from supporting economy to containing inflation. The Fed raised interest rates by 0.50% in May before surprising the market with a 0.75% hike in June. US interest rates are expected to exceed 3.25% by the end of 2022, significantly higher than anticipated at the beginning of this year.

In Japan, although the dynamics were similar to that of the global market, shares were resilient in local currency terms, as the TOPIX Total Return Index dropped by just 1.4%. However, the return in US Dollar terms was -19.8%, as the value of Japanese Yen dropped sharply – by 18% – against the US Dollar, given the divergence of monetary policy in the two markets.

We were consistent with our investment approach and focused on cash-generative companies that can create shareholder value over time. Our discipline on valuation and the investment style paid good dividends in terms of three-year performance, with the fund's returns above those of the benchmark.

The fund performed positively during the first half of the reporting year. As the economic cycle matured, the market focused on stock-picking opportunities as opposed to top-down decisions. During the second half, however, the market became risk averse as inflation accelerated, and top-down decisions, such as selling high multiple or cyclical stocks, dominated activity. As we allocate a large portion of risk to stock selection, it was not an ideal situation for the fund.

At the stock level, the fund's long-term holdings, such as Tokio Marine, Daiichi Sankyo and Mitsubishi, made significant contributions. In contrast, SoftBank, Nintendo and Otsuka detracted the most. In terms of trading activity, we sold the position in Nomura Research Institute as its value had been fully realized. We also sold SoftBank, as there were no signs that governance would improve. New positions in Ebara and Lixil were built during the year. These two companies had significantly improved governance in recent years, which had resulted in much better capital allocations. A pullback in the share prices, on the back of short-term earnings concerns, created good entry points. Although input price hikes have been negative for corporate earnings in general, they presented favourable opportunities for companies to exercise their pricing power, which should eventually improve margins over the cycle.

The longevity of the conflict in Ukraine, and its wider implications geopolitically, remains unclear. The market's risk appetite could remain low until the impact of renewed inflationary pressures on global economic growth becomes clearer. We think the market could remain volatile in the short term without higher visibility. At the time of writing, valuations were at very attractive levels, while the price-to-earnings ratio was 13.6 times (fiscal year to March 2023). Meanwhile, a yield of 2.5% has served as downside protection in local currency terms.

We have been consistent with our approach. We focus on companies that we think can create shareholder value by delivering excess free-cash-flow returns over the cost of capital. We think this approach, of focusing on the fundamental strength of companies, could work better in the difficult economic environment. In the first half of 2022, however, the market was driven by a fear of inflation and recession, and stock-level opportunities were largely ignored. Rather than tilting the fund to mitigate macro risk, we will take advantage of the market to pick stocks that we consider to be undervalued relative to their intrinsic value. We have strong confidence in the stocks that we own and will continue to focus on stock picking, which we expect to be a key determinant of the fund's future performance.

# Japan Opportunities Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the Tokyo SE First Section Index by 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in Japan.

The fund is actively managed with reference to the Tokyo SE First Section Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to achieve long-term capital appreciation by investing in undervalued, cash-generative and capital-efficient businesses, which can create value for investors. The focus is on stock selection, which is a result of rigorous, fundamental research and a strict valuation discipline, and incorporates strong risk management. The fund is a diversified portfolio of companies across a variety of sectors, which the Investment Manager believes has the potential to perform well over time.

## Performance history (unaudited)

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The TER includes performance fees as at 30 June 2022.

The amounts earned in relation to performance fees for the year are shown in note 6 to the financial statements.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

# Pan European Equity Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Manager

James Ross

The fund fell 18.1% (Net) based on Class H2 in Euro terms over the year under review, compared with a fall of 6.7% in the FTSE World Europe Index, Euro terms.

Equity markets performed negatively during the reporting year. Markets were relatively steady during the first half, although the second half was much more difficult, given the onset of the conflict in Ukraine and growing concerns about inflation, interest rate increases and emerging evidence of economic weakness. Value dramatically outperformed growth as a factor, although this was unsurprising given the rise in inflation expectations during the year.

For a quality-growth-focused mandate, this was a difficult environment for performance and the fund's returns lagged that of the benchmark. The fund's underperformance during the first half was largely driven by three factors: its exposure to gaming, online-focused companies that had done very well amid the height of the COVID-19-related restrictions, and companies disrupted by supply chain issues.

The fund's gaming exposure was concentrated in three positions: Stillfront, Embracer and Prosus (via its large stake in Tencent). During 2021, the industry suffered from two main things. Firstly, there was a tightening of China's regulatory scrutiny of the sector, which impacted Chinese gaming companies directly and indirectly impacted gaming companies focused on other regions. Secondly, the gaming industry, having experienced very strong growth in 2020, suffered from a slowdown in operational momentum in 2021, partly caused by significant changes in the advertising model at Apple. We reduced the fund's exposure materially during the year, leaving it with just one small position in Prosus.

Companies such as Delivery Hero (a delivery platform), and Worldline and Nexi (payment infrastructure) were very weak performers during the year. There were some industry-specific issues with the payment companies (growing competition from high-tech competitors). However, there was also a wider issue at play: investors were focused on selling companies that were deemed to have been 'COVID-19 beneficiaries' while trying to get exposure to businesses deemed to have been 'COVID-19 losers', which negatively impacted the fund's holdings in this area. Delivery Hero was notable for delivering revenue upgrades throughout 2021 (which highlighted strong operational momentum), although its share price still materially underperformed (highlighting a significant valuation derating).

Supply chain disruption popped up in many different areas of the market. The fund was impacted via its holding in Adidas (which suffered disruption to its Asian supply chain), Grifols (which was unable to source blood plasma through its collection centres) and Faurecia (which suffered from the knock-on impact of a semiconductor shortages in the automotive sector).

During the second half of the year, the fund's underperformance was far more attributable to style factors, with quality growth significantly underperforming value. To illustrate this point, the MSCI Europe Growth Index declined by 20.7% during the first half of 2022, while MSCI Europe Value Index fell by only 6.0%. This created a very difficult environment for the fund's style bias.

During the reporting year, the biggest detractors included KION, Worldline and Allfunds, while the strongest contributors included Novo Nordisk, Koninklijke KPN and TotalEnergies.

In terms of trading activity, we reduced the fund's exposure to what we would call long-duration growth companies. These are companies where a significant portion of their equity valuation is based on the potential value of the business several years from now, rather than being predominantly based on the value of the current business. This included selling positions in Zur Rose, an online pharmacy business; Sinch, a communications-platform-as-a-service business; and the payment companies. These trades did not represent a move away from the fund's growth bias, rather they marked an increase in the quality of its growth exposure. In the second half of the reporting year, we looked to take advantage of the falling valuations of high-quality growth companies to initiate some positions. These included new holdings in Universal Music, a music content business; Sartorius, a biopharmaceutical equipment company; and Deutsche Boerse, a German exchange business.

We are confident in the fund's positioning and will continue to retain a balance in its exposures by considering two types of business for investment. These are companies where we see high and sustainable returns that are undervalued by the market and those where we can see a material improvement in the medium-term business prospects.

# Pan European Equity Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in the European Economic Area (EEA) or the UK. Companies will have their registered office in the EEA or the UK.

The fund is actively managed with reference to the FTSE World Europe Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager looks to invest in good quality large or mid-sized European companies capable of delivering a sustained or improving return on capital over the long term, with some tactical exposure to companies benefiting from a short-term market or stock-specific catalyst. The fund utilises a proprietary and adaptive screening tool based on fundamental research to deliver a comparable thesis for every stock under consideration, to help foster greater consistency and conviction in analysis and decision making. Smaller companies are not normally a significant focus of the portfolio. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria, good health and well-being and support for the UNGC Principles.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18 %	1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %

# Asia-Pacific Property Income Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Tim Gibson and Xin Yan Low

The fund fell 17.4% (Net) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 14.8% in the FTSE EPRA Nareit Developed Asia Dividend Plus Index, US Dollar terms.

Markets began to trail off in the first half of the reporting year, with rising concern about the spread of the Delta and Omicron variants of COVID-19, particularly in the Asia-Pacific region. In 2022, markets endured a more brutal sell-off as rising inflationary pressure and the Ukraine conflict weighed on the outlook for macroeconomic growth and forced central banks to become more aggressive in hiking interest rates. Asian property equities were not spared under this challenging backdrop, although they outperformed the broader equity market. Real estate investment trusts (REITs) were hit harder by rising rate expectations and underperformed developers. Selective retail and hotel plays continued to outperform, as the economic reopening picked up pace in Asia, while perceived growth stocks trading at premium valuations, such as industrial REITs, lagged. Only Singapore (+1.2%) posted a positive return, with the country leading in the reopening. Hong Kong (-12.4%) was hurt by renewed restrictions amid the Omicron wave, although it later performed better as investors sought shelter in developers with strong balance sheets. Australian (-17.2%) REITs were hit hard by the rate hike headwinds. Though Japan (-20.1%) led the region in the decline, it was largely due to the 19% depreciation of the Japanese Yen against the US Dollar, while we saw particular strength from developers in local currency terms.

The fund met its investment objective and delivered a dividend yield higher than the benchmark. However, net of fees, the fund underperformed the index largely due to the negative impact of the allocation to Hong Kong/China, which was the only detractor. Contributions elsewhere were positive. The key detractors were in China – developer Shimao Property and data centre operator GDS, which were pressured by rising policy risks and regulatory clampdowns.

We participated in the initial public offering of HealthCo REIT in Australia and an equity offering from Japanese REIT Activia Properties. Following strong performances, we took profits from Hong Kong retail landlord Fortune REIT, Australian land lease developer Lifestyle Communities, Singapore retail landlord Starhill Global REIT, and Japan's GLP J-REIT and Kenedix Retail REIT. We added Philippine developer Ayala Land, which we expected to benefit from the economic reopening. In Singapore, we added fund manager CapitaLand Investment and its REIT, CapitaLand Integrated Commercial Trust REIT, which lagged with the overhang from its sponsor's restructuring deal. In Hong Kong, we exited developer Sino Land and added China luxury retail-focused Hang Lung Properties, which we felt was unfairly punished by concerns about the government's 'common prosperity' goals. With fundamentals in the China residential space deteriorating sharply, we exited Shimao Property.

Investor expectations changed as concerns about inflationary pressure, rate increases and slowing growth grew in the latter half of the reporting year. We lowered the exposure to industrial REITs, exited the Mapletree Industrial Trust in Singapore and SF REIT in Hong Kong, and trimmed the positions in Australia's Goodman and Japanese logistics REITs. With the Asia-Pacific region moving along the path of return to a 'pre-pandemic normal', we added to the holding in Singapore, which has led in the reopening, by initiating positions in developer City Developments and Lendlease Global Commercial REIT. We added necessity retail-focused Link REIT in Hong Kong and Orix JREIT in Japan, which we expected to benefit from the economic reopening coupled with attractive relative returns. We exited the holdings in GDS, given the regulatory pressure, and pared down the exposure to China retail through Kerry Properties, CapitaLand China Trust REIT and Hang Lung Properties amid COVID-19 lockdowns.

We took profits from CDL Hospitality Trusts, CapitaLand Investment and Indian office landlord Embassy Office Parks REIT, following strong performances, and exited positions in diversified Japanese REIT Nomura Real Estate Master Fund, Hong Kong developer New World Development and Japanese landlord Keihanshin Building. Instead, we added Advance Residence Investment REIT in Japan, Hong Kong commercial landlord Hysan Development and Stockland REIT in Australia, which we liked for the stability of their portfolios, strong balance sheets and attractive valuations and yields.

Looking ahead, despite geopolitical tensions and concerns about tightening central bank policy, we continue to believe that investors' desire for income and real assets to help protect from the threat of sustained inflation will continue to support physical real estate. We believe Asia is well-placed in a rate hike cycle as central banks in the region are under less pressure to pivot towards tightening. This is because of the region's more moderate inflation and subdued economic backdrop, while it has lagged Western counterparts in the recovery from the pandemic.

The importance of management, asset and balance sheet quality come to the fore again and sectors that have the right rental structures and operating models as well as pricing power will be key differentiators in a rising inflationary environment. It is, therefore, important to remain selective.

Listed real estate offers lower correlations to many other asset classes and provides investors the benefits of portfolio enhancement by increasing risk-adjusted returns within a balanced portfolio. In addition, the real estate market continues to provide an attractive, reliable and growing income stream for investors, something we expect to be rewarded over time.

# Asia-Pacific Property Income Fund

## Investment objective and policy

The fund aims to provide a sustainable level of income, with a dividend yield higher than that of the FTSE EPRA Nareit Developed Asia Dividend Plus Index, plus the potential for capital growth over the long term (5 years or more).

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) or equity-related securities of REITs and companies, of any size, which invest in property, in the Asia Pacific region. Securities will derive the main part of their revenue from owning, developing and managing real estate which in the view of the Investment Manager offer prospects for above average dividends or reflect such prospects.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Asia Dividend Plus Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's income target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager seeks to identify listed property companies and REITs which derive the main part of their revenue from the Asia Pacific region, that can deliver a regular and stable dividend with the potential for capital growth over the long term. The investment process follows a high conviction, 'bottom-up' (fundamental company analysis) approach, aiming to identify the best risk adjusted opportunities from across the investment universe.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18 %	1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %
Asia-Pacific Property Income Fund	H2 USD (Net)*	8.20**	13.49**	(10.50)**	24.57**	(17.38)
FTSE EPRA Nareit Developed Asia Dividend Plus Index***		7.76***	13.49***	(19.22)***	25.54	(14.83)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 USD share class.

\*\*\* From 1 July 2020, the fund benchmark changed from the FTSE EPRA Nareit Pure Asia total return net dividend Index (Capital constrained) to the FTSE EPRA Nareit Developed Asia Dividend Plus Index. Past performance before 1 July 2020 is shown for the previous fund benchmark.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Biotechnology Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Andy Acker and Daniel Lyons

The fund fell 31.8% (Net), 30.2% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 26.6% in the NASDAQ Biotechnology Total Return Index and a fall of 25.1% in the Target Index + 2%, US Dollar terms.

The biotechnology sector delivered negative returns, due to an historic sell-off in small and mid-cap companies. Worries about drug pricing reform and regulatory uncertainty, along with clinical trial setbacks and rising interest rates, were among the main causes. Even so, as equities broadly began to pull back in 2022, investors gravitated to the strong cash balances of large-cap biotechnology companies, lifting these stocks. Innovation also continued, with notable advances in cancer and obesity treatments. Finally, with many biotechnology company valuations significantly discounted, merger and acquisition (M&A) activity picked up towards the end of the year.

An underweight exposure to Amgen was the top individual detractor. Shares of Amgen, a large-cap biotechnology company, benefited as investors sought low volatility equities. The stock also got a boost as COVID-19 headwinds abated, lifting profits (prior outbreaks had made it difficult for patients to seek treatments sold by Amgen). The fund maintained its underweight position, given competitive pressures for Amgen's lead drug for psoriasis, Otezla, as well as for its legacy oncology and nephrology franchises. Finally, newly launched drug Lumakras, the first targeted therapy to address a specific mutation in lung cancer patients, made a slower-than-expected start and faced new competition in the year ahead.

Essa Pharma also weighed on returns. The company is developing novel treatments for prostate cancer and has created a new class of drugs called anitens. Although early clinical data were promising, management declined to provide updated data for lead drug EPI-7386, citing the need to better understand dosing requirements. Unfortunately, even after a dose escalation study, EPI-7386 demonstrated modest clinical activity. The company has undertaken a combination therapy study, with data expected in 2023. We trimmed the fund's position in the stock.

BELLUS Health was among the holdings to contribute to returns. In 2021, the company delivered positive interim data from a phase 2 study of BLU-5937, a selective P2X3 antagonist for the treatment of refractory chronic cough. BELLUS Health followed up with positive final results, showing BLU-5937 achieved statistical significance on its primary endpoint and was well tolerated by patients. The company has accelerated planning for phase 3 trials. Meanwhile, a potential competitor drug was denied regulatory approval in the US.

Biohaven Pharmaceutical was another top contributor. The stock climbed after Pfizer announced it would acquire Biohaven Pharmaceutical for nearly US\$12bn, a roughly 79% premium. Biohaven Pharmaceutical's lead drug, Nurtec ODT, is a novel oral treatment for migraines. Last year, the fast-acting oral tablet saw its approved indications extended beyond acute use to include the preventative setting. As the only medicine available to both treat and prevent acute migraine attacks, Nurtec has seen significant sales growth. Prior to the acquisition, Janus Henderson was Biohaven Pharmaceutical's third-largest shareholder.

The fund continued to hold overweight positions in small and mid-cap biotechnology stocks. In our view, these companies are pioneering the sector's most exciting innovations, with the potential to transform patient outcomes and drive significant long-term value. We believed that recent underperformance had made the risk/reward profile of many of these stocks more attractive.

That said, in light of rising interest rates and the growing risk of a US recession, we reduced the fund's earlier-stage and less-liquid holdings. In turn, we added to early commercial companies that boasted existing franchises with strong growth potential and had pipeline opportunities that appeared heavily discounted by the market. We also added to large-cap biopharmaceutical stocks and companies with lower earning multiples and/or near-term pipeline catalysts.

Given the highly volatile nature of biotechnology, we may use derivatives such as index short positions or swaps in an attempt to mitigate downside risks. As biotechnology stocks lagged throughout the year, these derivatives aided relative returns.

Biotechnology's long duration stocks are likely to experience volatility for as long as interest rates continue to rise, we believe. But the sector is not homogenous. Many large-cap companies have sizeable cash balances that appeal to investors during periods of uncertainty. In addition, idiosyncratic events are often bigger drivers of performance. Positive clinical trial data can catapult a stock (while a negative one can lead to losses). After the past year's sell-off, valuations leave plenty of room for upside: many profitable small and mid-cap biotechnology companies trade below the value of the cash on their balance sheets. Low valuations could also drive M&A activity, especially as large-cap pharmaceutical companies face a growing 'patent cliff'.

Long term, we continue to believe that the sector's innovation will fuel growth. During the first half of 2022, for example, a new anti-obesity drug achieved weight loss of over 20% in clinical trials, a record amount that could lead to additional health benefits. In cancer, a targeted breast cancer therapy showed it could double progression-free survival for about half of breast cancer patients. And in the second half of 2022, important clinical trial updates are expected for Alzheimer's disease, macular degeneration (a leading cause of blindness), liver disease and cancer, among others. These advances could lead to sizeable market opportunities and help reignite investor interest in biotechnology.

# Biotechnology Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the NASDAQ Biotechnology Total Return Index by 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, which are biotechnology or biotechnology-related, in any country.

The Investment Manager may use derivatives (complex financial instruments) with the aim of making investment gains in line with the fund's objective, to reduce risk or to manage the fund more efficiently.

The fund is actively managed with reference to the NASDAQ Biotechnology Total Return Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager looks to identify innovative biotechnology companies addressing high unmet medical needs and trading at a significant discount to their intrinsic value. The team understands that success of drug development is binary in nature, creating wide disparities between winners and losers. The investment process leverages proprietary statistical models to analyse the probability of a company's success, focusing on products they believe can overcome the rigours of clinical development. Additional tools such as physician surveys, prescription models and scenario simulations attempt to more accurately predict commercial viability.

## Performance history (unaudited)

Fund & Benchmark		Since launch to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %

\* TER restated as performance fee no longer annualised for newly launched share classes.

\*\* As the F2 USD class was launched on 30 June 2021, sufficient expenses were not yet accrued at the balance sheet for a TER to be calculated

\*\*\* The share class launched in the year and the rate is annualised, with the exception of the performance fee.

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The TER includes performance fees as at 30 June 2022.

The amounts earned in relation to performance fees for the year are shown in note 6 to the financial statements.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

# China Opportunities Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Manager

May Ling Wee

The fund fell 29.4% (Net), 28.7% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 28.5% in the MSCI Zhong Hua 10/40 Index and a fall of 26.7% in the Target Index + 2.5%, US Dollar terms.

A lot happened in China over the past year, although there was little to cheer investors. The market continued its sell-off from the previous year, largely because of internet regulations, the shutdown of the after-school tutoring industry and a tightening of the real estate market. Investors questioned whether the Chinese asset class was still investable. In the technology sector, internet platforms faced antitrust measures, data privacy and information collection, as well as the strict management of content. However, the most damaging regulations were policy changes in the after-school tutoring industry, with schools that offer classes to children of compulsory education age no longer allowed to operate classes on weekends and holidays. In addition, they had to turn their businesses into not-for-profit entities. The change demonstrated that the Chinese Communist Party/state was willing to sacrifice large and profitable industries for the greater social good of 'common prosperity'. This led to a sharp sell-off in the market in July as investors questioned which other businesses were at risk of China's social goals.

In the real estate sector, regulators were concerned that the market was overheating and sought to cool it by turning down the mortgage tap. Without funding from pre-sale proceeds and bank financing hard to come by, due to the need to adhere to government rules that restricted financing, China's largest and most highly geared private developer Evergrande was unable to pay its onshore bank and bondholders. Other highly leveraged developers soon followed.

