SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

-The Sub-Fund is only suitable for investors who are seeking capital appreciation primarily from equity gains and exchange rate movements. Return expectations are offset by high risks in the equity, Interest Rate and currency areas, as well as by credit risks and the possibility of incurring the total loss of capital invested.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a fund may not be denominated in the currency of that fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited ("FPIL") investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

APPENDIX : GLOSSARY OF TERMS

Equities

Ownership positions in companies that can be traded in public markets. Often produce current income which may be paid in the form of dividends. In the event of the company going bankrupt equity holders' claims are subordinate to the claims of preferred stockholders and bondholders.

Expense Ratio

The Expense Ratio provides customers with an indication of the overall costs of investing in a particular fund.

The Expense Ratio as calculated in accordance with the Investment Management Association of Singapore's

guidelines on the disclosure of Expense Ratios. Different methods of calculation of Expense Ratio can be used, including Total Expense Ratio (TER) and Ongoing Charges Figure (OCF) but these are broadly the same.

Interest Rate

The measure of the amount paid to the lender by the borrower in return for the initial loan. For example, if the Interest Rate is 7% and the borrower has borrowed \$100 they will pay interest of \$7 per year. (The average of Interest Rate offered by financial institutions to one another over the short term is known as LIBOR (the London Inter Bank Offered Rate)).

Investment Company with Variable Capital

This is a type of open-ended collective investment.

Ongoing Charges Figure (OCF)

A type of Expense Ratio. The Ongoing Charges Figure is based on expenses for the previous year and is a ratio of the total ongoing charges to the Fund's average net asset value over its last reporting period. This figure may vary from year to year. The charges you pay are used to pay the costs of the underlying ILP sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

For more information about charges, please consult the Prospectus for the underlying fund of the ILP sub-fund invested in, available from <http://www.fpinternational.sg/phs>. Details of the calculation methodology can be found in full at https://www.esma.europa.eu/sites/default/files/library/2015/11/10_674.pdf

Specified Investment Product (SIP)

SIP is a class of investment products defined by the Monetary Authority of Singapore (MAS). Generally, (although not in all instances), financial advisers have to carry out more due diligence, including customer knowledge assessment, when advising about a SIP.

Uncertificated Equity Instruments

Uncertificated Equity Instruments are certificates such as participation and dividend-right certificates. Participation and dividend-right certificates are securities that can be traded on an exchange and which lie somewhere between Equities and bonds due to their construction. They securitise a participation right in the form of an annual distribution based on the net profit of the issuer. They generally do not confer any ownership rights (e.g., voting rights) but grant the holder the right to participate in the net profit and liquidation proceeds and the right to subscribe to new shares in the case of a rights issue.
