### SUB-FUND SUITABILITY

#### WHO IS THE SUB-FUND SUITABLE FOR?

-The Sub-Fund is only suitable for investors who are more concerned with maximising long-term returns than minimising possible short-term losses.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a fund may not be denominated in the currency of that fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited (“FPIL”) investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

KEY RISKS	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>-The value of an investment is not guaranteed and can go up and down depending on performance. You could get back less than you have paid in. At times, the ILP Sub-Fund may (subject to the Appointed Actuary's agreement and provisions allowed for in the Policy Conditions) need to change the way its price is calculated, to ensure that those moving into and out of the ILP Sub-Fund are treated fairly. This can have a negative effect on the ILP Sub-Fund's price and performance.</p> <p>-Fund managers have the ability, in exceptional circumstances, to suspend trading in their funds for as long as necessary. ### Market and Credit Risks

**Market risks:** The value of investments by the Fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.

**Emerging and Frontier Markets risks:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk

**Equity risks:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

-Refer to the 'Risks' section of the relevant Product Summary for further information.

### Liquidity Risks

**Liquidity risks:** The liquidity of the Fund may be limited if a significant portion of the assets of the Fund is to be sold to meet redemption requests on a short time frame. During this period, the portfolio allocation may be modified to prioritise liquidity.

### Product-Specific Risks

**Counterparty risks:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Fund, potentially creating a partial or total loss for the Fund.

**China Country risks:** Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the Fund.

**Currency risks:** The Fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Derivatives risks:** The Fund may use Financial Derivative Instruments as part of the investment process. The use of futures, options, warrants, forwards, swaps or swap options involves increased risk. The Fund's ability to use such instruments successfully depends on the Investment Manager's ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Investment Manager's predictions are wrong, or if the Financial Derivative Instruments do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used such instruments.

**Leverage risks:** The Fund uses derivatives for Leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.