The first half of 2022 was not without its share of disruptions. The Russia/Ukraine conflict disrupted global supply chains and led to high energy prices. Global central banks tightened monetary policy, curbing liquidity. However, it was the COVID-19 lockdown in Shanghai, with severe restrictions on the movement of people and traffic that raised even more concern among investors. The lockdown disrupted manufacturing and production in the automotive and electronics industries in the Yangtze River Delta and elsewhere. From mid-May, the market found a near-term bottom as both Shanghai and Beijing opened up, allowing supply chains to begin recovering, although not back to levels before the lockdowns. China's refinement of its 'zero-COVID-19' policy in late June, where it reduced the number of quarantine days and allowed easier business travel, brought relief to the market. The Chinese equity market ended the month of June on a strong note, outperforming most global markets.

At a sector level, industrials, financials and an underweight position in utilities detracted from performance. Healthcare, energy and the information technology sectors contributed to returns.

At the stock level, the top contributors were upstream exploration and production company CNOOC, integrated solar producer LONGi Green Energy Technology and waterproofing materials supplier Beijing Oriental Yuhong Waterproof Technology. Strong upstream energy prices drove CNOOC's performance, while LONGi Green Energy Technology gained due to strong business momentum in the domestic and overseas solar markets. Beijing Oriental Yuhong Waterproof Technology performed well with solid market share gains in China's so-called lower tier cities, as it developed its distribution network following its earlier focus on the larger tier cities.

The largest detractors were due to the fund not owning China Construction Bank and electric vehicle maker BYD, as both performed positively. China Construction Bank performed well due to its low earnings multiples and high dividend yield, while BYD reported strong electric vehicle sales. The fund's holding in Will Semiconductor performed poorly, due to concerns about a consumer slowdown in the domestic and overseas markets.

The refinement of China's COVID-19 policy, to minimise the damage to the economy, is a positive step despite the government's retention of its zero-COVID-19 policy. The pandemic, and the resultant restrictions in China, will be key to determining the near-term outlook for the market. We expect August's earnings season to show pressure on margins and top and bottom-line growth, due to a global economic slowdown and China's COVID-19 containment measures in the second quarter of 2022. We continue to build positions in domestically focused businesses, as we believe the Chinese economy likely bottomed in the second quarter. We also like China's global leaders where earnings multiples have de-rated. The investment case for some growth stocks is more appealing than over the past two years, when global liquidity was readily available and input cost inflation was less disruptive to businesses.

Please note that as of 1 March 2022 Lin Shi no longer manages this fund.

# China Opportunities Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Zhong Hua 10/40 Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) of companies, of any size, in any industry, in China or Hong Kong. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in this region. The fund may invest up to 50% of its assets in China A-Shares.

The fund may also invest in other assets including companies outside this region, investment grade bonds (including convertible bonds), cash and money market instruments.

The fund is actively managed with reference to the MSCI Zhong Hua 10/40 Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to identify companies that can generate unexpected earnings growth, at both an industry and stock level, not yet recognised by the broader market.

# Global Equity Income Fund

## Investment report for the period from 1 July 2021 to 23 November 2021

### Investment Fund Managers

Ben Lofthouse and Andrew Jones

The fund returned 2.4% (Net) based on Class A2 in US Dollar terms between 1 July 2021 and 23 November 2021, when it closed, compared with a return of 6.6% in the MSCI World Index, US Dollar terms.

Despite concerns about the spread of more infectious COVID-19 variants in several countries, global equity markets finished the period in positive territory, helped by a strong corporate earnings season. Investors did however, become increasingly concerned about the outlook for global growth amid rising inflationary pressures, higher gas prices, supply chain bottlenecks and Chinese regulatory risks. The possibility that central banks such as the Fed and the Bank of England would start 'tapering' monetary policy sooner than anticipated also weighed on sentiment. Performance at the sector level was mixed, with energy, consumer discretionary and information technology performing strongly while materials, communication services and consumer staples were weak.

During the period, the fund's holdings in utilities Enel and Iberdrola detracted from returns after the Spanish government announced plans to impose a windfall tax on companies that were seen to have benefited from the surge in energy prices. The holdings in Medtronic, AstraZeneca and Citigroup were all weak. AstraZeneca reported quarterly results that were below expectations while Medtronic announced a delay to the launch of one of its key products. Citigroup, meanwhile, has so far been unable to close the gap in the returns it generates relative to other banks, leaving the stock lowly valued compared with its peers. Clothing and apparel retailers VF and TopSports International also lagged the market, as investors reassessed the short-term outlook for consumer demand, given the inflationary environment and ongoing COVID-19 restrictions in some parts of the world.

Technology companies Broadcom and Microsoft both performed strongly during the period. Microsoft announced better-than-expected results while Broadcom benefited from an improving outlook for semiconductors, given expected demand from 5G and high-performance computing. Financial companies BAWAG, ING and AXA also performed solidly, aided by the rising bond yield environment, which has a positive impact on bank and insurer profitability.

During the period, new positions were established in Nintendo and Tencent. Nintendo has enjoyed strong demand for its Switch consoles and software, while we bought Tencent to provide exposure to secular growth themes such as mobile gaming, cloud computing, fintech (digital financial services) and social media. Tencent shares had underperformed more recently and offered a 5% free-cash-flow yield. These purchases were funded by reducing the positions in Rio Tinto and Anglo American following good long-term performances. We also took profits in online gambling company Entain, and French media company Vivendi ahead of its separation from subsidiary Universal Music.

# Global Equity Income Fund

## Investment objective and policy

The fund aims to provide an income in excess of the income generated by the MSCI World Index with the potential for capital growth over the long term (5 years or more).

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of companies, of any size, in any industry, in any country.

The fund is actively managed with reference to the MSCI World Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's income target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager follows a dividend-seeking, valuation-driven strategy that focuses on companies with good and growing cash flow. The investment process seeks to identify companies from around the world with income growth prospects (typically with defensible competitive positions, affordable investment requirements, aligned management behaviour and sustainable returns) and companies with capital growth prospects (typically unloved, with under-appreciated earnings and undervalued shares). The process results in a portfolio well diversified by sector and geography.

## Performance history (unaudited)

# Global Multi-Asset Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Paul O'Connor, Oliver Blackburn and Nicholas Harper

The fund fell 5.8% (Net), 4.7% (Gross) based on Class H2 in Sterling terms over the year under review, compared with a return of 0.4% in the Sterling Overnight Index Average (SONIA) and a return of 4.4% in the Target Index + 4%, Sterling terms.

The reporting year saw markets dominated by inflation, the central bank reaction and the consequences of increasingly hawkish policy. Other factors, such as the Russian invasion of Ukraine and a Chinese regulatory crackdown, also contributed to volatility across asset classes. Continued strong economic recovery from the effects of the pandemic restrictions continued to support risk assets during the second half of 2021. Despite evidence of rising inflation pressures for much of 2021, major central banks began to ease out of their ultra-loose monetary policy stance late in the year. Inflation subsequently surged to very high levels in the first half of 2022, rising well above the commonly used 2% inflation target. The rise in the cost of living was further reinforced by concerns about energy and grain supplies after Russia invaded Ukraine in late February, adding to the impulse from supply chain disruptions and tightening labour markets. Surging prices led to an increasingly hawkish response from major central banks as 2022 progressed, prompting a rapid and significant adjustment in real yields on government bonds. Falling real yields had been used to justify very elevated valuations on many asset prices and the reversal caused widespread falls across markets, as equities de-rated and credit spreads increased. By the summer, monetary policy hawkishness and the real income squeeze was leading to concerns about recessions in major economies, further depressing investor sentiment.

The reporting year was difficult for most asset classes as modest gains in the first half were more than offset by larger declines in the second half. This led to negative contributions across both aggregate equity and fixed income allocations, with only alternative holdings generating positive returns at a broad asset class level. Across equity regions, the largest detractors were Japanese companies, European equities excluding the UK and emerging market shares. However, positions in the US and UK markets generated small positive contributions. Within fixed income, the largest losses came from allocations to high-yield bonds and emerging market debt, with sovereign bonds generating a small offsetting positive contribution. In contrast, holdings of alternative strategies, such as a global macro strategy, strongly helped performance, while an allocation to property, infrastructure and renewables assets also delivered a positive contribution. Foreign exchange positions were a net detractor, particularly positions in the US Dollar. At a position level, the largest positive contributions came from the BH Macro investment trust, Hang Seng Tech Index futures, FTSE 100 Index futures, Greencoat UK Wind and Goldman Sachs Access China Government Bond UCITS ETF. After the US Dollar foreign exchange positions, the largest detractors were the First Sentier Japan Equity Fund, MSCI Emerging Markets Index futures, Janus Henderson Emerging Markets Opportunities Fund, TOPIX index futures and Polar Capital UK Value Opportunities Fund.

Turnover was high during the year, as positioning was considerably adjusted in response to a dramatic change in the macroeconomic, policy and investor sentiment backdrop. Allocations to equities were increased during the second half of 2021 as markets continued to perform strongly, given the ongoing economic recovery. However, this was reversed in the first half of 2022 as mounting concerns, first about the central bank response to inflation and then about rising recession risks, spurred greater caution. Within equities, there was – broadly – a rotation away from the US, Europe and Japan towards the UK and emerging markets in terms of the regional allocations. Allocations to sovereign bonds declined during the year, due to concerns about the impact of rising interest rates. Allocations to credit markets and emerging market debt were little changed. Holdings in alternative assets increased, predominantly through greater allocations to property, infrastructure and renewables assets that were expected to do well in a rising inflation environment, given the direct linkages of the underlying cash flows to inflation.

The ongoing inflation shock is now being joined by rising concerns about recession as central banks hike interest rates aggressively to fight the rising cost of living. The historical instances of 'soft landings' for economies occurred from very different starting points in terms of interest rates and the tightness of labour markets. While we can find cracks in consumer demand, we have yet to see this feed into the labour market, which tends to be a key factor in causing recession. However, we are increasingly cautious about the outlook for corporate fundamentals as the probability of recession rises. As a result, there has been little respite for asset prices from the plunge seen so far this year, with various commodity markets joining the decline. We have now seen a considerable reset in the valuations of most asset classes, although we have yet to see material downgrades to the global earnings outlook. While we are taking a more cautious stance on risk assets, we are finding better value in government bonds, given the tug-of-war between inflation and a deteriorating economic growth outlook. We continue to improve diversification and look to take advantage of the opportunities we can identify across regions and asset classes as investors struggle to price the changing economic backdrop.

# Global Multi-Asset Fund

## Investment objective and policy

The fund aims to provide a return, from a combination of capital growth and income, with volatility lower than that of equity market volatility, over the long term.

Performance target: To outperform the SONIA by 4% per annum, before the deduction of charges, over any 5 year period.

The fund invests in Collective Investment Schemes (CIS) (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified global exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property and commodities.

The fund is actively managed with reference to the SONIA, as this forms the basis of the fund's performance target. For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison. The Investment Manager has complete discretion to choose investments for the fund.

### Strategy

The Investment Manager follows a strategy that combines strategic asset allocation (based on long-term return, risk and correlation expectations of various asset classes), dynamic asset allocation (giving the strategy the flexibility to reflect the team's shorter term market views and to react quickly in times of market stress), and careful underlying fund and instrument selection. The investment process is underpinned by a robust, multi-faceted approach to risk management. The strategy results in a portfolio with exposure to a wide variety of asset classes, both traditional and alternative, in the expectation that investors will benefit from the significant diversification benefits multi-asset investing provides.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22

# Global Property Equities Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Guy Barnard, Tim Gibson and Greg Kuhl

The fund fell 15.6% (Net), 14.1% (Gross) based on Class H2 US Dollar terms over the year under review, compared with a fall of 13.4% in the FTSE EPRA Nareit Developed Index and a fall of 11.7% in the Target Index + 2%, US Dollar terms.

Despite initial strength, the reporting year proved challenging as markets were shaken by geopolitical worries following the outbreak of conflict in Ukraine. This, coupled with ongoing supply chain disruption, sustained inflationary impulses and concerns about slowing growth, forced investor expectations to be rebased rapidly, most notably around the path of monetary policy.

Global property stocks fell in line with broader global equity markets during the year, with real estate shares reacting to a combination of rising funding costs and a slowing global economy making rental income streams harder to underwrite. Despite this, underlying property markets performed very strongly, with values and rental income streams growing in most regions and subsectors. There was a strong divergence at a regional level, with European property companies materially lagging their North American and Asia-Pacific counterparts. Sector dispersion was also stark, as global logistics landlords, US net lease, US rental residential owners and storage landlords all outperformed, given superior operating fundamentals. Retail, office and hotel property stocks lagged on growth concerns.

The fund lagged the index net of fees during the year. Stock selection in the US contributed to returns, with underweight holdings to data centres and malls beneficial at a sector level. Industrial landlords Duke Realty REIT and Prologis REIT also added value, as did Hilton Worldwide in the hotel sector and gaming landlord MGP. Conversely, Americold Realty Trust and Alexandria Real Estate Equities REIT detracted. In Europe, an exposure to the German residential sector was detrimental, with house builder Instone Real Estate falling on guidance downgrades. In Asia-Pacific, Chinese data centre landlord GDS and residential developer Shimao Property (both since sold) suffered from a deteriorating backdrop.

The fund remained close to index weightings at a regional level and, therefore, continued to provide a well-diversified global exposure. The core of the portfolio remained focused on areas of structural growth, such as industrial/logistics, affordable rental residential housing, technology real estate and alternative sectors, including life sciences and gaming. Some profits were taken here following strong share price performances and as valuations in some other areas of the market became relatively attractive, resulting in a narrowing of sector dispersion versus the index. We also placed greater emphasis on balance sheet strength and income resilience, given the deteriorating macroeconomic backdrop.

Reflecting these themes and relative valuation considerations, key portfolio changes during the year included the addition of net lease landlord Agree Realty, storage owners Life Storage REIT and CubeSmart, industrial landlord First Industrial Realty Trust REIT and data centre owner Digital Realty Trust REIT. In the residential space, we added Tricon Residential, Advanced Residence Investment and Stockland REIT, and in retail, we added SITE Centers, Hang Lung Properties, Link REIT and Vicinity Centres. In offices, we continued to be selective, adding Land Securities, Orix JREIT and Activia Properties REIT. In the healthcare sector, we added US large cap Welltower REIT over smaller peers Ventas, Sabra Health Care REIT and National Health Investors REIT. Other key sales included strong performers Hilton Worldwide, Duke Realty REIT, Radius Global Infrastructure and Jones Lang LaSalle, as well as Americold Realty Trust, Douglas Emmett, Aroundtown, Shimao Property, China Resources Land and Instone Real Estate on earnings visibility. We reduced the fund's overweight exposure to logistics by exiting some holdings and trimming others, predominantly in Asia.

Looking ahead, while real estate will not be immune to the changing macroeconomic landscape, its ability to provide more dependable income streams, diversification benefits and inflation hedging over time should provide some protection, we believe. Within the sector, real estate fundamentals are likely to reflect ongoing divergence across different property types in the years ahead, driven by the themes of changing demographics, digitisation, sustainability and the convenience lifestyle. It, therefore, remains important, in our view, to remain selective. The importance of management, asset and balance sheet quality are also likely to come to the fore again.

While the direct property market will take time to adjust to higher funding costs, the listed market has already reacted, resulting in shares trading at wide discounts to previous asset values and reflecting a highly uncertain environment. This may overlook the attractive, reliable and growing income streams that many real estate companies can generate for investors. This is something that we expect to be rewarded over time.

# Global Property Equities Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE EPRA Nareit Developed Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of REITs and companies, which invest in property, in any country. Securities will derive the main part of their revenue from owning, developing and managing real estate.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager seeks to identify listed property companies and REITs that can deliver the highest total return over the long-term. The investment process follows a high conviction, 'bottom-up' (fundamental company-level) research approach aiming to identify the best risk-adjusted value from across the capitalisation spectrum.

\* The share class launched in the year and the rate is annualised, with the exception of the performance fee.

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The TER includes performance fees as at 30 June 2022.

The amounts earned in relation to performance fees for the year are shown in note 6 to the financial statements.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Manager

Nick Sheridan

The fund fell 21.5% (Net) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 22.0% in the MSCI World Small Cap Index, US Dollar terms.

The pandemic remained a permanent feature during the reporting year, although in the second half of 2021, life was beginning to normalise in developed countries as vaccination rates accelerated. Mid-2021 saw a continuation of the previous year's trend as 'glamour/growth' stocks (those with a good story to tell but little else and/or those on outrageous multiples relative to their likely returns) continued to perform strongly. This was surprising given that this did not come from better underlying returns (which would be healthy), but rather from revaluation upwards. During this period, value stocks as an asset class saw their returns improve relative to glamour/growth, although they de-rated. Markets can and do often defy logic for a time.

However, towards the end of September 2021 things began to change when the Fed indicated that liquidity might begin to be drained from the financial system and that US interest rates could rise towards the end of 2022. Low interest rates and easy credit are generally seen as supportive of markets, and high interest rates and restrictive credit are not. Rising interest rates are also perceived to hurt long duration assets (glamour/growth stocks) as they increase the discount rate and lower the value of future returns. Consequently, we began to see a reversal in market leadership away from growth and towards value.

October 2021 was probably the month in which investors began to think that 'transitory' inflation might be something else. Inflation expectations globally had been rising as economies recovered and bottlenecks/shortages, among other things, had developed, not least in silicon chips. None of this was helped by China's 'zero COVID-19' policy. By November, the inflation cat jumped firmly out of the bag as Fed Chairman Jerome Powell decided that he had misspoken when calling inflation transitory. Apparently, market participants had misunderstood the length of time that transitory implied. Better wording was required. November also saw the appearance of a new COVID-19 variant called Omicron, which further delayed the global economic reopening.

The start of a new year, as always, was a reason for much debate and prediction about the year ahead. This always seems rather pointless as a new year is, after all, man-made and trends both economic and political rarely change overnight. This year, however, saw markets change rapidly as investors seemed to have accepted the potential for inflation rates to be problematic. Growth stocks, which for so long had benefited from low rates and high liquidity, sold off as value stocks came to the fore. As ever when markets move quickly, high leverage magnified these moves. In value, cheap, low quality was the order of the day. On the one hand, the fund benefited from investors paying attention to value stocks, although on the other, excessive leverage is something we try and avoid.

February saw Russia invade Ukraine. Fortunately, such events are rare, although the implications for markets were profound as the European peace dividend disappeared, inflation moved higher, energy independence became more important and supply chains for both goods and food inevitably came under more pressure. European defence budgets also began to rise. The response to the invasion has been economic sanctions by the West against Russia. While Russia only accounts for around 3% of global GDP, China (which seems to be supportive of Russia) accounts for 18% and as such any decoupling of China from global trade would have severe consequences for all.

In March, in response to rising inflation levels, the Fed started moving interest rates higher, somewhat earlier than previously expected. Following this, investor uncertainty coalesced into an air of certainty that global recession would be caused by central banks raising rates too high, too quickly. Investors are anticipating that the future direction of corporate operating margins will be down and stocks have de-rated.

The European Central Bank (ECB) announced in June that its asset purchases would conclude at the end of the same month, committed to a 25 basis point (bps) interest rate rise at its next meeting and indicated that we should expect a further 50bps increase in September, subject to the proviso of inflationary pressure not abating sooner rather than later. Given the ECB is behind the Fed in its reactions to inflation, this seems unlikely. Eurozone uncertainty and Euro weakness resulted as yield spreads across the region moved to reflect the financial strength of individual countries.

Against this background, turnover in the fund was low and we allowed cash to build to just over 4%, which we expect to deploy over the coming months. Sales included Avast and Brewin Dolphin, both of which attracted bids, while we trimmed one of the fund's larger holdings, Generac, on valuation grounds. We introduced a number of holdings including Fugro (a mapping software company that collects geographical data), Tate & Lyle (a producer of food ingredients) and H&R Block (a provider of accounting and consumer financial services).

# Global Smaller Companies Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI World Small Cap Index, after the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of smaller companies, in any industry, in any country.

The fund is actively managed with reference to the MSCI World Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager aims to deliver capital growth by investing in small companies listed globally. The fund looks to identify good quality, but potentially undervalued stocks, driven by the belief that the level of real returns delivered depends on the initial price paid.

## Performance history (unaudited)

Fund & Benchmark		Since launch to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%
Global Smaller Companies Fund*	H2 USD (Net)**	1.80***	60.12***	(21.50)
MSCI World Small Cap Index		(1.88)	52.88	(21.97)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

\* On 6 August 2019, the Global Smaller Companies Fund was launched.

\*\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\*\* The performance history has been restated to reflect the H2 USD share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Global Sustainable Equity Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Hamish Chamberlayne and Aaron Scully

The fund fell 22.6% (Net) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 14.3% in the MSCI World Index, US Dollar terms.

The reporting year was challenging for global equity markets. The pandemic continued to have an impact, while investor enthusiasm was tempered by growing concerns about inflationary pressures, rising interest rates and geopolitical events such as the conflict in Ukraine. The unfavourable conditions led to a dramatic style rotation. While growth companies outperformed value companies in the first half, they subsequently underperformed significantly, given increasing concerns about consumer confidence and economic activity.

Against this backdrop, it is unsurprising that energy and utilities were the only sectors to deliver positive returns, while communication services, consumer discretionary and information technology all fell heavily. Stocks that fared well typically had lower price-to-earnings ratios and dividend yields, belonging to businesses with lower profit margins and higher debt. We choose not to invest in companies with these lower-quality corporate fundamentals, and this contributed to the fund's relative underperformance.

From a sustainability perspective, regulators and governments made progress at the United Nations Climate Change Conference, with increased emission reduction efforts from key players, including China and India, and agreement among countries to revisit nationally determined contributions annually rather than every five years. Additionally, the European Union (EU), the US Securities and Exchange Commission and accounting standards body the IFRS Foundation have increased their efforts to improve corporate climate disclosure levels.

This increasing political support towards a more decarbonised future heightens our belief that the global economy continues to migrate towards greater sustainability. This belief and the traction of the accompanying sustainable development lie at the heart of our strategy. The various dislocations of the global economy this year strengthen our long-term conviction.

Our focus is on finding companies that will both propel and benefit from many of these themes, such as the need for cleaner energy and greater energy security, greater efficiencies through digitalisation and electrification, and more sustainable transport solutions, as well as helping companies and consumers build resilience against the risks that they increasingly face. Equity market environments, as we have experienced in recent months, will not necessarily reward those companies' equity valuations over the shorter term. However, we are encouraged by the operational performance of the fund's holdings and the long-term sustainability trends that drive their growth opportunities.

Much of the weak performance can be attributed to holdings in the technology sector, where the rotation in styles hit the valuations of the fund's semiconductor and software names. Performance also suffered from having no holdings in the energy sector in a rising oil price environment, and an underweight position in consumer staples. We explicitly exclude the fossil fuel energy sector from our investment universe. However, avoiding communication services companies such as Meta, Netflix and Walt Disney proved beneficial. Another positive was an overweight allocation to insurance names, which performed strongly due to their pricing power and defensive characteristics.

The leading contributor was renewable energy developer Boralex, whose shares performed well in the second half of the reporting year as renewable energy moved up government agendas. AON, a global risk management and insurance provider, also fared well, and posted consistently strong results. Against a background of new and complex risks, such as climate change and cyber threats, AON has positioned itself as a market leader in providing specialist risk management and insurance solutions. Another insurance performer was Progressive, a large US property and casualty insurer. In the second half, its shares moved higher as many peers implemented price increases, with the company expected to benefit as customers shopped around.

Among the detractors, Autodesk, a design software company, performed well initially, although it was caught in the sell-off of software companies. IPG Photonics, a laser manufacturer, suffered from a slowdown in China and its operations in Russia, although our long-term thesis was unchanged. Avalara was another higher growth name negatively impacted by shifting interest rate expectations. The tax and compliance software provider posted strong results and was exposed to tailwinds around e-commerce, cloud computing and increasing regulatory complexity.

We made one purchase during the year: Advanced Drainage Systems, a US pipe manufacturer that provides water management products and drainage solutions for rainwater life-cycle management. We sold the holding in Tesla, after it passed the US\$1trn market-cap threshold, which left its valuation looking stretched. We also sold Orange, Avery Dennison and Accolade, and reinvested the proceeds in other companies with stronger positive impact stories. In addition, we trimmed the holdings in Humana, Adobe and Evoqua Water Technologies, in order to increase exposure to companies that market movements had made more attractive.

Market uncertainty remains. Consequently, our focus is on the fundamental strengths of companies and identifying businesses that will benefit once stability returns. Therein lies the opportunity for the detailed analysis that we carry out.

We focus on trends such as digitalisation, electrification and decarbonisation, which we see as the drivers of the global economy. Our aim is to identify companies that are aligned with and contribute towards a more sustainable global economy. We continue to look for companies that have exciting growth prospects because of this transition, and we are enthused by the investment opportunities available to us.

# Global Sustainable Equity Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy.

The fund invests at least 80% of its net assets in equities of companies worldwide, whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy. The fund will avoid investing in companies that the Investment Manager considers to potentially have a negative impact on the development of a sustainable global economy. The fund may invest in companies of any size, including smaller capitalisation companies, in any industry, in any country. The fund may use derivative instruments (such as futures, forwards, options and warrants) to reduce risk and to manage the fund more efficiently. Under no circumstances shall the use of these instruments and techniques cause a fund to diverge from its investment policy. On an ancillary basis and for defensive purposes, the fund may also invest in: investment grade government bonds and associated derivative instruments; Money Market Instruments and cash. The fund follows a sustainable investment approach.

The fund is actively managed with reference to the MSCI World Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to construct a differentiated and well diversified global portfolio of companies, based on the belief that superior returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

## Performance history (unaudited)

Fund & Benchmark		Since launch to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%
Global Sustainable Equity Fund*	H2 USD (Net)**	5.70***	16.75***	43.27***	(22.57)
MSCI World Index		5.66	2.84	39.04	(14.34)

Class H2 USD is disclosed as it is the representative share class.

\* On 29 May 2019, the Global Sustainable Equity Fund was launched.

\*\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\*\* The performance history has been restated to reflect the H2 USD share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Global Technology Leaders Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Alison Porter, Graeme Clark and Richard Clode

The fund fell 29.4% (Net) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 23.3% in the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index, US Dollar terms.

In 2021, supply chains struggled to keep pace with the economic reopening, sparking inflationary fears and interest rate rises, exacerbated by the spread of the Omicron variant of COVID-19 late in the year. While technology stocks' growth premium contracted over 2021, the market maintained its appetite for higher growth names, despite expectations of higher interest rates.

Coming into 2022, investors expected a normalisation of economic and earnings growth, although markets saw unexpected volatility, driven in large part by the conflict in Ukraine and China's 'zero-COVID-19' policy. This volatility, combined with persistently high inflation, made the threat of recession the focus for investors in the first half of 2022.

As inflation's impact on both corporate margins and consumer disposable income and purchasing power has become clear, investor focus has turned to central banks' ability to bring it within long-term targets. As technology fund managers, we believe our sector remains a long-term disinflationary force across the global economy.

Broadcom helped performance as its networking and data centre products performed well, the market gained greater confidence in its software growth strategy and it initiated a US\$10bn share buyback late in 2021. T-Mobile USA benefited from the stability of its business model and the prospect of an inflection in profitability when the company emerged from its merger with Sprint. Tencent also contributed to performance as the fund's underweight position in 2021 coincided with increased regulatory scrutiny of Chinese technology companies, while an overweight holding in the second quarter of 2022 coincided with easing regulatory headwinds.

The fund's index-enforced structural underweight position in Apple weighed on returns as the stock held up in the sell-off, given strong earnings and a flight to defensive quality in the sector. Alibaba struggled because of a difficult regulatory backdrop, macroeconomic softness and increased competition. Uber Technologies' weak performance stemmed from recessionary fears that impacted consumer-exposed names. An underweight position in Nvidia in the second half of 2021 detracted from performance as the company benefited from significant data centre growth and was perceived as a key beneficiary of the emerging 'metaverse' theme.

We initiated and re-initiated a number of positions across our key themes, including financial technology (Adyen and MasterCard), artificial intelligence (AI) and process automation (Capgemini and Roper Technologies), next-generation infrastructure (BE Semiconductor Industries, Ciena, Equinix, Nvidia, Palo Alto Networks, Synopsys, Tenable and Vertiv), the internet 3.0 (Booking, T-Mobile USA, TELUS and Tencent) and electrification (Juniper Networks and SolarEdge Technologies). We exited positions in line with the strategy's valuation discipline and where we found more attractive opportunities elsewhere.

We expect inflation to remain an overhang on the market and the broader economy until investors gain confidence in the ability of central banks to bring it within their respective targets without triggering a recession. Supply and demand volatility are likely to continue across the second half of 2022, as chip shortages and logistics constraints ease slowly, and visibility remains low. Real world experiences will also dampen digital demand. The technology sector is now so diverse and disruptive that it is inappropriate to generalise across the sector. The pace at which companies were impacted by the pandemic – both positively and negatively – varied widely and hence growth comparisons during 2022 will be a source of heightened volatility, which can create opportunity for long-term investors. Regional differences will also be a focus, given the different interest rate profiles.

As technology fund managers, we are excited by the step change that has occurred in the levels of technology adoption and the digital transformation that many more industries are now undergoing. However, we are cognisant of the elevated valuations that persist in some segments of the sector. While this has unwound to some degree, in recent months we have seen vulnerability in those companies where profitability remains a distant potential and where valuation has not been underpinned by cash-flow expectations. We continue to invest in companies where we see unappreciated earnings power – unappreciated in terms of strength and sustainability or growth and also in terms of what the valuation already reflects. We continue to see a bifurcation in valuations within the sector that is extreme by historical standards. This reflects the increasing diversity of the sector, but also some short-term hype that warrants select caution.

We remain focused on the global technology leaders of today and companies with the potential to be the leaders of tomorrow. We believe the fund remains well positioned to benefit from the long-term secular trends of internet transformation, payment digitisation, AI, next-generation infrastructure and process automation. Our investment process gravitates to high-quality technology companies with strong cash flows and balance sheets, while aiming to maintain the highest standard of liquidity controls. We remain consistent in applying our unique approach of navigating the hype cycle, applying valuation discipline and identifying attractive growth/valuation combinations. We will continue to engage proactively with our companies on their role in being responsible disruptors and generating value for all stakeholders.

# Global Technology Leaders Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index, after the deduction of charges, over any 5 year period.

The fund invests at least 90% of its net assets in equities or equity-related instruments of technology-related companies or companies that derive the main part of their revenue from technology. The fund may invest in companies of any size, including smaller capitalisation companies, in any country. Equity-related instruments may include depositary receipts. The fund may use derivative instruments (such as futures, forwards, options and warrants) to reduce risk and to manage the fund more efficiently. Under no circumstances shall the use of these instruments and techniques cause a fund to diverge from its investment policy. On an ancillary basis and for defensive purposes, the fund may invest in: investment grade government bonds and associated derivative instruments; cash and Money Market Instruments.

The fund is actively managed with reference to the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The strategy is based on identifying companies that are considered by the Investment Manager to be current or future leaders in driving or enabling technology adoption and as such have undiscovered potential for sustained earnings growth. These companies are typically aligned with themes that drive long-term technology growth trends (e.g. internet transformation, next generation infrastructure and payment digitisation). The Investment Manager looks to navigate the hype cycle (different stages in the development of a technology from conception to widespread adoption) around technology adoption by assessing the company's fundamental business model. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria, support for the UNGC Principles and the promotion of accessibility and availability of essential services (such as healthcare, education and finance).

## Performance history (unaudited)

Fund & Benchmark		1 year to				
		30 Jun 18	30 Jun 19	30 Jun 20	30 Jun 21	30 Jun 22
		%	%	%	%	%
Global Technology Leaders Fund	H2 USD (Net)*	27.28**	7.16**	23.98**	48.78**	(29.42)
MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index***		26.11***	7.20***	23.70***	44.76	(23.26)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 USD is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 USD to the H2 USD share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 USD share class.

\*\*\* From 1 July 2020, the fund benchmark changed from the MSCI All Countries World IT Index to the MSCI ACWI Information Technology Index + MSCI ACWI Communication Services Index. Past performance before 1 July 2020 is shown for the previous benchmark.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

### Investment Fund Manager

Yunyoung Lee

The fund fell 19.6% (Net), 18.3% (Gross) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 22.2% in the Russell/Nomura Small Cap Index and a fall of 20.3% in the Target Index + 2.5%, US Dollar terms.

After a strong rebound in the previous year, the Japanese equity market declined slightly during the reporting year. The market faced several negative factors, such as US interest rates hikes, China's 'zero-COVID-19 policy', the Russia/Ukraine conflict and global inflation. However, there were also positive factors, such as strong corporate earnings, stable political leadership, a successful Tokyo Olympics Games during pandemic and the economic reopening.

The main contributors to performance during the year were Toppan Forms (business process outsourcing), Central Glass (chemicals), Nexon (video games), Nippon Soda (chemicals) and Isetan Mitsukoshi (department stores). Toppan Forms jumped as its parent company announced that it would acquire all of Toppan Forms shares. Our main catalyst for purchasing Toppan Forms was the potential for the tender offer from its parent company, although the announcement materialised later than expected. Nevertheless, the fund secured a decent return from the investment. We bought Central Glass at an attractive price when investors were avoiding the company, due to its loss-making glass business. After several management meetings, we confirmed that the company was shifting its business focus from glass to chemicals. The share price rebounded strongly after the company said it would exit the glass business and announced a large share buyback. Shares of Nexon rose sharply on strong quarterly earnings following the successful launch of a new mobile game. Nippon Soda rose from low valuation levels, due to a strong earnings outlook and a significant dividend hike. Isetan Mitsukoshi surged as its stores benefited from a rebound in spending by wealthy Japanese shoppers following the pandemic. We sold the holding in Toppan Forms and trimmed the positions in Central Glass, Nexon, Nippon Soda and Isetan Mitsukoshi.

The main detractors during the year were Demae-Can (food delivery), Nitto Boseki (electronic materials), Gakken (nursing homes), Harmonic Drive Systems (robotics) and Hikari Tsushin (electricity services). We had multiple management meetings with all the companies and re-confirmed our convictions in them. We increased the holdings in Demae-Can, Nitto Boseki, Gakken, Harmonic Drive Systems and Hikari Tsushin as their risk/return profiles became more favourable.

We added to positions in Asahi Intecc (healthcare), Gakken, Kyorin (pharmaceuticals), Harmonic Drive Systems, Shinmaywa Industries (trucks), Mandom (cosmetics), Central Security Patrols (security services), Nitto Boseki, Pigeon (baby products), Tachi-S (automotive parts), Sawai (generic drugs) and Taisho Pharmaceutical. We found their risk/return profiles attractive after holding management interviews.

New investments included Hikari Tsushin, Life (supermarkets), Nexon, Oracle (software), Toyo Suisan Kaisha (food), Demae-Can, Lifenet Insurance (online insurance), SKY Perfect JSAT (satellite television), Fujitsu General (air-conditioning), Mixi (video games), Infocom (information technology services), Fuji Oil (chocolates), Relo (employee benefits), Tokyo Century (leasing), Benefit One (outsourcing and benefit services), Iida (housing) and Tsuruha (drug stores). We held multiple management interviews before these purchases.

We reduced the holdings in Koa (electronic parts), Nichicon (electronic parts), Septeni (online advertising), Cookpad (internet recipes), Kura Sushi (restaurants), ULVAC (semiconductors), Sakata INX (inks and coatings), Isetan Mitsukoshi, Nippon Soda, Noritake (electronic materials), Yonex (sportswear and equipment), Yorozu (automotive parts), Daito Trust Construction (apartment builder), Katakura Industries (real estate), Topy Industries (steel products), Central Glass, Nexon and Toyo Denki Seizo (electric parts).

We closed the positions in Ebara (semiconductors), Konami (video games), Descente (sportswear), Tokyo Steel Manufacturing, SCREEN (semiconductor manufacturing equipment maker), Toppan Forms, Neturen (automotive parts), St Marc (coffee shops) and Relo (outsourcing and benefit services).

We believe the Japanese smaller companies market is the most under-researched among developed markets and, therefore, one of the best for active management to generate consistent excess returns. We believe our bottom-up approach, which is based on an intensive management interview programme, gives us a competitive edge. We aim to carry out interviews with all our holding companies each quarter, and rebalance the portfolio based on what we learn. Currently, Japanese smaller companies face major challenges – including an ageing domestic population, rapidly growing neighbouring Asian markets, digitisation, and ESG requirements – although this situation also offers opportunities. We expect many Japanese smaller companies to undergo drastic transformations over the next five years, which should offer attractive investment opportunities.

# Japanese Smaller Companies Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the Russell/Nomura Small Cap Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least two-thirds of its assets in a concentrated portfolio of shares (equities) and equity-related securities of smaller companies, in any industry, in Japan.

The fund is actively managed with reference to the Russell/Nomura Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager believes in-depth stock analysis, coupled with superior stock picking are the main drivers of superior long-term performance in Japanese smaller companies. The fund is designed to capture the undervalued growth potential of Japanese smaller companies by typically investing in the smallest 25% of listed Japanese companies by market capitalisation using a disciplined, pragmatic and risk-aware investment process. The investment approach focuses on stock valuation, investment catalysts and long-term structural growth to drive earnings and returns.

## Performance history (unaudited)

# Pan European Absolute Return Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

John Bennett and Robert Schramm-Fuchs

The fund fell 4.9% (Net) based on Class H1 in Euro terms over the year under review, compared with a fall of 0.6% in the €STR and a fall of 0.2% in the Target Index + 1%, Euro terms.

Look back to July 2021, and stock markets were anticipating the world's post-pandemic recovery. Until the end of 2021, markets continued higher as ultra-low interest rates prevailed and the world shrugged off new COVID-19 variants. It is hard to exaggerate how much has changed since then.

Russia's invasion of Ukraine is the obvious place to start. The invasion, ordered by Russian leader Vladimir Putin, is a human tragedy with huge consequences for Europe as a whole. The biggest is that the conflict has shifted Europe's policy aims at record speed. As we will discuss, this has influenced the fund's positioning.

Even before the conflict in Ukraine, oil prices had started to charge upwards. Brent Crude increased from about US\$70 a barrel in June 2021 to US\$115 a barrel a year later, helping inflation to hit multi-decade highs in the UK and record levels in the Eurozone. To fight this, most central banks have hiked interest rates faster than previously expected. Quite remarkably, European Central Bank rates were still unchanged at the end of June. However, it signalled that it would implement an increase in July, and a subsequent end to negative borrowing costs.

Price-to-earnings ratios compressed quickly in what fast became a rising rate environment. As a result, growth stocks and companies with high valuations suffered badly. As we got further into 2022, data showed a slump in economic growth and recession fears took centre stage. This 'risk off' sentiment caused defensive sectors to hold up better than the wider market. However, richly valued stocks suffered across the board.

The fund's long positions recorded a negative return for the reporting year. Gains on the short side only partially offset these losses, as we started the year comfortably net long. As the macro and economic backdrop worsened, we adjusted the fund's long/short exposure, putting it far closer to parity.

On the long side, positions in the materials and healthcare sectors performed well. In contrast, long positions in the technology, consumer discretionary and financial sectors detracted. Mining company Anglo American and defence company Rheinmetall were among the best performers, helped by strong commodity prices and more appetite for defence spending, respectively. On the other hand, jewellery chain Pandora fell as consumer budgets were squeezed.

On the short side, positions in the industrials and consumer discretionary sector performed well. This was especially true for short positions in a bearings manufacturer and a mineral wool company. We took these two highly valued short positions as our macro view deteriorated.

In terms of activity, we started July 2021 with a long exposure to the 'always looking good' theme. In short, we felt consumer companies would benefit as people flocked back to offices and real-life events. One of our core principles is flexibility in the face of new information. So, as high inflation persisted and started to hit consumers, we pivoted away from this theme and moved the fund to a short position in the consumer discretionary sector.

During 2022, we increased the fund's net positions in energy, renewables, utilities and defence. Russia's invasion of Ukraine reshaped policy priorities in Europe overnight and we wanted exposure to two key trends. The first is that Europe no longer wants to rely on Russia for energy. This will require huge investment in renewable energy and different sources of gas, such as liquefied natural gas. The second is Europe's new-found enthusiasm for the North Atlantic Treaty Organization's defence spending targets.

During the year, it became obvious that richly valued companies were struggling. This was true even for quality companies in the most defensive sectors. As a result, the fund's long exposure became more skewed towards companies that trade at lower valuations. The short book continued to focus on consumer discretionary and late-cycle stocks in general.

Historically, monetary environments like the one that could emerge in the third quarter of 2022 have not been great for equities. In saying that, we feel that returns could be less negative than in the first half of 2022. We also think there are some opportunities with great historical track records for the long book in which to deploy capital.

As our longer-standing investors will be aware, we place a great deal of emphasis on the share price action in capital goods and semiconductors. The old adage says to buy the former when the bellwethers in the peer group first report a negative organic growth quarter in a business cycle. In our view, this could happen as soon as the upcoming second-quarter reporting season.

The drawdown in semiconductors has neared those seen in the great financial crisis and the technology crash of 2001-02. A complete Russian gas supply stoppage to Europe may trigger a comparable scenario, although we feel that much of the bad news could already be priced in. There is a possibility that, like the COVID-19 crisis in March 2020, markets could trough quite soon after the facts are established. In the case of Russian gas, this could happen when the Nord Stream 1 gas pipeline is scheduled to come back online following its annual maintenance.

# Pan European Absolute Return Fund

## Investment objective and policy

The fund aims to provide a positive (absolute) return, regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period and, particularly over the shorter term, the fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform €STR by at least 1% per annum, after the deduction of charges, over any 3 year period.

The fund invests in shares and makes extensive use of derivatives (complex financial instruments) to take both 'long' and 'short' positions in companies the Investment Manager believes will either rise in value (long positions) or fall in value (short positions) meaning that the fund may benefit from either scenario.

The fund will hold a significant proportion of its assets in cash and money market instruments as a result of holding derivatives and for when the Investment Manager wishes to take a defensive stance. Conversely, the fund may also employ 'leverage' (so that the fund can invest a greater amount than its actual value) when the Investment Manager has greater confidence in the opportunities available.

Typically, at least two-thirds of the exposure to the long and short positions (in aggregate) will be to companies of any size, in any industry, in Europe (including UK). Companies may be located or do most of their business in this region. The balance of the long and short exposure may be to companies outside this region.

The fund is actively managed with reference to €STR as this forms the basis of the fund's performance target and the calculation of performance fees (if applicable). For currency hedged share classes, the rate that corresponds with the relevant share class currency is used as the basis of the performance comparison and for calculating performance fees. The Investment Manager has complete discretion to choose investments for the fund and is not constrained by a benchmark.

## Strategy

The Investment Manager targets long-term capital appreciation through exposure primarily to European equities. The Investment Manager selects stocks using a fundamental approach, blended with sector themes. The process results in a high-conviction portfolio with a bias towards long positions (where the manager believes the prospects for the companies are positive), complemented by 'short positions' (where prospects are less positive) and other market hedging securities. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria and support for the UNGC Principles.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%

X2 EUR	2.47%	6.07%	2.49%
X2 HUSD	2.47%	7.10%	2.47%
Z2 EUR	0.09%	0.08%	0.07%

\* The share class closed in the year.

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The TER includes performance fees as at 30 June 2022.

The amounts earned in relation to performance fees for the year are shown in note 6 to the financial statements.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

# Pan European Property Equities Fund

Investment report for the year from 1 July 2021 to 30 June 2022

## Investment Fund Managers

Guy Barnard and Nicolas Scherf

The fund fell by 18.9% (Net) based on Class H2 in Euro terms over the year under review, compared with a fall of 21.7% in the FTSE EPRA Nareit Developed Europe Capped Index, Euro terms.

Despite initial strength, the reporting year proved challenging as markets were shaken by geopolitical worries following the outbreak of the conflict in Ukraine. This, coupled with ongoing supply chain disruption, sustained inflationary impulses and concerns about slowing economic growth, forced investor expectations to be re-based rapidly, most notably around the path of monetary policy.

European property stocks significantly lagged wider equity markets in recent months, posting sharp declines. Real estate shares reacted to an increasingly uncertain environment with the combination of a sharp deterioration in funding costs, higher swap rates higher and widening credit spreads (in some cases significantly). In addition, a potential European recession made rental income streams harder to underwrite. Despite this, underlying property markets saw very strong performance during the year, with values and rental income streams growing in most subsectors, and record results in the logistics and storage sectors. However, the listed market looks forward, not back, and can be seen as a lead indicator for direct property values.

The fund outperformed the benchmark during the year. Key contributors included Secure Income REIT and Safestore in the UK, continental industrial/logistics landlords VIB Vermoegen and VGP, and Spanish diversified landlord Merlin Properties Socimi. An underweight exposure to Sweden and well-timed ownership of Samhallsbyggnadsbolaget i Norden also added material value. Conversely, an underweight allocation to Switzerland was detrimental, as it served as a relative haven. German residential developer Instone Real Estate also detracted, following guidance downgrades amid supply chain and permitting issues.

The portfolio continued to be constructed predominantly around areas of structural growth where we believed that the longer-term drivers of demand could help offset the cyclical impact of a weakening economy. Geographically, UK exposure increased and German exposure declined.

We concentrated the portfolio from 35 names to 31, as we sought to focus on those businesses offering visible and growing income streams and reduced names with greater balance sheet risk. We also sought to manage the top-down macro risks to which we were exposed.

Reflecting these themes and relative valuation considerations, new positions included Land Securities, Tritax Big Box REIT and Workspace REIT in the UK, continental retail landlords Mercialis and Unibail-Rodamco-Westfield, and Norwegian office landlord Entra. We exited a number of holdings, including Deutsche Wohnen, VIB Vermoegen and Hibernia REIT (all subject to bids), office-focused Aroundtown, Nyfosa, Inmobiliaria Colonial, PSP Swiss Property, Great Portland Estates and CLS, and, elsewhere, Warehouses de Pauw, Kaufman & Broad and Samhallsbyggnadsbolaget i Norden.

Looking ahead, while real estate will not be immune to the changing macroeconomic landscape, its ability to provide more dependable income streams, diversification benefits and inflation protection over time should provide some protection. Within the sector, real estate fundamentals are likely to reflect ongoing divergence across different property types in the years ahead, driven by the themes of changing demographics, digitisation, sustainability and the convenience lifestyle. It, therefore, remains important, in our view, to continue to be selective. The importance of management, asset and balance sheet quality are also likely to come to the fore again.

While the direct property market will take time to adjust to higher funding costs, the listed market has already reacted, resulting in shares trading at wide discounts to previous asset values and reflecting a highly uncertain environment. This may overlook the attractive, reliable and growing income streams that many real estate companies can generate for investors. Something which we expect to be rewarded over time.

# Pan European Property Equities Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE EPRA Nareit Developed Europe Capped Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in a concentrated portfolio of shares (equities) and equity-related securities of REITs and companies, which invest in property, in the EEA or the UK if not part of the EEA. Securities will derive the main part of their revenue from owning, developing and managing real estate.

The fund is actively managed with reference to the FTSE EPRA Nareit Developed Europe Capped Index, which is broadly representative of the securities in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager seeks to identify European listed property companies and REITs that can deliver the highest total return over the long-term. The investment process follows a high conviction, 'bottom-up' (fundamental company-level) research approach aiming to identify the best risk-adjusted value from across the capitalisation spectrum.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18 %	1 year to 30 Jun 19 %	1 year to 30 Jun 20 %	1 year to 30 Jun 21 %	1 year to 30 Jun 22 %
Pan European Property Equities Fund	H2 EUR (Net)*	16.77**	2.54**	2.43**	31.93**	(18.94)
FTSE EPRA Nareit Developed Europe Capped Index		8.89	(2.01)	(7.42)	24.97	(21.68)

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 EUR share class.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

# Pan European Smaller Companies Fund

## Investment report for the year from 1 July 2021 to 30 June 2022

### Investment Fund Managers

Ollie Beckett and Rory Stokes

The fund fell 17.6% (Net) based on Class H2 in Euro terms over the year under review, compared with a fall of 18.5% in the MSCI Europe Small Cap Index, Euro terms.

The reporting year was very tough for equity markets and for small-cap stocks in particular. Up to the end of 2021, major stock markets continued to reach record highs as countries emerged from the worst of COVID-19. It is hard to exaggerate how much has changed since then. Russia started a large-scale conflict in mainland Europe. Oil prices went from about US\$70 per barrel in June 2021 to US\$115 a barrel a year later, helping inflation to hit multi-decade highs in the UK and record levels in the Eurozone. In response, global interest rates increased faster than previously expected. By the end of June, the European Central Bank had not followed the Bank of England and Fed in raising rates, although it had signalled a hike in July. Add in natural gas shortages in Europe and growing fears of recession, and it is little wonder most financial assets performed so poorly.

Look closer and several stock market trends emerge. As oil prices rose, energy companies were the standout performers. On the other hand, several technology stocks and so-called pandemic winners failed to justify high valuations and suffered heavy losses. In a rising interest rate environment, price-to-earnings ratios slumped and value stocks outperformed growth ones. As recession fears grew in 2022, defensive sectors held up better than the wider market. This 'risk off' sentiment hit small caps harder than larger companies.

Investment decisions and an overweight position in the financial sector helped the fund's performance. Rising interest rates are generally a positive for banks, and the fund's holdings had strong financial positions on which to fall back should a recession arrive. Rising oil prices helped holdings in geological data company Fugro and liquefied natural gas (LNG) companies Flex and Gaztransport et Technigaz. The LNG holdings also stood to benefit from Europe's long-term need to replace Russian natural gas supply, without relying on dirtier energy sources like coal. Another visible trend was Europe's push towards sustainability, which continued to help holdings in companies such as renewable energy provider Grenergy Renovables and waste-to-product company Renewi.

u-blox performed strongly as demand for its leading internet-of-things microchips continued to grow. Elsewhere, several of the fund's best performers benefited from takeover activity. We sold Brewin Dolphin after it accepted a bid that was 60% higher than the previous share price. Cancer drug specialist Clinigen was also bought out at a premium, while the fund's holdings in Aareal Bank, Biffa and dredging company Boskalis Westminster all benefited from bids. With micro-cap valuations far lower than last year, we would not be surprised if robust takeover activity continues.

The fund's overweight position in the consumer discretionary sector was unhelpful, given its vulnerability to inflation. Holdings in pandemic winners such as online homeware companies Westwing and Nobia were especially weak. HelloFresh, Bike24 and computer accessories company Cherry suffered from tightening budgets and the market's rotation out of growth stocks. We continued to monitor these trends and run a balanced portfolio, assessing each stock on its own merits.

Montana Aerospace fell as it announced worse-than-expected energy cost pressures. Meanwhile, online advertising company Criteo declined with peers, amid tighter advertising budgets and more competition. Criteo also faced uncertainty from forthcoming privacy changes and the potential collapse of a key Russian acquisition due to sanctions.

On the activity front, we added the internet-of-things semiconductor company u-blox. The company has grown impressively and was well-positioned in several exciting markets, such as autonomous vehicles. We also bought Andritz, a leading supplier to hydropower and paper plants. We expected the company to benefit from increased capital expenditure aimed at sustainability in Europe. Other purchases during the year included SigmaRoc, a construction materials company with a strong track record of profitable acquisitions. Sales during the year included the cybersecurity company Avast, which we exited after the company announced a large acquisition. We also sold food-on-the-go business Grencore, as we felt that inflationary pressures could harm the company's results. Other sales included Maisons du Monde, as we wanted to reduce the fund's exposure to furniture and homeware sales.

We expect the rate of inflation in Western economies to start to subside through the middle of 2022, as supply chain shortages begin to clear and as we begin to lap the comparison period of energy price rises. However, our core thesis since the extreme monetary and fiscal policy responses of 2020 was that inflation would settle at a level above that of the past 10 years. In addition, the period of deflation/disinflation that we have seen since the global financial crisis appears to be over due, in part, to a significant capital expenditure cycle in the green transition and digitalisation which has started. For this reason, we believe our valuation-aware, blended-style approach will be better suited to the next market cycle versus the previous one. In the near term, economic momentum is deteriorating and many valuations now imply a severe recession. We think this presents a great opportunity for a bottom-up stock picker taking a longer-term view.

# Pan European Smaller Companies Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the MSCI Europe Small Cap Index, after the deduction of charges, over any 5 year period.

The fund invests at least 75% of its assets in shares (equities) and equity-related securities of smaller companies, in any industry, in the EEA or the UK if not part of the EEA. Companies will have their registered office in the EEA or the UK if not part of the EEA.

The fund is actively managed with reference to the MSCI Europe Small Cap Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager focuses on meetings and calls with company management, along with the use of quantitative filters, to identify potential companies for investment. Emphasis is placed on the robustness of a company's business model, an analysis of what drives the business, what its competitive advantage is, and the sustainability of returns. The fund maintains a well-diversified portfolio of companies which generally fall within the bottom 25% of their relevant market by way of size. The liquidity of the company (the degree to which shares can be quickly bought or sold in the market at a price reflecting its intrinsic value) is important in determining whether to invest and the size of the holding for the fund.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%
Pan European Smaller Companies Fund	H2 EUR (Net)*	4.83**	(5.77)**	(3.14)**	61.51**	(17.55)
MSCI Europe Small Cap Index***		6.82***	(2.83)***	(4.20)***	45.05***	(18.45)****

Please note the performance target is to be achieved over a specific annualised time period. Refer to the performance target section above within the investment objective.

Class H2 EUR is disclosed as it is the representative share class.

\* The representative share class has changed from the A2 EUR to the H2 EUR share class with effect from August 2021.

\*\* The performance history has been restated to reflect the H2 EUR share class.

\*\*\* From 25 February 2022, the fund benchmark changed from the EMIX Smaller European Companies Index to MSCI Europe Small Cap Index. Past performance before 25 February 2022 is shown for the previous fund benchmark.

\*\*\*\* Performance is a blend of the old and new benchmark.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

### Investment Fund Managers

Daniel Sullivan, Darko Kuzmanovic and Tal Lomnitzer

The fund returned 1.3% (Net), 2.5% (Gross) based on Class H2 in Sterling terms over the year under review, compared with a return of 16.3% in the S&P Global Natural Resources Accumulation Index and a return of 19.2% in the Target Index + 2.5%, Sterling terms.

The performance contribution was negative for all three subsectors – metals and mining (-2.1%), agriculture (-0.44%) and energy (-6.5%) – during the reporting year. The fund's exclusion of fossil fuel producers was responsible for a large part of the relative underperformance, with underweight positions in oil and gas producers such as Chevron, ExxonMobil or ConocoPhillips hampering returns the most.

In the mining sector, the strongest contributions came from companies in the electric vehicle and renewable infrastructure value chain, such as lithium developers Lontown Resources, Core Lithium and Allkem. Other large contributors included copper explorer Filo Mining and rare earth producer Lynas Rare Earths. Renewable energy companies fell across the board, with negative contributions from Vestas Wind Systems, Fluence Energy, Bloom Energy and Fastned. In the agriculture space, the strongest contributions came from fertiliser producer Mosaic and food processor/trader Archer-Daniels-Midland.

The fund had overweight holdings in the copper, lithium, rare earths, aluminium, renewable energy, industrial gases, fuel cells, agricultural products/services and sustainable food sub-industries. These positions were counterbalanced by underweight holdings in the integrated oil and gas, oil and gas exploration and production, paper products, steel and iron ore sub-industries. As part of its Article 8 designation, the fund promotes environmental and social objectives via formal exclusion of investment in oil and gas and thermal coal producers, as well as companies that violate United Nations Global Compact principles, alongside positive screening for companies that contribute to sustainability themes.

Near-term economic cyclical risks rose materially, which made June a brutal month for natural resources and capped off a tumultuous 2022 as the market tried to reconcile the effects of the pandemic, unprecedented fiscal/monetary intervention, conflict in Europe and rampant inflation that has caused central banks to reverse easy monetary policies. Hydrocarbon producers were about the only bright spot in the market. While not a certainty, the risk of recession has undoubtedly risen as policy makers have tried to rein in economic growth to control inflation. As ever, China is a key piece of the natural resources puzzle and there has been cause for optimism, with recuperating activity levels offering the prospect of a counterbalance to slower Western demand. To us, it seems that earnings estimates across the market need to reset lower, although there have been pockets of strength within the resources sector. For example, guidance was reaffirmed or lifted in paper/packaging, where companies have exhibited good pricing power. Similarly, we expect industrial gases companies to maintain their pricing power.

The most pressing problem in the world today is the ongoing, unpredictable and heart-wrenching conflict between Russia and Ukraine. We hope that an end is near, although we fear that it has the potential to protract. A de-escalation of the conflict would almost certainly cause a kneejerk fall in commodity prices. Ironically, such a situation would make us more positive on the medium-term outlook for commodity-related equities, as much-needed investment in new capacity would only be further deterred and the global mining industry would simply not be able to ramp up supply to meet growing demand in a recovery. We are positive on the outlook for uranium, lithium, copper and rare earth producers, all areas where we see demand growing ahead of supply and a need for high prices to incentivise investment in new productive capacity.

We responded to this environment by slightly moving up in quality and improved the fund's liquidity profile, and remained wary of companies with a heavy reliance on low-end consumer demand, high wage intensity and exposure to high commodity and logistics inputs. At a fund level, we were very comfortable with weighted average debt-to-equity at a manageable 43%, return on equity of 14.7%, dividend yield of 2.9% and price-to-earnings ratio of 14 times.

The medium-term outlook for metals, energy and agriculture, along with certain industrials (with the potential to change the world for the better), remains, in our view, exciting. While there are pressures on the energy system that will require near-term fixes, such as restarting high-carbon electricity production, there is also a strong incentive to accelerate renewable energy deployment, which is still roughly 40% cheaper than newly built coal or gas-fired power plants and offers security of supply. The fund is well diversified to capture value across the range of opportunities in 'electric' metals (lithium, copper, nickel and rare earths), energy equipment, industrial gases, renewable power development, agricultural products and machinery, ingredients, and sustainable food. The principal driver of stock selection remains bottom-up driven – investing in companies with world-class assets, low costs, growth, strong balance sheets and good or improving ESG profiles. This can be seen in the fund's stronger ESG profile and lower-carbon footprint compared with the benchmark.

# Responsible Resources Fund (formerly Global Natural Resources Fund)

## Investment objective and policy

The fund aims to provide capital growth over the long term.

Performance target: To outperform the S&P Global Natural Resources Accumulation Index by 2.5% per annum, before the deduction of charges, over any 5 year period.

The fund invests at least 80% of its assets in shares (equities) and equity-related securities of companies, whose revenues come mostly from the mining, energy and agriculture sectors, in any country.

The fund is actively managed with reference to the S&P Global Natural Resources Accumulation Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the fund's performance target and the level above which performance fees may be charged (if applicable). The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager focuses on identifying responsible resource companies including those from the mining, energy, and agriculture sectors that are benefiting from the ongoing and future demand for natural resources. The strategy has the flexibility to invest across the supply chain, taking advantage of price shifts between upstream, mid-stream and downstream sectors as well as across industries. The investment process seeks to construct a focused, yet diversified portfolio of high-quality responsible resource companies globally. The fund promotes environmental and/or social characteristics, which include the application of GHG intensity related criteria and support for the UNGC Principles.

## Performance history (unaudited)

Fund & Benchmark		1 year to 30 Jun 18	1 year to 30 Jun 19	1 year to 30 Jun 20	1 year to 30 Jun 21	1 year to 30 Jun 22
		%	%	%	%	%

## Total expense ratio (TER) (unaudited)

	30 Jun 20	30 Jun 21	30 Jun 22
A2 EUR	1.97%	1.97%	1.97%
A2 USD	1.97%	1.97%	1.97%
H2 EUR	1.09%	1.09%	1.09%
H2 GBP	1.09%	1.09%	1.09%
H2 USD	n/a	n/a	1.09%*
I2 EUR	1.00%	1.00%	1.00%
I2 GBP	1.00%	1.15%	1.00%
M2 GBP	n/a	n/a	1.00%*
X2 EUR	3.11%	2.84%	2.52%

\* The share class launched in the year and the rate is annualised, with the exception of the performance fee.

TER is calculated in accordance with AMAS (Asset Management Association Switzerland).

The TER includes performance fees as at 30 June 2022.

The amounts earned in relation to performance fees for the year are shown in note 6 to the financial statements.

Where the total expense ratios exceed the target outperformance relative to the benchmark the return is likely to be below the benchmark return, even when the fund's outperformance target (before the deduction of charges) has been achieved.

# Sustainable Future Technologies Fund

## Investment report for the period from 3 August 2021 to 30 June 2022

### Investment Fund Managers

Richard Clode, Graeme Clark and Alison Porter

The fund fell 30.9% (Net) based on Class H2 in US Dollar terms over the year under review, compared with a fall of 23.3% in the MSCI ACWI Information Technology Index, US Dollar terms.

Given the dual mandate of the fund (aiming to provide capital growth over the long term (five years or more) by investing in technology-related companies that contribute to the development of a sustainable global economy), the positive/negative screening criteria for the portfolio is constructed in a benchmark agnostic manner. The following commentary on fund performance contributors and detractors is provided on an absolute return basis (rather than relative to the benchmark).

The UN Climate Change Conference in November was encouraging as we saw re-engagement from the US, China's commitment to peak emissions and India's plans to start its decarbonisation journey. However, the divergent challenges of the developed and developing world led to a watering down of language to phase out coal use.

The first quarter of 2022 saw a continued shift in global attitudes towards sustainability, catalysed by the Russia/Ukraine conflict, along with proposed regulatory changes across the globe. As the conflict continued in the second quarter, worries about energy and food scarcity, economic growth and inflation made for volatile markets and growing recessionary fears. This catalysed a renewed focus on de-globalisation and supply chain security, in a low-carbon manner.

During the year, our team participated in biodiversity and ecosystems training, where technology was highlighted as key to measuring, assessing, monitoring, assigning responsibility and reducing environmental risk.

Impinj is a leader in radio-frequency identification technology that contributes to reduced overstocking, transportation, wastage and counterfeiting. The company helped the fund's performance thanks to broadening demand and order momentum. Cloudflare operates a global network that delivers security, performance and reliability across information technology environments and allows millions of small businesses get online securely for free. The company posted accelerated revenue growth, driven by strong momentum with enterprise customers. Enphase Energy, a microinverter technology company that is crucial in turning sunlight into a reliable source of energy, enjoyed accelerated demand in Europe, driven by the region's energy crisis. NortonLifeLock, which provides anti-virus and identity protection products, which play a key role in protecting consumers' critical data, benefited from strong fundamentals and valuation resilience in a volatile environment.

Lyft is a leading ride-hailing company committed to 100% electric or zero emission vehicles on its platforms by 2030. It was a headwind to performance, reflecting concerns about consumer spending, driver supply, rising oil prices and higher valuation stocks. Chegg's role in helping lower income students hurt short-term performance, as many students chose not to enrol in new courses and take advantage of strong labour market conditions. Digital payment platform PayPal hurt returns as e-commerce spending moderated coming out of the pandemic, while the shift of eBay's payment platform away from PayPal was faster than anticipated. Infineon Technologies is a leader in power semiconductors, which are key enablers of a lower carbon future by enabling electric vehicles and renewables. Concerns about a drop in cyclical demand across end markets caused the semiconductor industry to underperform the rest of the technology sector.

We initiated a number of positions across our key themes, including data security (Palo Alto Networks and Tenable), low-carbon infrastructure (BE Semiconductor Industries and Synopsys), digital democratisation (TELUS and Adyen), resource and productivity optimisation (ZoomInfo Technologies), clean energy technology (Delta Electronics and Evoqua Water Technologies) and smart cities (Juniper Networks). We exited positions in line with the strategy's valuation discipline and where we found more attractive opportunities elsewhere.

Technology is the science of solving problems and the global challenges that we face require the innovation of the sector to provide solutions. Our eight sustainable technology themes are a positive force across both environmental and social issues. The UN climate conference and government policy in response to the pandemic indicate a growing acceptance that we must address not just climate change but the social challenges emanating from it and the digital divide that became so apparent during the pandemic. The technology sector's innovation, combined with regulatory and government subsidy support, has accelerated the adoption curve of sustainable technologies. This is true not just in clean energy and transport electrification, but also across low-carbon infrastructure, smart cities, health technology, data security, resource and productivity optimisation, and digital democratisation.

As we look to invest in sustainable technology innovation, we are cognisant of a major market inflection after more than a decade of quantitative easing and zero interest rates, following the 2008-09 global financial crisis and, more recently, due to the pandemic. Central bank asset purchase 'tapering' and inflation driving higher interest rate expectations are less supportive of higher duration stocks and unprofitable companies. Our investment philosophy is centred on navigating the technology hype cycle and rigorous valuation discipline focused on unexpected earnings and cash flows. This limits our exposure to those stocks that are more vulnerable to this market inflection, although we still expect volatility given this backdrop.

By investing in a low-carbon, technology-for-good portfolio we can naturally access the largest and longest runway growth markets. In addition, by navigating the hype cycle we can deliver our dual mandate: providing clients with positive environmental and social benefits from the development of a sustainable global economy, as well as the potential for attractive long-term capital returns.

# Sustainable Future Technologies Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in technology-related companies that contribute to the development of a sustainable global economy.

The fund invests at least 90% of its net assets in equities or equity-related instruments of technology-related companies, whose products and services are considered by the Investment Manager as contributing to positive environmental or social change, thereby having an impact on the development of a sustainable global economy. The fund's investment universe is defined by technology-related companies that derive at least 50% of their current or future expected revenues from the sustainable technology themes identified by the Investment Manager (as further outlined in the Investment Strategy section). The fund will avoid investing in companies that the Investment Manager considers could contribute to significant environmental or societal harm. The fund may invest in companies of any size, including smaller capitalisation companies, in any country. Equities may include China A-Shares, directly through the Stock Connect Programs and other eligible exchanges or indirectly through derivative instruments. Exposure to China A-Shares will not be more than 10% of the fund's net asset value (NAV). Equity-related instruments may include depositary receipts. The fund may use derivative instruments (such as futures, forwards, options and warrants) to reduce risk and to manage the fund more efficiently. Under no circumstances shall the use of these instruments and techniques cause the fund to diverge from its investment policy. On an ancillary basis and for defensive purposes, the fund may invest in: investment grade government bonds and associated derivative instruments; cash and money market instruments. The fund follows a sustainable investment approach.

The fund is actively managed with reference to the MSCI ACWI Information Technology Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

## Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to identify undervalued growth companies that are aligned with the UN's Sustainable Development Goals, and derive at least 50% of their current or future expected revenues from the sustainable technology themes the Investment Manager has identified as having a positive impact on those goals. Examples of themes the Investment Manager has identified include clean energy technology, sustainable transport, low carbon infrastructure, digital democratisation, health technology, smart cities, data security and resource and productivity optimisation. The Investment Manager looks to navigate the hype cycle (different stages in the development of a technology from conception to widespread adoption) around technology adoption by assessing the company's fundamental business model and by focusing on companies with high quality management following good governance practices and sustainable barriers to entry, driving longer term unappreciated earnings growth. The fund will avoid investing in companies that the Investment Manager considers could contribute to significant environmental or societal harm.

## Performance history (unaudited)

Fund & Benchmark		Since launch to 30 Jun 22 %
Sustainable Future Technologies Fund*	H2 USD (Net)	(30.90)

# US Sustainable Equity Fund

## Investment report for the period from 3 August 2021 to 30 June 2022

### Investment Fund Managers

Hamish Chamberlayne and Aaron Scully

The fund fell 25.3% based on Class H2 in US Dollar terms over the period under review, compared with a fall of 13.6% in the S&P 500 Index, US Dollar terms.

The reporting year was challenging for US equity markets. The pandemic continued to have an impact, while investor enthusiasm was tempered by growing concerns about inflationary pressures, rising interest rates and geopolitical events such as the conflict in Ukraine. The unfavourable conditions led to a dramatic style rotation. While growth companies outperformed value companies in the first half, they subsequently underperformed significantly, given increasing concerns about consumer confidence and economic activity.

Against this backdrop, it is unsurprising that energy and utilities were the only sectors to deliver a double-digit positive return, while communication services, consumer discretionary and information technology all fell heavily. Stocks that fared well typically had lower price-to-earnings ratios and dividend yields, belonging to businesses with lower profit margins and higher debt. We choose not to invest in companies with these lower-quality corporate fundamentals, and this contributed to the fund's relative underperformance.

From a sustainability perspective, regulators and governments made progress at the United Nations Climate Change Conference, with increased emission reduction efforts from key players, including China and India, and agreement among countries to revisit nationally determined contributions annually rather than every five years. Additionally, the EU, US Securities and Exchange Commission and accounting standards body the IFRS Foundation have increased their efforts to improve corporate climate disclosure levels.

This increasing political support towards a more decarbonised future heightens our belief that the US economy continues to migrate towards greater sustainability. This belief and the traction of the accompanying sustainable development lie at the heart of our strategy. The various dislocations of the US economy this year strengthen our long-term conviction.

Our focus is on finding companies that will both propel and benefit from many of these themes, such as the need for cleaner energy and greater energy security, greater efficiencies through digitalisation and electrification, and more sustainable transport solutions, as well as helping companies and consumers build resilience against the risks that they increasingly face. Equity market environments, as we have experienced in recent months, will not necessarily reward those companies' equity valuations over the shorter term. However, we are hugely encouraged by the operational performance of the fund's holdings and the long-term sustainability trends that drive their growth opportunities.

Much of the weak performance can be attributed to holdings in the technology sector, where the rotation in styles hit the valuations of the fund's semiconductor and software names. Performance also suffered from having no holdings in the energy sector in a rising oil price environment, and stock selection among growth-like companies in healthcare. We explicitly exclude the fossil fuel energy sector from our investment universe. However, avoiding communication services companies such as Meta, Netflix and Walt Disney proved beneficial. Another positive was an overweight allocation to insurance names, which performed strongly due to their pricing power and defensive characteristics.

The leading contributors were Progressive, Humana and Marsh & McLennan. Progressive, a US property and casualty insurer, moved higher in the second half as many of its peers implemented price increases, with the company expected to benefit as customers shopped around. Humana was a relatively strong performer, given its exposure to the defensive characteristics of the healthcare and insurance sectors. The company has a range of clinical capabilities and has met growth in demand for retirees' healthcare by offering affordable products. Marsh & McLennan reported consistently strong results throughout the year. Demand for the insurance to which the company enables access has grown, given the emergence of new risks such as the environmental consequences of climate change, cyber threats and the risks associated with the provision of retirement and healthcare services to an ageing population.

Among the detractors, Autodesk, a design software company, performed well initially, although it was caught in the sell-off of software companies. IPG Photonics, a laser manufacturer, suffered from a slowdown in China and its operations in Russia, although our long-term thesis remained unchanged. Avalara was another higher growth name negatively impacted by shifting interest rate expectations. The tax and compliance software provider posted strong results and was exposed to tailwinds around e-commerce, cloud computing and increasing regulatory complexity.

Activity was limited during the year. We sold the holding in Tesla, after it passed the US\$1trn market-cap threshold, which left its valuation looking stretched. We also sold Orange, Avery Dennison and Accolade, and reinvested the proceeds in other companies with stronger positive impact stories. In addition, we trimmed the holdings in Humana, Adobe and Evoqua Water Technologies, in order to increase exposure to companies that market movements had made more attractive.

Market uncertainty remains. Consequently, our focus is on the fundamental strengths of companies and identifying businesses that will benefit once stability returns. Therein lies the opportunity for the detailed analysis that we carry out.

We focus on trends such as digitalisation, electrification and decarbonisation, which we see as the drivers of the US economy. Our aim is to identify companies that are aligned with and contribute towards a more sustainable economy. We continue to look for companies that have exciting growth prospects because of this transition, and we are enthused by the investment opportunities available to us.

# US Sustainable Equity Fund

## Investment objective and policy

The fund aims to provide capital growth over the long term (5 years or more) by investing in US companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy.

The fund invests at least 80% of its net assets in a concentrated portfolio of equities of US companies, whose products and services are considered by the Investment Manager as contributing to positive environmental or social change and thereby have an impact on the development of a sustainable global economy. The fund will avoid investing in companies that the Investment Manager considers to potentially have a negative impact on the development of a sustainable global economy. The fund may invest in companies of any size, including smaller capitalisation companies, in any industry. The fund may use derivative instruments (such as futures, forwards, options and warrants) to reduce risk and to manage the fund more efficiently. Under no circumstances shall the use of these instruments and techniques cause a fund to diverge from its investment policy. On an ancillary basis and for defensive purposes, the fund may also invest in: investment grade government bonds and associated derivative instruments; Money Market Instruments and cash. The fund follows a sustainable investment approach.

The fund is actively managed with reference to the S&P 500 Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the fund's performance. The Investment Manager has discretion to choose investments for the fund with weightings different to the index or not in the index, but at times the fund may hold investments similar to the index.

### Strategy

The Investment Manager, within its thematic framework of environmental and social themes and positive/negative (avoidance) criteria screening, seeks to construct a differentiated and well diversified portfolio of US companies, based on the belief that superior returns can be generated by companies that are providing solutions to environmental and social challenges. These companies should have attractive financial attributes such as persistent revenue growth and durable cash flows, as well as exhibiting strong management of environmental, social and corporate governance risks. Companies will typically be strategically aligned with themes such as climate change, resource constraints, growing populations, and ageing populations. The fund avoids investing in fossil fuels and companies that stand to be disrupted by the transition to a low-carbon economy.

## Performance history (unaudited)

Fund & Benchmark		Since launch to 30 Jun 22 %
US Sustainable Equity Fund*	H2 USD (Net)	(25.30)
S&P 500 Index		(13.60)

Class H2 USD is disclosed as it is the representative share class.

\* On 3 August 2021, the US Sustainable Equity Fund was launched.

**Past performance does not predict future returns. The performance data does not take account of the commissions and costs incurred on the issue and redemption of shares.**

The presentation of share class names has been revised to remove the additional currency designation included in parentheses, as disclosed in the 30 June 2021 Report & accounts. For example H2 HEUR (EUR) is now disclosed as H2 HEUR.

The currency designation for Chinese currency classes has been revised to RMB from CNY.

### General policies applicable to all sub-funds

To the extent permitted by the section 'Investment Restrictions' of the prospectus, the sub-funds may also invest in either closed-ended or open-ended investment funds, or other transferable securities, including derivatives, which invest in, or provide a return linked to, any of the transferable securities that they are permitted to invest in.

For the purpose of maximising portfolio returns, the sub-funds may also, within the limits set forth in the section 'Investment Restrictions' of the prospectus, engage in a policy of currency hedging and make use of derivatives for efficient portfolio management when it is thought by the Investment Manager to be appropriate.

Further, some of the sub-funds may invest in derivatives within the limits set forth in the section 'Investment Restrictions' of the prospectus in order to enhance returns. All sub-funds may also, to the extent permitted by applicable regulations, on a temporary basis or for defensive purposes, invest in government debt securities.

Where a sub-fund's investment remit is restricted to companies in a particular country or geographical area, a portion of that sub-fund's total assets may be invested in companies domiciled outside of that country or geographical area, respectively, but which derive a significant portion of their revenues and/or profits from operations in that country or geographical area, respectively.

### Cross sub-fund investments

As at 30 June 2022, cross sub-fund investments represented an amount of USD 6,534,917 and therefore the total combined NAV, without cross-investments, would be USD 12,854,175,055.

The following sub-fund held cross investments at the year end:

Global Multi-Asset Fund, which invested in Euro Corporate Bond Fund, Euro High Yield Bond Fund and Global High Yield Bond Fund.

## 2. Presentation of financial statements

The accompanying financial statements present the financial position including the assets and liabilities of the Company and each sub-fund in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements. They are prepared in the designated currency of each sub-fund as stated in the prospectus. The combined statements of the Company are prepared in US Dollars.

The financial statements are prepared on a going concern basis of accounting.

The financial statements include dividend declarations as at the accounting date 30 June 2022. As such the NAVs disclosed throughout the report may differ from those published at the official valuation point on 30 June 2022.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 3. Significant accounting policies

The following is a summary of the significant accounting policies followed by the Company:

#### Valuation of investment securities

The investments within the portfolio of each sub-fund will normally be valued on the basis of either the last available mid-market price (the mid-point between the quoted bid and offer prices) or for certain markets, the last traded price on the principal stock exchange or market on which the investments are quoted, listed or normally dealt in on the relevant business day as at 13:00 Luxembourg time with the exception of (Emerging Market Corporate Bond Fund, Global High Yield Bond Fund, Strategic Bond Fund, Biotechnology Fund, Global Equity Income Fund, Global Multi-Asset Fund, Global Property Equities Fund, Global Smaller Companies Fund, Global Sustainable Equity Fund, Global Technology Leaders Fund, Responsible Resources Fund, Sustainable Future Technologies Fund and US Sustainable Equity Fund, which are valued as at 16:00 Luxembourg time). For the purposes of the financial statements, the investments have been valued on the relevant market or traded price as at 30 June 2022.

The exchange rates used to value the investments of each sub-fund are as the valuation point on or after the dealing cut off on the dealing day concerned.

All other assets, including restricted and not readily marketable securities, will be valued in such manner as the Directors consider appropriate to reflect their fair value. The Company reserves the right to utilise fair value techniques where the underlying markets are closed for trading at the sub-fund's valuation point and where the latest available market prices may not accurately represent the fair value of the sub-fund's holdings due to prevailing market conditions.

Units or shares of a CIS are valued at their last determined and available NAV or, if such price is not representative of the fair market value of such assets, then the price as determined by the Directors on a fair and equitable basis. Units or shares of a listed closed-ended CIS are valued at their last available stock market value.

In the case of short term instruments, the value of the instrument based on the net acquisition cost, is gradually adjusted to the par value price thereof. In the event of material changes in market conditions, the valuation basis is adjusted to the new market yields.

As a result of time variations in certain markets the prices applied to some investments do not necessarily reflect the closing market prices for the same calendar day as the relevant dealing day.

Any difference arising between the cost of securities held at the reporting date and their market value at that date is recognised in the Statement of Operations and Statement of Net Assets.

Realised gains or losses resulting from investments are recognised in the Statement of Operations and Statement of Changes in Net Assets.

#### Private placement investments

A private placement is a private alternative to issuing a publicly offered security as a means for raising capital. In a private placement the sale of securities is made directly by the issuer to a select number of investors without public offering through an investment bank.

Typically, when the sub-fund invests through a private placement, the sub-fund makes a commitment to invest a specified amount of capital in the investee private company in a series of tranches. The capital commitment for the initial and any future closings are triggered following the completion of defined conditions or events.

The sub-fund recognises investment purchases in the financial statements for tranches that completed or became binding transactions prior to the end of the financial reporting year. These are then included in the year end investment portfolio as an investment holding.

Future tranches that have not completed before the year end and are dependent on future events are unfunded commitments and not recognised in the financial statements. These future commitments are disclosed in Note 21.

#### Special purpose acquisition companies

The sub-funds may invest in stock, warrants, and other securities of special purpose acquisition companies (SPACs) or similar entities that pool funds to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC typically invests its assets (less a portion retained to cover expenses) in US Government securities, money market fund securities, and cash. If an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time (typically two years), the invested funds are returned to the SPAC's shareholders. Because SPACs and similar entities are in essence blank check companies without an operating history or ongoing business other than seeking acquisitions, the value of a SPAC's securities is particularly dependent on the ability of the SPAC's management to timely identify and complete a profitable acquisition. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. To the extent the SPAC is invested in cash or similar securities while awaiting an acquisition opportunity, a sub-fund's ability to meet its investment objective may be negatively impacted. In addition, some SPACs may be traded in the over-the-counter (OTC) market and may be considered illiquid and/or be subject to restrictions on resale.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 3. Significant accounting policies (continued)

#### Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the Statement of Net Assets date for the period until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. Open forward foreign exchange contracts are shown in the portfolio statement at fair value.

Unrealised gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Net Assets.

#### Forward foreign currency contracts on hedged share classes

Open forward currency contracts on hedged share classes are shown in the portfolio statement at fair value. The net gains/(losses) on forward currency contracts on hedged share classes are apportioned between hedged income on forward currency contracts in the revenue account and forward currency contracts on hedged share classes in the Statement of Operations and Statement of Changes in Net Assets, reflecting the income and capital elements of the hedged share classes.

Unrealised gains or losses resulting from forward foreign exchange contracts on hedged share classes are recognised in the Statement of Net Assets.

#### Financial futures contracts

Financial future contracts are valued at the exchange quoted price at 13:00 Luxembourg time with the exception of the Emerging Market Corporate Bond Fund, the Global High Yield Bond Fund, the Strategic Bond Fund and the Global Multi-Asset Fund, which are valued as at 16:00 Luxembourg time. Initial margin deposits are made in cash upon entering into financial futures contracts. During the period when the financial future contract is open, changes in the value of the contract are recognised as unrealised gains and losses in the Statement of Net Assets by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the futures margin account in the Statement of Net Assets. When the contract is closed, the sub-fund records a realised gain or loss in the Statement of Operations and Statement of Changes in Net Assets equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

Open financial future contracts are shown in the portfolio statement at fair value.

#### Contracts for difference

Changes in the value of the contracts for difference are recognised as unrealised gains or losses in the Statement of Net Assets by 'marking-to-market' the value at the balance sheet date, using prices supplied by independent pricing services that are based on the closing prices of the underlying securities on the recognised exchanges. When a contract is closed, the difference between the proceeds from (or cost of) the closing transaction and the original transaction is recorded as a realised gain or loss in the Statement of Operations and Statement of Changes in Net Assets.

Open contracts for difference are shown in the portfolio statement at fair value.

#### Options

When a sub-fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an investment. When a sub-fund sells an option, it receives a premium and an amount equal to that premium is recorded as a liability. The investment or liability is adjusted daily to reflect the current market value of the option. If an option expires unexercised, the sub-fund realises a gain or loss to the extent of the premium received or paid.

For the Asian Dividend Income Fund only, option premiums are treated as revenue and distributed accordingly.

#### Swap contracts

Sub-funds may enter into credit default swaps and other types of swap agreements such as interest rate swaps, overnight index swaps, total return swaps, swaptions and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. The premiums received resulting from credit default swaps are recognised under Derivative income/expense in the Statement of Operations. Swaps are OTC investments valued at fair market value as determined in good faith pursuant to procedures established by the Management Company and ratified by the Directors.

#### Realised gains & losses on sale of investments

The computation of realised gains and losses on sales of investments is made on the basis of average cost.

#### Income

Distributions from CIS and dividends receivable from quoted equity and non equity shares are credited to revenue, when the security is quoted ex-dividend. Dividends on unquoted stocks are credited to revenue when the dividend is announced.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 3. Significant accounting policies (continued)

#### Income (continued)

Bank interest and margin interest earned on derivative positions are recognised on an accruals basis. Positive margin interest is disclosed under the caption 'Derivative income' and any negative margin interest is disclosed under 'Derivative expense' in the Statement of Operations.

Bond interest and interest from certificates of deposit are accrued on a daily basis.

Treasury bills purchased at a premium can result in a negative revenue stream at maturity.

Long positions held on contracts for difference are subject to financing costs. Interest is calculated and charged on a daily basis on the contract value. Similarly if short positions are held, interest will be paid or received and recorded as 'Interest received/paid on contracts for difference' within the Statement of Operations, depending on its nature and may be further influenced by the monetary policy adopted in each jurisdiction.

Special dividends are recognised as either revenue or capital depending on the nature and circumstances of the dividends receivable.

Dividend, REIT and interest income is disclosed net of withholding tax (WHT) where applicable.

Dividend charges or credits are used to ensure that the contracts for difference mirror the value of the underlying stock when a dividend is announced. If a long position is held, a payment will be received on the ex-dividend date and is reflected within 'Derivative income' in the Statement of Operations. If a short position is held, a charge is deducted on ex-dividend date and is reflected within 'Derivative expenses' in the Statement of Operations.

Where the sub-fund invests into a CIS, management fee rebates may be received from Investment Managers and are recognised when the entitlement arises, as either income or capital in accordance with the treatment of the management fee charged on the underlying CIS. Capital management fee rebates are reflected in the Statement of Operations under 'Net realised gain on investment securities' and income management fee rebates under 'Other income'.

Revenue derived from the realised and unrealised gains/losses on hedged class forward currency contracts is allocated to both the capital and revenue of the share class based upon the prior day capital/revenue split.

If an option is written for revenue generation purposes for the Asian Dividend Income Fund then its premium is deemed part of the revenue of the fund and is considered distributable.

#### Securities lending

The Company has entered into a securities lending programme with J.P. Morgan SE acting as the Securities Lending Agent for the purposes of efficient portfolio management and in order to generate additional revenue. As part of this agreement the sub-funds can reinvest collateral and enter into reverse repurchase agreements.

The Securities Lending Agent shall ensure that sufficient value and quality of collateral is received before or simultaneously with the movement of loaned collateral. This will then be held throughout the duration of the loan transaction and only returned once the lent asset has been received or returned back to the relevant sub-fund. The Securities Lending Agent will also monitor and maintain all operational aspects of the assets while they are on loan.

Securities lending revenue is accounted for in the Statement of Operations within 'Other income'.

#### Designated currencies

As permitted by Luxembourg Law, the accounts and records of the Company are maintained in US Dollars with the exception of the Euro Corporate Bond Fund, the Euro High Yield Bond Fund, the Total Return Bond Fund, the Euroland Fund, the European Growth Fund, the Pan European Equity Fund, the Pan European Absolute Return Fund, the Pan European Property Equities Fund and the Pan European Smaller Companies Fund which are maintained in Euros. The base currency of Global Multi-Asset Fund is Sterling and the base currency of Japan Opportunities Fund and Japanese Smaller Companies Fund are in Japanese Yen.

Transactions carried out in any other currency other than US Dollars, which is the designated currency of the Company, are translated at the exchange rates ruling at the transaction date. Assets and liabilities are translated at the exchange rates ruling at the Statement of Net Assets date.

When the designated currency of a sub-fund is not US Dollars, the difference between the opening net assets converted at exchange rates ruling at the beginning of the year, and closing net assets converted at exchange rates ruling at the end of the financial accounting year are disclosed in the Combined Statement of Changes in Net Assets as 'exchange rate effect on opening net assets'.

#### Hedged share classes

Any gains or losses that are incurred as a result of the hedging transaction will accrue to the relevant share class only.

The value of the share class to be hedged will be made up of both capital and income elements and the Investment Manager intends to hedge between 95-105% of the value of each hedged share class. Adjustments to any hedge to keep within this target range will only be made when the required adjustment is material. As such the hedged class shares will not be completely protected from all currency fluctuations.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 4. Swing pricing adjustment

The Company operates a swing pricing policy, the threshold of which is determined by the Directors.

The Directors have implemented a swing pricing policy to protect existing shareholders from the dilution effects they may suffer as a result of dealing activity by other Investors in a particular sub-fund. The swing pricing policy gives the Directors the power to apply a swing price adjustment to the NAV per share to cover dealing costs and to preserve the value of the underlying assets of a particular sub-fund.

The sub-funds operate a partial swing pricing mechanism, where the NAV per share will only swing when a predetermined threshold (the swing threshold) is exceeded at each dealing day. The swing threshold level is approved by the Directors at their discretion to ensure that those flows that would represent a significant amount of dilution in a particular sub-fund are captured. The Directors may decide to adjust the swing pricing mechanism in exceptional circumstances to protect the interests of remaining shareholders.

If the net dealing on any dealing day is greater than the swing threshold, the NAV per share will be adjusted up or down dependent on aggregate net transactions on any given dealing day. It will increase the NAV per share when there are net inflows into the sub-fund and decrease the NAV per share when there are net outflows from the sub-fund. The same swing price adjustment will be applied to all share classes within the relevant sub-fund, therefore all transacting investors in the relevant sub-fund, whether subscribing or redeeming, will be affected by the swing price adjustment. It is not possible to accurately predict whether a swing price adjustment will occur at any future point in time and consequently how frequently it will need to be made.

The Directors may also make a discretionary dilution adjustment if the threshold is not met if, in their opinion, it is in the interest of existing shareholders to do so.

During the year under review, swing pricing mechanism has been applied for all sub-funds.

On 30 June 2022, the last working day of the period under review Asia-Pacific Property Income Fund adjusted the NAV per share to an offer basis. The net assets as at 30 June 2022, as disclosed in the Statement of Net Assets, exclude the swing price adjustment. The NAV per share as at 30 June 2022 as disclosed in the net asset value summary, includes the swing price adjustment.

### 5. Exchange rates

The exchange rates used for the conversion into US Dollars of assets and liabilities of each sub-fund denominated in other currencies and with respect to sub-funds whose investment are valued at 13:00 Luxembourg time as detailed in Note 3 to the financial statements as at 30 June 2022 are as follows:

USD 1=AUD 1.4543733	USD 1=IDR 14897.5012037	USD 1=PLN 4.5065653
USD 1=CAD 1.2917663	USD 1=ILS 3.4912052	USD 1=RON 4.7554718
USD 1=CHF 0.9592456	USD 1=INR 78.9725455	USD 1=SEK 10.3083666
USD 1=CNH 6.7066234	USD 1=JPY 136.3850098	USD 1=SGD 1.3924769
USD 1=CNY 6.6942772	USD 1=KRW 1298.4001431	USD 1=THB 35.3550268
USD 1=COP 4117.0017469	USD 1=LKR 358.0003490	USD 1=TRY 16.6287891
USD 1=CZK 23.7850375	USD 1=MXN 20.2245034	USD 1=USD 29.7335059
USD 1=DKK 7.1519538	USD 1=MYR 4.4074660	USD 1=VND 23265.0028871
USD 1=EUR 0.9613924	USD 1=NOK 9.9362876	USD 1=ZAR 16.2962271
USD 1=GBP 0.8258322	USD 1=NZD 1.6091334	
USD 1=HKD 7.8461484	USD 1=PHP 54.9850138	

With respect to sub-funds which are valued at 16:00 Luxembourg time as detailed in Note 3 to the financial statements the rates of exchange as at 30 June 2022 are as follows:

USD 1=AUD 1.4487524	USD 1=IDR 14897.5008127	USD 1=PLN 4.5097645
USD 1=CAD 1.2894792	USD 1=ILS 3.5022816	USD 1=RON 4.7491266
USD 1=CHF 0.9557624	USD 1=INR 78.9724966	USD 1=SEK 10.2832300
USD 1=CNH 6.6962550	USD 1=JPY 135.9150215	USD 1=SGD 1.3928384
USD 1=CNY 6.6942811	USD 1=KRW 1298.4001004	USD 1=THB 35.3550142
USD 1=COP 4145.0770060	USD 1=LKR 358.0004186	USD 1=TRY 16.6942408
USD 1=CZK 23.7501548	USD 1=MXN 20.2125154	USD 1=USD 29.7335042

USD 1=HKD 7.8464008	USD 1=PHP 54.9849949	

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 6. Fees and operational expenses

#### General

The Management Company and/or the Principal Distributors may discount, or share the whole or any part of the charges or fees outlined below with the Administrator, Registrar and Transfer Agent, Authorised Distributors or other intermediary or investor. In addition, the Management Company and/or the Principal Distributors may waive any of the charges or fees outlined below, in whole or in part, which the Management Company and/or the Principal Distributors are respectively entitled to receive.

Furthermore, the Investment Manager may discount the whole or any part of the charges and fees outlined below to the Authorised Distributor or other intermediary or investor.

#### Allocation of charges and expenses

Each share class of each sub-fund is charged with all costs and expenses attributable to it. Such costs may be amortised over such period as the Directors may determine but not in excess of five years. Costs and expenses not attributable to a particular class or sub-fund are allocated between all of the classes of shares pro rata to their respective NAVs.

In the case of amortised costs allocated pro rata, the Directors reserve the right to recalculate such allocation over the course of the amortisation period if they believe that such is fair and equitable in the light of the changes in sub-funds' respective NAVs.

#### Management fees

The management fee is payable out of the assets of the sub-fund in respect of all share classes. The management fee accrues daily and is paid monthly in arrears to the Management Company.

For the year ended 30 June 2022 the maximum management fees that can be charged as a percentage per annum on the total net assets of the relevant sub-fund, were as follows:

	Class A & X	Class B	Class C	Class GU & E -	Class F -	Class G	Class H	Class I	Class HB IU -	Class M Bond Funds -	Class Q, S, & SB -	Class R

\* The Annual Management Charge (AMC) of the Class A share is 0.75%, Class X is 1.00%.

\*\* Global Equity Income Fund closed on 23 November 2021.

\*\*\* For A and H classes of the Responsible Resources Fund a temporary fee subsidy is applied to these share classes to ensure the ongoing charge figure (OCF) comparability with peer share classes.

\*\*\*\* The Sustainable Future Technologies Fund and the US Sustainable Equity Fund were launched on 3 August 2021.

The management fee for Class Z shares is agreed between the investor and the Company and is not payable out of the total net assets of the relevant sub-fund.

## Notes to the Financial Statements (continued)

### 6. Fees and operational expenses (continued)

#### Performance fees

In consideration of the investment services provided in relation to the relevant sub-funds, the Investment Manager, in addition to the management fee, is entitled to receive out of the assets of the relevant sub-fund a performance fee (excluding the China Opportunities Fund, Global Multi-Asset Fund, Global Sustainable Equity Fund, Sustainable Future Technologies Fund, US Sustainable Equity Fund and the Bond Funds. The performance fee is payable in respect of classes A, E, F, G, GU, H, HB, I, IU, IF, Q, S, SB and X. The basis of the calculation is detailed in the prospectus.

As at 30 June 2022, the following accruals were made for performance fees. There were no performance fees accrued at 30 June 2022 for the remaining share classes.

Sub-fund	Share class	Performance fees charged during year*
Euroland Fund	A2 HSGD	EUR 24
	A2 HUSD	EUR 3,133

\* The performance fees are disclosed in accordance with guidelines issued by the European Securities and Markets Authority (ESMA).

The performance fee for the relevant share classes of each sub-fund will be 10% (with the exception of the Biotechnology Fund and the Pan European Absolute Return Fund where the performance fee rate is 20%) of the outperformance of the share class relative to the hurdle rate, subject to the high water mark.

The hurdle rate is a rate of return that the share class must achieve before it can charge a performance fee. It may be a set percentage or it may be referenced to a financial rate or index.

The high water mark means the initial launch price of the share class for the first crystallisation period or, in subsequent crystallisation periods, the NAV at the end of the last crystallisation period where crystallisation occurs and a performance fee is paid. The high water mark is adjusted for any distribution paid.

If the funds underperform in relation to either the hurdle rate or the high water mark, no performance fee is paid.

For all base currency and unhedged share classes, the performance fee will be calculated with reference to the returns of the NAV and the hurdle NAV in the base currency of the relevant sub-fund.

Unhedged share classes may be subject to exchange rate movements which may lead to differences in performance between the relevant unhedged share class and the relevant base currency share class. In certain circumstances, the relevant unhedged share class may incur a performance fee even if the relevant unhedged share class did not receive a positive return.

For hedged share classes, with the exception of the hedged share classes of the Pan European Absolute Return Fund, the performance fee will be calculated with reference to the return of the NAV in the relevant share class currency and the return of the hurdle NAV in the base currency of the relevant sub-fund.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 6. Fees and operational expenses (continued)

#### Performance fees (continued)

For hedged share classes of the Pan European Absolute Return Fund, the performance fee will be calculated with reference to the returns of the NAV and the hurdle NAV in the relevant share class currency.

The performance fee may crystallise at an annual crystallisation period end and on cancellation of shares with the Depositary on a dealing day. Once a performance fee crystallises it is due to the Investment Manager and is paid as soon as practicable. No refund will be made in respect of any performance fee paid out at that point even if the NAV of the relevant share class subsequently falls below the high water mark and/or hurdle rate.

In accordance with the Prospectus, performance fees are taken to capital for the purpose of calculating the distribution.

#### Additional fees and expenses

Additional fees and expenses will be charged to shareholders of share classes C, G, I, M and Q as part of the management fee set out in 'Management fees' on page 280. Any additional fees and expenses that the Company cannot recover from the shareholders of share classes C, G, I M and Q through the management fee shall be borne by the Investment Manager.

Shareholders of share classes A, B, E, F, GU, H, HB, IU, R, S, SB, X and Z will be charged additional fees and expenses in addition to the relevant, 'Management fees' set out on page 280.

The additional fees and expenses which are set out in detail, are:

- Administration fees
- Registrar and Transfer Agent fees
- Depositary and Custody fees
- Shareholder servicing fee
- Distribution fee
- Other expenses
- Collective Investment Schemes
- Directors' fees

#### Administration fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed by the Management Company as Administrator under a fund administration agreement (the 'Fund Administration Service Agreement').

The Administrator is entitled to receive out of the assets of each sub-fund, fees in consideration for providing administration services to the Company along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The fees of the Administrator comprise transaction based fees and asset based fees and do not exceed 0.18% p.a of the total net assets of the relevant sub-fund. The actual fees paid are disclosed in the 'Statement of Operations' and are accrued on a daily basis.

#### Registrar and Transfer Agent fees

International Financial Data Services (Luxembourg) S.A., was appointed by the Management Company as Registrar and Transfer Agent under a registrar and transfer agent agreement (the 'Registrar and Transfer Agent Agreement'). The Registrar Agent is responsible for processing the issue, redemption and transfer of shares as well as the keeping of the register of shareholders.

The Registrar and Transfer Agent is entitled to receive out of the assets of each sub-fund, fees in consideration for providing registrar agency services to the Company along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The fees of the Registrar Agent comprise transaction based fees and asset based fees and do not exceed 0.12% p.a. of the total net assets of the relevant sub-fund. The actual fees paid will be disclosed in the 'Statement of Operations'.

#### Depositary and Custody fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed as Depositary for the Company in order to comply with the UCITS V Directive.

The Depositary is entitled to receive out of the assets of each sub-fund, fees in consideration for providing services to it, along with such out-of-pocket expenses and disbursements as are deemed reasonable and customary by the Directors. The Company will pay to the Depositary a fee for fiduciary services, which is set at a rate of 0.006% per annum of the total net assets of the relevant sub-fund (subject to a minimum fee of GBP 1,200 (USD 1,800) per sub-fund).

BNP Paribas Securities Services, Luxembourg Branch has been appointed by the Company under an agreement (the 'Custodian Agreement') to assure the safe custody of the Company's assets.

The Depositary is also entitled to receive out of the assets of each sub-fund, custody fees comprising asset-based fees and transaction-based fees that vary depending on the market in which a particular sub-fund invests; these fees will not exceed 0.65% per annum of the value of the assets of the relevant sub-fund and GBP 120 (USD 190) per transaction respectively.

Both the Depositary fee and Custodian fee are accrued daily and paid monthly in arrears.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 6. Fees and operational expenses (continued)

#### Shareholder servicing fee

A shareholder servicing fee is payable from the assets of each sub-fund at the rate of 0.50% per annum for share classes A, F and X and 0.30% per annum for share classes H and SB of the Regional and Specialist Funds (except for the Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond Funds of the sub-funds average total net assets. This fee is accrued daily and payable monthly in arrears. This fee is payable to the Principal Distributors for the provision of the following services; responding to existing investors' queries, maintenance of records of shareholders' accounts, issuance and delivery of periodic account statements to shareholders and assistance in handling purchases, exchanges and redemption of shares.

No shareholder servicing fees are payable in respect of all other share classes of the relevant sub-funds.

#### Distribution fee

A distribution fee is payable on class X shares from the assets of each sub-fund at the annual rate of 0.6% per annum for the Regional and Specialist Funds, and 0.35% per annum for the Bond Funds of the relevant sub-fund's average total net assets. The distribution fee is accrued daily and payable monthly in arrears. The fee is payable to the Authorised Distributor as compensation for providing distribution-related services to the sub-funds with respect to share class X.

#### Other expenses

The Company will also pay, as far as allowable under applicable regulations, all other operating expenses, which include, without limitation, taxes, expenses for legal and auditing services, printing shareholders' reports, prospectuses, all reasonable out of pocket expenses incurred by the Directors, registration fees and other expenses payable to supervisory and local authorities, regulatory and tax representatives appointed in various jurisdictions, insurance, interest costs, brokerage fees and costs. The Company will also pay fees or other charges levied in respect of the provision and use of benchmarks, dividend and redemption payment costs and the costs of publication of the NAV or other sub-fund information, including, but not limited to, that required to be published by any regulatory authority.

#### Collective Investment Schemes

Where a sub-fund may invest all or substantially all of its assets in CIS, there may be additional costs of investing in the underlying funds (underlying funds' TERs) which could increase the TER and/or the Ongoing Charges of the sub-fund. Accordingly, the sub-fund's TER and/or Ongoing Charge will include a synthetic element reflecting these underlying funds' TERs and all share classes of the sub-fund will incur such additional costs.

When investing into other CIS managed by a Janus Henderson Group plc company, there will be no double charging of management fees.

#### Directors' fees

Those Directors who are not employees of Janus Henderson Group plc and its affiliates may each receive an annual fee out of the assets of each sub-fund, which shall be approved by the shareholders. The Directors' fees paid during the current year are disclosed in note 14, Transactions with connected persons.

#### Initial charge

The Principal Distributor is entitled to receive an initial charge which, unless otherwise notified, will not exceed 5% of the total amount invested by an investor (which equals a maximum of 5.26% of the NAV of the shares).

Further details can be found in the section 'Fees, Charges and Expenses' of the prospectus.

#### Formation costs

There were no formation expenses charged in the year.

### 7. Taxation

Under Luxembourg tax law, there are no Luxembourg income, withholding or capital gains taxes payable by the Company. The Company will, however, be subject to the tax on Luxembourg undertakings for collective investment (Taxe d'abonnement), calculated and payable quarterly, on the aggregate NAV of each sub-fund at the end of each quarter being 0.01% per annum on share classes E, G, GU, I, IU, B, C, M and Z and 0.05% per annum on all other share classes. No such tax is due on the portion of the Company's assets invested in other Luxembourg undertakings for collective investment. The benefit of the 0.01% tax is available to share classes E, G, GU, I, IU, B, C, M and Z on the basis of the Luxembourg legal, regulatory and tax provisions as these are known to the Company at the balance sheet date and at the time of admission of subsequent Investors. However such assessment is, for the past and for the future, subject to such interpretations on the status of an institutional investor by any competent authorities as will exist from time to time. Any reclassification made by an authority as to the status of an investor may submit the entire share classes E, G, GU, I, IU, B, C M and Z to a tax of 0.05%.

No stamp duty or other tax is payable in Luxembourg on the issue of shares in the Company.

Capital gains, dividends and interest on securities issued in other countries may be subject to withholding and capital gains taxes imposed by such countries.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 7. Taxation (continued)

India operates a taxation regime for short-term and long-term capital gains. As a result of this, the Asian Growth Fund recorded an accrual for Indian capital gains tax payable on Indian securities.

### 8. Share class details

The Company offers 5 sub-classes. These sub-classes of shares are abbreviated in the Financial Statements as A1, A2, A3, A4, A5, etc. Classes C, M, N, Q, S and Z offer only accumulation shares. Class B and Class R Distribution shares are only available on the European Growth Fund. The fee structure is described in Note 6.

Sub-class 1 shares - This share class distributes substantially all of the investment income for the relevant accounting period after the deduction of fees, charges and expenses. Distributions will not include realised and unrealised capital gains.

Sub-class 2 shares - This share class does not distribute gross income, net realised and unrealised capital gains but instead accumulates it, thereby increasing the capital value of the share class.

Sub-class 3 shares - This share class distributes substantially all of the investment income for the relevant accounting period before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expenses may be deducted from capital and may also include realised and unrealised capital gains.

Sub-class 4 shares - This share class distributes substantially all of the investment income over the relevant accounting period and potentially a portion of capital before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expense may be deducted from capital and will also include realised and unrealised capital gains and may include original capital invested.

Sub-class 5 shares - This share class distributes substantially all of the investment income over the relevant accounting period and potentially a portion of capital before the deduction of fees, charges and expenses. To allow more investment income to be distributed, fees, charges and expense may be deducted from capital and will also include realised and unrealised capital gains and may include original capital invested.

Distribution share classes may differ in terms of their distribution frequency. Distribution share classes may distribute monthly, quarterly, semi-annually or annually determined at the launch of the relevant share class. Where a monthly, quarterly or semi-annual is available, it will be expressed with the suffix 'm', 'q' or 's', respectively.

All shares of the Company are fully paid shares of no par value and at any time are equal to the total net assets of the sub-funds. Regardless of its NAV per share, each share is entitled to one vote at all meetings of the shareholders.

Shareholders may switch all or part of their shareholdings from one or more of the sub-funds into the same share class of one or more of the other sub-funds on any dealing day.

Switches into share class HB are restricted to certain investors who subscribe within a certain period of the launch date of the relevant sub-fund. The share class will be offered for a restricted time only. Any investors who have subscribed to these share class can continue investing in these share class even after the initial subscription period has passed. In addition, switches into share classes H and HB are restricted to certain countries, through specific Authorised Distributors which, according to their regulatory requirements or based on individual fee arrangements with their clients, do not keep trail commission, rebates or retrocessions.

Switches into share classes E, G, GU, I, IU, B, C, M and Z are only permitted if the investor switching into them is an institutional investor within the meaning of Article 174 of the law.

Switches into share classes G and GU are restricted to investors with a minimum total investment in funds of the Company of €1,000,000,000 (or the equivalent in another currency) at the time of the initial investment.

Switches from or into a BRL hedged share class are not permitted.

Share classes B and R are closed to investments from new investors.

An up to date list of the share classes available for the sub-funds can be obtained from the website [www.janushenderson.com/en-lu/investor/documents](http://www.janushenderson.com/en-lu/investor/documents) or from the registered office of the Company.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 8. Share class details (continued)

#### Hedged share classes

The sub-funds may offer hedged share classes in order to mitigate the currency risk between the base currency of the sub-fund and the currency of the hedged share class, with the exception of BRL hedged share class. Where a hedged share class is available it will be expressed with the pre-fix 'H' immediately before the currency denomination and described for instance as Class A HEUR, Class A HGBP, Class A HUSD, Class A HAUD, Class A HSEK, Class A HCHF etc. The Company's Investment Manager will employ financial instruments, such as foreign exchange forward contracts, as a hedge.

The other characteristics of the hedged share class (e.g. dividend policy, minimum investment, management fee etc) remain the same as those above but their cost is higher due to the cost of the currency hedging.

An up-to-date list of the share classes available for the sub-funds is available at the registered office of the Company.

### 9. Net asset value

The NAV per share of each sub-fund will be expressed in the base currency of the sub-fund, calculated by the administrator on each business day in Luxembourg at each valuation point and on other days as approved by the Board.

The NAV for each share class of each sub-fund is calculated by determining the value of the assets of the relevant sub-fund applicable to that share class, including accrued income, and deducting all liabilities (including all fees and charges) of that share class, and dividing the resultant sum by the total number of shares of that class in the relevant sub-fund in issue or allotted at that time, (the resulting amount being rounded to the nearest two decimal places) to give the NAV per share of each share class of the sub-fund. The NAV per share of each share class within each sub-fund may, at the discretion of the Directors, be rounded up or down to the nearest ten-thousandth of a EUR, USD, GBP, SGD or CHF in the case of each share class denominated in EUR, USD, GBP, SGD or CHF respectively and may be rounded up or down to the nearest hundredth of a JPY in the case of each share class denominated in JPY. Any other currency share class that becomes available will be rounded up or down using similar principles as the above mentioned currencies (at the discretion of the Directors).

Further details on rules that apply in valuing the total assets can be found in the current prospectus.

If the Company had calculated the NAV's solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 30 June 2022. However, these NAVs would not have been significantly different from those shown in the financial statements. The following sub-funds reported a difference in NAV of greater than 0.50%.

Sub-fund	Currency	% difference (in % of NAV)
Euroland Fund	EUR	0.59%
European Growth Fund	EUR	0.89%
Biotechnology Fund	USD	0.87%
Pan European Equity Fund	EUR	0.78%
Global Smaller Companies Fund	USD	1.33%
Global Sustainable Equity Fund	USD	1.10%
Global Technology Leaders Fund	USD	1.25%
Responsible Resources Fund	USD	0.71%
Sustainable Future Technologies Fund	USD	1.56%
US Sustainable Equity Fund	USD	1.31%

### 10. Equalisation

The Company will maintain equalisation accounts in relation to the shares with a view to ensuring that the levels of distribution payable to investors in the shares are not affected by the issue and redemption of, or the switch from or into, shares of those sub-funds during an accounting period. The price at which shares are bought by an investor will therefore be deemed to include an equalisation payment (which will be credited to the relevant equalisation account) calculated by reference to the accrued income of the share class, net of fees, charges and expenses where applicable. The first distribution which an investor receives in respect of such shares following the purchases may include a repayment of capital.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 11. Dividend distributions

#### Dividend reinvestment

The net income of the assets of the sub-fund attributable to the (sub-class 2) share class will not be distributed to shareholders but will be reflected in the NAV per share of the (sub-class 2) share class concerned.

Dividends will be declared in relation to the distribution policy of the share class. Dividends will normally be paid out in share class currency.

During the year from 1 July 2021 to 30 June 2022 dividends were declared and were paid on the following sub-funds:

Sub-fund	Share class	Accounting date	Pay Date	Rate per share in class currency	Shares	Ccy	Amount paid in class currency
<b>Emerging Market Corporate Bond Fund</b>							
<b>Dividend paid</b>							
	A3q USD	30/09/2021	20/10/2021	1.295929	259.42	USD	336

\* Global Equity Income Fund closed on 23 November 2021.

\*\* The Sustainable Future Technologies Fund and the US Sustainable Equity Fund were launched on 3 August 2021.

The Pan European Equity Dividend Fund which closed on 29 June 2012, held a remaining cash balance of €50,881 at 30 June 2022.

### 13. Securities lending activities

The Company has entered into securities lending agreements for a number of equity and bond sub-funds. In return for making securities available for loan throughout the year, the sub-funds that have participated in the program received revenue which is reflected in the Financial Statements of each participating sub-fund under the 'Other income' caption. The Company has appointed J.P. Morgan SE, as agent for the securities lending program. As remuneration for this agency role, J.P. Morgan SE receives a maximum of 8% of the variable fees from the associated program. All securities are fully collateralised.

As at 30 June 2022, the market value of the securities lent is as follows:

Sub-fund	Counterparty Ccy	Total market value of securities on loan	Amount of collateral received	Type of collateral
<b>Emerging Market Corporate Bond Fund</b>

### 14. Transactions with connected persons

During the year under review, the following transactions were entered into by the sub-funds with the following connected persons of the Company:

(1) The Management Company – Note 6 documents the management fees relevant to each sub-fund. The total amounts charged to the sub-fund by the Management Company, during the year in respect of these fees were USD 143,352,053 (June 2021: USD 132,102,803).

(2) Investment Manager - Note 6 documents the percentages of performance fees relevant to each sub-fund. The total amounts charged to the sub-funds by the Investment Manager, Janus Henderson Investors UK Limited (JHIUKL), during the year in respect of these fees were USD 1,538,295 (June 2021: USD 37,554,155).

(3) A shareholder servicing fee is payable to the Principal Distributors from the assets of each sub-fund at the rate of 0.50% per annum for share classes A, F and X and 0.30% per annum for share classes H and SB of the Regional and Specialist Funds (except for the Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond Funds of the sub-fund's average total net assets.

The total amount charged to the sub-funds by the Principal Distributors during the year in respect of these fees was USD 33,495,444 (June 2021: USD 33,012,696).

(4) A Distribution fee on share class X at the annual rate of 0.60% per annum for the Regional and Specialist Funds and 0.35% per annum for the Bond Funds of the relevant sub-fund's average total net assets. The total amount paid by the Company to the Principal Distributor during the year in respect of these fees was USD 1,359,113 (June 2021: USD 1,286,952).

(5) The Directors fees due and paid to the Directors were USD 74,891 (June 2021: USD 164,840).

These transactions have been entered into in the ordinary course of business and on normal commercial terms, negotiated at arm's length and in the best interests of the shareholders.

### 15. Soft commission

The Investment Manager and where relevant, Sub-Investment Managers, use investment research, both internally generated and externally sourced, to inform their decision making.

The Investment Manager, and where relevant Sub-Investment Managers, pay for investment research from their own resources.

For the year ending 30 June 2022 there were no soft commission arrangements on those sub-funds registered with the Hong Kong SFC, as detailed within the Appendix.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 16. Withholding tax reclaims

Fokus claims have been filed in respect of WHT applied on Belgian, Danish, German and Italian dividends for the years 2005 to 2018. Claims received have been reflected in the sub-funds when they are received. Total outstanding reclaims are shown below. The likely outcome of these reclaims cannot be assessed at the current point in time and consequently no amounts in respect of these reclaims have been included in these financial statements. The legal costs of pursuing these WHT reclaims will be borne by the sub-funds.

Should all of the claims be successful, the effect on each of the affected sub-funds (expressed in percentage of Net Assets as at 30 June 2022) would be as follows:

Sub-fund	Total (EUR)	% Weighting of Total Net Assets
Euroland Fund	3,098,612	0.36%
European Growth Fund	284,480	0.83%
Pan European Equity Fund	13,947,542	3.88%
Global Property Equities Fund	138,811	0.01%
Global Technology Leaders Fund	263,545	0.01%
Pan European Absolute Return Fund	1,813,322	0.50%
Pan European Property Equities Fund	582,102	0.11%
Pan European Smaller Companies Fund	2,465,230	0.42%
Responsible Resources Fund	836	0.01%
<b>Sub-funds closed</b>		
Global Equity Income Fund <sup>1</sup>	4,230	0.05%
Pan European Dividend Income Fund <sup>2</sup>	4,731	0.11%
Pan European Equity Dividend Fund <sup>3</sup>	200,232	4.58%
Industries of the Future Fund <sup>4</sup>	3,602	0.13%
World Select Fund <sup>5</sup>	10,235	0.35%

<sup>1</sup> Global Equity Income Fund is closed. The total assets used in the weighting percentage is as at 23 November 2021.

<sup>2</sup> Pan European Dividend Income Fund is closed. The total assets used in the weighting percentage is as at 15 October 2020.

<sup>3</sup> Pan European Equity Dividend Fund is closed. The total assets used in the weighting percentage is as at 29 June 2012.

<sup>4</sup> Industries of the Future Fund is closed. The total net assets used in the weighting percentage is as at 31 January 2012.

<sup>5</sup> World Select Fund is closed. The total net assets used in the weighting percentage is as at 31 March 2017.

### 17. Purchases and sales of securities

Details of purchases and sales transacted at a security level for each sub-fund during the year under review, are available upon request from either the registered or representatives' offices of the Company.

				<b>US Sustainable Equity Fund**</b>	<b>USD</b>
				Commissions	283
				Taxes	-
				Other costs	1
				Total transaction cost	<b>284</b>

The above transaction costs include costs directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

\* Global Equity Income Fund closed on 23 November 2021.

\*\* The Sustainable Future Technologies Fund and the US Sustainable Equity Fund were launched on 3 August 2021.

### 20. Contingent assets, liabilities and commitments

The outstanding commitments as at 30 June 2022 are as follows:

Sub-fund	Amount in Sub-fund Currency
<b>Biotechnology Fund</b>	<b>USD</b>
Clementia Pharmaceuticals (CVR)	34,680
<b>Total contingent assets</b>	<b>34,680</b>

The Clementia Pharmaceuticals (CVR) is a contingent value right which is dependent on the achievement by the end of 2024 of Food and Drug Administration (FDA) approval of a new drug application made by Clementia Pharmaceuticals.

### 21. Unfunded private placement commitments

The Company invests in a number of private placement investments where there are unfunded future commitments at the year end date. These future commitments arise through the tranche structure of the investment process for such securities and are dependent on future events that have not occurred at the year end date. These typically relate to future financial or commercial targets set in the investment agreement with the investee entity and it is not practicable to assign any probability of achieving these in the financial statement disclosures. When the triggers are met, there is a binding commitment to fund the additional purchase, at which point an investment purchase transaction is recognised. Due to the nature of private placements, the free negotiability of these assets is restricted.

As at 30 June 2022, the Company had total unfunded commitments of USD 74,074.

Security	Total commitment	Tranches funded		Tranches unfunded with future closing dates*	
	(USD)	Cost (USD)	% of total commitment	Cost (USD)	% of total commitment
<b>Biotechnology Fund</b>					
Sonoma Biotherapeutics	207,960	133,886	64.4%	74,074	35.6%

\* The conditions for the completion of future commitments are defined milestones documented in each of the related terms and conditions agreements. Janus Henderson has entered into an Investor Rights Agreement in each transaction that restricts disclosure of any non-public information received by Janus Henderson as an investor in each company.

## Notes to the Financial Statements (continued)

As at 30 June 2022

### 22. Financial derivatives

The Company has used financial derivatives for hedging and meeting the investment objectives including risk reduction and implementation of investment policies. Details of individual contracts at market value are shown in the portfolio statements for the sub-funds and the individual derivative underlying exposure position by counterparty at the year-end is summarised below. The underlying exposure, as defined by CESR guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS ("CESR Guidance Document CESR/10-788"), may differ from the market value of the derivative position as presented in the individual sub-fund portfolio statement.

At 30 June 2022, the underlying exposure for each category of derivatives were as follows:

Sub-fund	Fund Currency	Net forward foreign exchange contracts	Net future contracts	Interest rate swaps	Overnight Index Swaps	Options	Credit default swaps	Credit default index swaps	Contract for difference
		'000	'000	'000	'000	'000	'000	'000	'000

### 23. Subsequent events

The legal entity name for Henderson Management S.A. changed to Janus Henderson Investors Europe S.A. on 1 October 2022.

## Audit report

To the Shareholders of  
**Janus Henderson Horizon Fund**

---

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Janus Henderson Horizon Fund (the “Fund”) and of each of its sub-funds as at 30 June 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 30 June 2022;
- the combined statement of operations for the Fund and the statement of operations for each of the sub-funds for the year then ended;
- the combined statement of changes in net assets for the Fund and the statement of changes in net assets for each of the sub-funds for the year then ended;
- the portfolio for each of the sub-funds as at 30 June 2022; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

---

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)  
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative

## Appendix - additional information (unaudited)

As at 30 June 2022

### Securities financing transactions

The sub-funds engage in securities financing transactions (SFTs) (as defined in Article 3 of Regulation (EU) 2015/2365, SFTs include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sellbuy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation (EU) 2015/2365, the sub-funds' involvement in and exposures related to securities lending for the year ended 30 June 2022 are detailed below.

### Global data

The table lists the amount of securities on loan as a proportion of total lendable assets and the sub-funds' AUM as at 30 June 2022:

Sub-fund	Market value of securities on loan (in Sub-fund Currency)	% of lendable assets	% of AUM
Emerging Market Corporate Bond Fund	283,883	1.27	1.23
Euro Corporate Bond Fund	99,153,322	6.37	6.09
Euro High Yield Bond Fund	39,054,225	6.60	6.26
Strategic Bond Fund	22,977,645	7.39	6.89

#### Aggregate transaction data

Eligible collateral types for stock lending and borrowing transactions are approved by the Investment Manager and may consist of (i) cash, (ii) securities issued or guaranteed by a Member State of the OECD or by their local authorities or supranational institutions and organisations with regional, EU and world-wide scope or by Hong Kong or Singapore, generally subject to a minimum long term credit rating of at least A- by one or more major rating agency or (iii) equities. Collateral should be highly liquid and traded on a regulated market. Collateral is subject to a haircut on a sliding scale based on the combination of the underlying instrument being lent versus the asset being received as collateral. The value of collateral required will range from 102% to 110% of the value of the stock on loan.

For the purposes of Hong Kong SFC Appendix E, the quality of any bond collateral held is deemed to be Investment Grade and subject to a minimum credit rating quality rating of a A-.

## Appendix - additional information (unaudited) (continued)

As at 30 June 2022

### Risk policies

The Management Company employs a risk management process that identifies the risks to which the individual sub-funds and the Company taken as a whole are or might be exposed and how such risks are assessed, monitored and managed, ensuring compliance with relevant regulation. This enables it to monitor and measure at any time the risk of the portfolio positions and their contribution to the overall risk profile of the relevant sub-fund, thereby ensuring that the global exposure of the underlying assets, including derivative instruments, shall not exceed the total net value of the relevant sub-fund. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the CSSF, the Management Company reports to the CSSF on a regular basis on the risk management process on behalf of the Company.

### Method

The global exposure of a sub-fund is calculated by using either the commitment approach or Value-at-Risk (VaR) approach by reference to its risk profile. The commitment approach means that financial derivative instruments are converted into the market value of the equivalent position in the underlying asset(s). VaR is a mathematical-statistical concept and is commonly used as a standard measure of risk in the financial sector. The VaR approach is used, in general, for sub-funds using derivative instruments or techniques within their investment strategies to generate additional leverage or market risk exposure.

### Sub-funds using the VaR approach

For such sub-funds, the maximum potential loss that a sub-fund could suffer in normal market conditions within a given time horizon and a certain degree of confidence is estimated. In these calculations all positions in the relevant portfolio are taken into consideration including those undertaken for efficient portfolio management purposes. For the purpose of calculating global exposure by VaR either a relative VaR approach or absolute VaR approach can be used; the selection of relative or absolute VaR methodology is determined by the availability of a reference portfolio appropriate for a sub-fund in meeting its investment objective.

### VaR model

VaR has been calculated using a Monte Carlo simulation approach. As a control mechanism, Monte Carlo results are compared to the parametric model for validation purposes within the daily monitoring process.

### Parameters

The following parameters are applied as a minimum: a one-tailed 99% confidence interval, a holding period equivalent to one month (20 business days), effective observation period (history) of risk factors of at least 1 year (250 business days), quarterly data set updates and daily calculation.

### Limits

For sub-funds which have a suitable reference portfolio, the regulatory limit is that the VaR of the total portfolio's positions shall not be greater than twice the VaR of the portfolio's reference portfolio.

For those sub-funds which are unable or for which it is not appropriate to determine a reference portfolio (e.g. absolute return type funds) an absolute VaR is calculated on all of the portfolio's positions. Absolute monthly VaR on such sub-funds is not to exceed a regulatory maximum threshold of 20%.

## Appendix - additional information (unaudited) (continued)

As at 30 June 2022

### VaR Results - for the year ended 30 June 2022

The VaR method, limits and utilisation of those limits for the year from 1 July 2021 to 30 June 2022 are summarised in the table below:

Sub-fund	Global Exposure Calculation basis	Reference Portfolio	Actual VaR in year			VaR Limit	Utilisation of VaR Limit		
			Minimum	Maximum	Average		Minimum	Maximum	Average
Euro Corporate Bond Fund	Relative VaR	iBoxx Euro Corporates Index	96%	177%	137%	200%	48%	88%	69%
Euro High Yield Bond Fund	Relative VaR	ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged)	89%	119%	106%	200%	45%	60%	53%
Global High Yield Bond Fund	Relative VaR	ICE BofAML Global High Yield Constrained Index (100% Hedged)	90%	135%	118%	200%	45%	67%	59%
Strategic Bond Fund	Absolute VaR	n/a	2%	6%	4%	20%	11%	30%	22%
Total Return Bond Fund	Absolute VaR	n/a	1%	4%	3%	20%	7%	22%	15%
Pan European Absolute Return Fund	Absolute VaR	n/a	3%	14%	6%	20%	13%	69%	29%

### Leverage

For those sub-funds measuring and monitoring global exposure using the VaR approach, the level of leverage arising from the use of derivative instruments is disclosed in the table below as a percentage of each sub-fund's total NAV. The calculation is based on the sum of notional exposures of financial derivative instruments in the investment portfolio including those held for risk reduction purposes.

Please note this level of leverage is explicitly not an investment limit for the relevant sub-fund and will vary over time under differing market conditions to ensure that the relevant sub-fund meets its investment objective.

### Leverage - for the year ended 30 June 2022

Sub-fund	Leverage		
	Minimum	Maximum	Average
Euro Corporate Bond Fund	21%	53%	31%
Euro High Yield Bond Fund	28%	105%	54%
Global High Yield Bond Fund	43%	131%	76%
Strategic Bond Fund	42%	167%	79%
Total Return Bond Fund	192%	540%	315%
Pan European Absolute Return Fund	83%	374%	188%

### Sub-funds using the commitment approach

The global exposure for those sub-funds not specified in the table above has been determined according to the commitment approach during the reporting year from 1 July 2021 to 30 June 2022. For such sub-funds, each sub-fund's total commitment to derivatives is limited to 100% of the relevant sub-fund's total NAV, being quantified as the sum as an absolute value of the individual commitments, after consideration of the possible effects of appropriate netting and hedging arrangements.

### Eligibility for French 'Plan d'Epargne en Actions' (PEA)

A PEA is a French equity savings plan intended to encourage French tax resident individuals to invest in European equities. PEA eligible sub-funds must invest on a permanent basis at least 75% of their assets in PEA eligible securities issued by companies (i) established in a Member State of the EU or in Iceland, Liechtenstein or Norway and (ii) subject to corporate income tax, or an equivalent tax.

## Appendix - additional information (unaudited) (continued)

As at 30 June 2022

### Eligibility for French 'Plan d'Epargne en Actions' (PEA) (continued)

Throughout the year from 1 July 2021 to 30 June 2022, the sub-funds listed below invested more than 75% of their total net assets in PEA eligible securities. As at the date of this report, the sub-funds had the following percentage of their total net assets invested in eligible PEA securities:

Sub-fund	Proportion of PEA eligible securities as at 30 June 2022
Euroland Fund	98.90%
European Growth Fund	88.15%

### Additional information for Hong Kong investors

The additional information in this section is for sub-funds which are authorised by the Hong Kong SFC as at 30 June 2022 to meet the disclosure requirements in Hong Kong.

Note: SFC authorisation is not a recommendation or endorsement of a product, nor does it guarantee the commercial merits of a product or its performance. It does not mean the product is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

As at 30 June 2022 the following sub-funds are not authorised in Hong Kong:

Emerging Market Corporate Bond Fund  
Euro High Yield Bond Fund  
Euroland Fund  
Global High Yield Bond Fund  
Pan European Absolute Return Fund  
Pan European Equity Fund  
Strategic Bond Fund  
Total Return Bond Fund  
Global Equity Income Fund\*  
Global Multi-Asset Fund  
Global Smaller Companies Fund  
Responsible Resources Fund  
US Sustainable Equity Fund

\* Global Equity Income Fund closed on 23 November 2021.

### Collateral

As at 30 June 2022, there was no collateral held or pledged in respect to derivative positions for sub-funds authorised in Hong Kong.

As at 30 June 2022

### Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) for the Year Ended 30 June 2022

The EU Sustainable Finance Disclosure Regulation ('SFDR') (Regulation (EU) 2019/2088) has applied since 10 March 2021. Pursuant to Article 11 of SFDR (Transparency of the promotion of environmental or social characteristics and of sustainable investments in periodic reports), the Manager is required to provide:

- With respect to each Article 8 sub-fund listed below: a description of the extent to which environmental or social characteristics are met; and
- With respect to each Article 9 sub-fund listed below: the overall sustainability-related impact of the sub-fund by means of relevant sustainability indicators.

Please see this information disclosed below for the sub-funds.

In addition, the EU Taxonomy Regulation ('Taxonomy Regulation') (Regulation (EU) 2020/852) establishes a framework for identifying economic activities as environmentally sustainable within the EEA and requires the sub-funds to additionally disclose whether the EU criteria for environmentally sustainable economic activities has been taken into account. This information is set out as follows:

- With respect to each Article 8 sub-fund listed below: the sub-fund promotes environmental or social characteristics and as such, it is required as per Article 6 of the Taxonomy Regulation to state that the 'do no significant harm' principle applies only to those investments held in the strategy that take into account the EU criteria for environmentally sustainable economic activities. It should be noted that the sub-fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment with the Taxonomy Regulation is not calculated. Therefore, the 'do not significant harm' principle does not apply to any of the investments of this strategy.
- With respect to each Article 9 sub-fund listed below: the sub-fund has sustainable investment as its objective. Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. It should be noted that the sub-fund does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment with the Taxonomy Regulation is not calculated.

With regards to the sub-fund's alignment with the Taxonomy Regulation, the technical screening criteria ('TSC') require the availability of multiple, specific data points regarding each investment. During the relevant period, there was insufficient reliable, timely and verifiable data available for the Investment Manager to be able to assess investments using the TSC. In addition, the regulatory technical standards ('RTS') under the SFDR which define the methodology for the calculation of the share of taxonomy-alignment for financial products and the templates for these disclosures will only apply at later stage. Therefore, the Investment Manager has not been able to provide standardised and comparable disclosures on the taxonomy-alignments of the sub-fund.

While there are investments in the sub-fund that may be in economic activities that may contribute to an environmental objective and may, in the future, be eligible to be assessed against the TSC, the Investment Manager is not currently in a position to accurately describe: (i) the extent to which the investments of the sub-fund are in economic activities that qualify as environmentally sustainable and are aligned with the Taxonomy Regulation; (ii) the proportion, as a percentage of the sub-funds' portfolios, of investments in environmentally sustainable economic activities which are aligned with the Taxonomy Regulation (if any); or if applicable (iii) the proportion, as a percentage of the sub-funds' portfolios, of enabling and transitional activities (as described in the Taxonomy Regulation).

Sub-fund Name	SFDR category	SFDR and Taxonomy Regulation disclosures
Emerging Market Corporate Bond Fund Global High Yield Bond Fund Total Return Bond Fund Asian Dividend Income Fund Asian Growth Fund Euroland Fund European Growth Fund Japan Opportunities Fund Asia-Pacific Property Income Fund Biotechnology Fund China Opportunities Fund Global Equity Income Fund* Global Multi-Asset Fund Global Property Equities Fund Global Smaller Companies Fund Japanese Smaller Companies Fund Pan European Property Equities Fund Pan European Smaller Companies Fund	Article 6	<p><b>How sustainability risks are part of the investment process</b></p> <p>The investments underlying the sub-funds do not take into account the EU criteria for environmentally sustainable economic activities, although the Management Company and the Investment Manager have agreed a decision making process that will apply to investment decisions relating to the sub-fund as further detailed in the prospectus.</p> <p><b>The likely impacts of sustainability risks on the returns of the sub-fund</b></p> <p>While the analysis of ESG factors is an integral component across the Investment Manager's investment capabilities and one of a number of inputs to the selection of investments and portfolio construction, the investment process of the Investment Manager is primarily designed to maximise long-term risk-adjusted returns for investors. Therefore, in managing the sub-fund, the Investment Manager does not maximise portfolio alignment with sustainability risks as a separate goal in its own right nor does it precisely attribute the impact of ESG factors on returns for the sub-fund.</p>

## Appendix - additional information (unaudited) (continued)

As at 30 June 2022

### Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) for the Year Ended 30 June 2022 (continued)

Sub-fund Name	SFDR category	SFDR and Taxonomy Regulation disclosures
Euro Corporate Bond Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity and support for the UN Global Compact Principles, as well as the exclusionary screens based on ESG criteria set out below.</p> <p>During the reporting period: The sub-fund has not made any direct investments in corporate issuers that derive any revenue from the manufacturing of controversial weapons, or more than 10% of their revenue from oil sands extraction, thermal coal extraction, arctic oil and gas exploration extraction, tobacco, fur or adult entertainment.</p> <p>The sub-fund has not been invested in companies that were deemed not to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution) throughout the period.</p> <p>As of 30 June 2022 the carbon intensity of the corporate bond portion of the portfolio was 114.63 tCO<sub>2</sub>e/USDm compared to 205.77 tCO<sub>2</sub>e/USDm for the benchmark (Boxx Euro Corporates Index).</p>
Euro High Yield Bond Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity and support for the UN Global Compact Principles, as well as the exclusionary screens based on ESG criteria set out below.</p> <p>During the reporting period: The sub-fund has not made any direct investments in corporate issuers that derive any revenue from the manufacturing of controversial weapons, or more than 10% of their revenue from oil sands extraction, thermal coal extraction, arctic oil and gas exploration extraction, tobacco, fur or adult entertainment.</p> <p>The sub-fund is not invested and has not been invested in UN Global Compact non-compliant corporate issuers throughout the period.</p> <p>As of 30 June 2022 the carbon intensity of the corporate bond portion of the portfolio was 170.73 tCO<sub>2</sub>e/USDm compared to 328.29 tCO<sub>2</sub>e/USDm for the benchmark (ICE BofAML European Currency Non-Financial High Yield Constrained Index (100% Hedged)).</p>
Strategic Bond Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity, political rights and civil liberties and support for the UN Global Compact Principles, as well as the exclusionary screens based on ESG criteria set out below.</p> <p>During the reporting period: The sub-fund has not made any direct investments in corporate issuers that derive more than 10% of their revenue from oil and gas generation and production, oil sands extraction, shale energy extraction, thermal coal extraction and power generation, Arctic oil and gas extraction, tobacco, fur, adult entertainment, gambling or controversial weapons.</p> <p>The sub-fund has not been invested in companies that were deemed not to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution) throughout the period.</p> <p>The sub-fund has not directly invested in sovereign bond issuers that have been sanctioned by the European Union or United Nations and/or that do not score 'free' by the Freedom House Index that promotes political rights and civil liberties.</p> <p>As at 30 June 2022 the carbon intensity of the corporate bond portion of the portfolio was 37.01 tCO<sub>2</sub>e/USDm compared to 291.25 tCO<sub>2</sub>e/USDm for the investment universe (ICE BofA Global Corporate and High Yield Index).</p> <p>The sub-fund is not invested and has not been invested in sovereign bond issuers that have not ratified the Paris Agreement.</p>

As at 30 June 2022

### Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) for the Year Ended 30 June 2022 (continued)

Sub-fund Name	SFDR category	SFDR and Taxonomy Regulation disclosures
Pan European Equity Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity, good health and well-being and support for the UN Global Compact Principles.</p> <p>During the reporting period: The sub-fund has not made any direct investments in issuers that derive more than 5% of their revenue from shale energy extraction, palm oil, arctic oil and gas drilling or exploration, fur, tobacco, or the adult entertainment sector.</p> <p>The sub-fund has not made direct investments in issuers that failed to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution).</p> <p>The Investment Manager has excluded direct investment in the bottom 5% of companies of its reference index (FTSE World Europe Index) when ranked by carbon intensity.</p> <p>The sub-fund has not invested more than 5% of the sub-fund's assets in companies which have a 'High' or 'Severe' ESG rating according to third party external data provider categorisations.</p> <p>The sub-fund has invested at least 5% of the sub-fund's portfolio in companies that are aligned with the UN Sustainable Development Goal of 'Good Health and Well-being' (according to third party external data provider categorisations).</p>
Global Technology Leaders Fund	Article 8	<p>During the reporting period from 1 July 2021 to 30 June 2022, the sub-fund promoted its accessibility and availability of essential services (such as: healthcare, education, finance), environmental and social characteristics through the application of ESG criteria related to GHG intensity and support for the UN Global Compact Principles.</p> <p>During the reporting period: The sub-fund has not invested and has not been invested in UN Global Compact non-compliant companies throughout the period.</p> <p>The sub-fund has not made any direct investment in issuers that derived more than 5% of their revenue from the production of fossil fuels, nuclear weapons, cluster munitions, anti-personnel mines, tobacco, fur and alcohol.</p>
Pan European Absolute Return Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity, support for the UN Global Compact Principles and ESG risk management.</p> <p>During the reporting period: The sub-fund has not taken any long positions in corporate issuers that derive more than 10% of their revenue from thermal coal extraction, shale energy extraction, oil sands extraction, or arctic oil and gas drilling and exploration.</p> <p>The sub-fund has not made direct investments in corporate issuers that failed to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution).</p> <p>The sub-fund has not taken long positions in issuers in the bottom 10% of issuers based on third party ESG risk scoring criteria</p>
Responsible Resources Fund	Article 8	<p>During the reporting period from 25 February 2022 to 30 June 2022, the sub-fund promoted its environmental and social characteristics through the application of ESG criteria related to GHG intensity and support for the UN Global Compact Principles, as well as the exclusionary screens based on ESG criteria set out below.</p> <p>During the reporting period: The Investment Manager excluded all issuers that derived more than 10% of their revenue from the production of fossil fuels.</p> <p>The sub-fund excluded all issuers that are deemed to have failed to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution).</p>

## Appendix - additional information (unaudited) (continued)

As at 30 June 2022

### Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) for the Year Ended 30 June 2022 (continued)

Sub-fund Name	SFDR category	SFDR and Taxonomy Regulation disclosures
Global Sustainable Equity Fund	Article 9	<p>During the reporting period from 1 July 2021 to 30 June 2022, the sub-fund's sustainable investment objective aimed to provide capital growth over the long term by investing in companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change as defined by ten sustainable development investment themes (described below) and thereby have an impact on the development of a sustainable global economy.</p> <p>The ten sustainable development investment themes comprise five environmental themes (cleaner energy; water management; sustainable transport; efficiency; and environmental services) (the "Environmental Themes") and five social themes (health; knowledge and technology; quality of life; safety; and sustainable property and finance) (the "Social Themes", and together with the Environmental Themes, the "E/S Themes").</p> <p>The sub-fund also avoided investments in companies with goods or services that the Investment Manager considered to be causing significant environmental or societal harm.</p> <p>In order to meet the sub-fund's sustainable investment objective, the Investment Manager applied binding criteria to the selection of underlying assets as part of its investment decision making process. These binding criteria included: revenue alignment with one of the ten sustainable development investment themes, exclusionary screening of issuers based on their involvement in certain activities, support for UN Global Compact Principles.</p> <p>During the reporting period: The sub-fund did not make any direct investment in issuers that derived more than 5% of their revenue from alcohol, animal testing, armaments, chemicals of concern, contentious industries, fossil fuels (extraction, refinement, and power generation*), fur, gambling, genetic engineering, meat &amp; dairy production, intensive farming, nuclear power, pornography, or tobacco.</p> <p>The sub-fund has not been invested in companies that were deemed not to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution) throughout the period.</p> <p>* Note that, as of March 2019, the sub-fund holds an investment in a company that has more than 5% revenues from natural gas power generation, however the sub-fund may invest in this company on the basis it is transitioning in alignment with the 2-degree climate transition strategy of the Investment Manager.</p> <p>Investors should note that a specific index is not designated as a reference benchmark to determine whether the sub-fund is aligned with the environmental and/or social characteristics promoted.</p>

### Sustainable Finance Disclosure Regulation (SFDR) and EU Taxonomy Regulation (unaudited) for the Year Ended 30 June 2022 (continued)

Sub-fund Name	SFDR category	SFDR and Taxonomy Regulation disclosures
Sustainable Future Technologies Fund	Article 9	<p>During the reporting period from 3 August 2021 to 30 June 2022, the sub-fund's sustainable investment objective aimed to provide capital growth over the long term by investing in technology-related companies that contribute to the development of a sustainable global economy.</p> <p>The sub-fund uses positive screening criteria across the entirety of the portfolio to ensure that the sub-fund invests in companies that derive at least 50% of their current or future expected revenues attributable to goods and services within the Investment Manager's sustainable technology themes making a positive impact on society and the environment, aligning with the UN's Sustainable Development Goals, which in turn contributes to the six environmental objectives. In addition, it applies negative (avoidance) screening criteria across the entirety of the portfolio to ensure that the sub-fund avoids investing in companies involved in activities that are significantly harmful to society or to the environment.</p> <p>During the reporting period: The sub-fund did not make any direct investment in issuers that derived more than 5% of their revenue from alcohol, animal testing, armaments, chemicals of concern, contentious industries, fossil fuel extraction and refining, fossil fuel power generation, fur, gambling, genetic engineering, meat and dairy production, intensive farming, nuclear power, pornography and tobacco.</p> <p>The sub-fund has not been invested in companies that were deemed not to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution) throughout the period.</p> <p>Investors should note that a specific index is not designated as a reference benchmark to determine whether the sub-fund is aligned with the environmental and/or social characteristics promoted.</p>
US Sustainable Equity Fund	Article 9	<p>During the reporting period from 3 August 2021 to 30 June 2022, the sub-fund aimed to provide capital growth over the long term by investing in US companies whose products and services are considered by the Investment Manager as contributing to positive environmental or social change as defined by ten sustainable development investment themes (described below) and thereby have an impact on the development of a sustainable global economy.</p> <p>The ten sustainable development investment themes comprise five environmental themes (cleaner energy; water management; sustainable transport; efficiency; and environmental services) (the "Environmental Themes") and five social themes (health; knowledge and technology; quality of life; safety; and sustainable property and finance) (the "Social Themes", and together with the Environmental Themes, the "E/S Themes"). The sub-fund also avoided investment in companies with goods or services that the Investment Manager considered to be causing significant environmental or societal harm.</p> <p>In order to meet the sub-fund's sustainable investment objective, the Investment Manager applied binding criteria to the selection of underlying assets as part of its investment decision making process.</p> <p>Throughout the reporting period, no direct investment was made in issuers that derived more than 5% of their revenue from alcohol, animal testing, armaments, chemicals of concern, contentious industries, fossil fuels (extraction, refinement, and power generation), fur, gambling, genetic engineering, meat &amp; dairy production, intensive farming, nuclear power, pornography, or tobacco.</p> <p>The sub-fund has not been invested in companies that were deemed not to comply with the UN Global Compact Principles (which cover matters including human rights, labour, corruption, and environmental pollution) throughout the period.</p> <p>Investors should note that a specific index is not designated as a reference benchmark to determine whether the sub-fund is aligned with the environmental and/or social characteristics promoted.</p>

### Remuneration policy

Following the implementation of the UCITS V Directive from 18 March 2016, all authorised UCITS Management Companies are required to comply with the UCITS Remuneration Code. Under the Code, the Compensation Committee of Janus Henderson Group plc in its oversight of JHIUKL must make relevant remuneration disclosures.

The disclosures must split remuneration between fixed and variable remuneration and must break down remuneration for categories of UCITS Code Staff (defined as all staff whose professional activities have a material impact on the risk profiles of the funds it manages).

The Janus Henderson Group plc Compensation Committee approves the list of UCITS Code Staff annually. In addition, identified UCITS Code Staff are notified of their status and the associated implications annually.

Janus Henderson Horizon Fund is managed by Janus Henderson Investors Europe S.A. (the 'Management Company') which has delegated asset management activities to JHIUKL, which is a subsidiary of Janus Henderson Group plc.

The Compensation Committee of Janus Henderson Group plc has established a Remuneration policy, one of the guiding principles of which is to ensure that the remuneration of its employees is consistent with and promotes sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profiles and required regulations the Management Company and the funds it manages operates under. This policy applies to JHIUKL and Janus Henderson Horizon Fund.

Further information on the Janus Henderson Group plc's Remuneration policy is available in the annual report as at 31 December 2021.

As at 30 June 2022

### Remuneration policy (continued)

Total Remuneration is disclosed in the base currency of the individual sub-fund.

1. This is the actual number of employees who are fully or partly involved in the activities of Janus Henderson Horizon Fund. No attempt has been made to apportion the time spent specifically in support of Janus Henderson Horizon Fund as this data is not captured as part of Janus Henderson Group plc's normal processes.
2. Please note that due to the employment structure and resourcing of the Janus Henderson Group plc, the staff indicated in this table may provide services to other companies in the Janus Henderson Group plc.
3. The remuneration disclosed is only in respect of the provision of services to Janus Henderson Horizon Fund for the year, rather than the total remuneration for the year – for this purpose, remuneration has been apportioned between the provision of services to Janus Henderson Horizon Fund and to other entities in the Janus Henderson Group plc, as follows:
  - in respect of performance fee incentives, 100% of any direct allocations of performance fees generated within each of the sub-funds;
  - in respect of fixed pay and annual/long term incentive bonuses:
    - where fixed pay is directly attributable to each of the sub-funds of Janus Henderson Horizon Fund (for example, fees for Board members of the sub-funds of Janus Henderson Horizon Fund), 100% of those fees;
    - for Fund Managers, pro-rated using the average AUM of the sub-funds of Janus Henderson Horizon Fund managed by the relevant Fund Manager (as a proportion of the total AUM managed by that individual) as a proxy;
    - for other individuals, pro-rated using the average AUM of the sub-funds of Janus Henderson Horizon Fund (as a proportion of the aggregate average AUM of Janus Henderson Group plc) as a proxy.
4. Senior Management includes the Janus Henderson Executive Committee and other Group Board members and the Board of Janus Henderson Horizon Fund.
5. Other Code Staff includes all other UCITS Code Staff not covered by the above, including Fund Managers and Risk Management who manage AUM within the sub-funds.
6. Please note that rounding off of values could lead to a mismatch of individual numbers and their sum.

## General information

Janus Henderson Horizon Fund is an open-ended investment company incorporated in Luxembourg as a SICAV on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986. Potential investors in the United Kingdom are advised that the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Company and that compensation will not be available under the Financial Services Compensation Scheme.

The Company provides a simple and cost effective way of investing in world equity and bond markets and through its twenty eight sub-funds, provides investors with access to twenty two equity sub-funds and six bond sub-funds.

Applications for shares may be made on any business day in Luxembourg to the Registrar and Transfer Agent between 09:00 and 18:00 (local time), or to the Principal Distributor in London between 09:00 and 17:00 (local time). Applications should be made on the application form circulated with the prospectus or by fax, telephone or in writing and may be made in any major currency. If you are sending applications by fax, you should also subsequently send the original form by post. Applications are accepted by telephone only from existing investors who have previously been issued with a Personal Service Number.

For full information, including a copy of the prospectus and the Key Investor Information Document (KIID), please write to the Registrar and Transfer Agent or Distributor at the addresses shown on page 2. Alternatively, visit the Janus Henderson website: [www.janushenderson.com](http://www.janushenderson.com).

INVESTORS

**Past performance does not predict future returns. The value of an investment and the income from it can fall as well as rise significantly. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. Please refer to the prospectus of the UCITS and to the KIID before making any final investment decisions on the Janus Henderson Horizon Fund. For sustainability related aspects please access [www.janushenderson.com](http://www.janushenderson.com).**
