SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

-The ILP Sub-Fund is only suitable for investors who seek medium to long-term capital appreciation; and are comfortable with the risks of a fund that invests in a portfolio of Sharia compliant equity and equity-related securities of companies engaged in activities related to gold, silver, platinum, or other precious metals or minerals.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore, we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a fund may not be denominated in the currency of that fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited ("FPIL") investment products are intended for medium to long-term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Market and Credit Risks

Investment risks: The Funds will be investing in assets selected by the Investment Manager or their delegate in accordance with the respective investment policies. The value of investments and the income from them, and therefore the value of and income from Shares relating to each Fund, will therefore be closely linked to the performance of such investments and investors should be aware that the value can go down as well as up. There is no guarantee that the investment objective of a Fund will be achieved.

Equity Markets risks: Investments in equity securities offer the potential for substantial capital appreciation. However, such investments also involve risks, including issuer, industry, market and general economic related risks and adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of equity securities owned by a Fund.

Global Markets risks: The Fund is subject to market risks. Some exchanges on which the Fund invests may be illiquid or highly volatile. A decline in an individual issuer's performance is possible. The Fund may be affected by changes in economic and market conditions, political uncertainties, changes in government policies, legal, regulatory and tax requirements and restrictions on the transfer of capital. It may be at risk of expropriation, nationalisation and confiscation of assets and changes in law on foreign ownership. The trading, settlement and custodial systems in some markets may not be fully developed. Disclosure and regulatory standards may be less stringent in certain less developed markets. There may be less publicly available information or legal protection of investors. The valuation of assets, depreciation, exchange differences, deferred taxation, contingent liabilities and consolidation may differ from international accounting standards.

Liquidity Risks

Liquidity risks: There may be occasions when the manager is unable to sell some or all of the shares within the Fund, which could delay payment or redemption of proceeds.

Product-Specific Risks

Volatility risks: The Fund is subject to markedly increased volatility and the share prices may be subject to substantial fluctuation, even within short periods.

Precious Metals Industry risks: The Fund does not hold physical gold or other commodities. Gold mining and precious metal-related shares tend to be volatile and are particularly suitable for diversification in a larger portfolio. Note that there are special risks inherent in the concentration of fund investments on particular investment sectors, which is not the case for equity funds invested in more than one sector.

Portfolio Currency risks: A Fund's investments and, where applicable, the investments of any collective investment scheme in which a Fund invests, may be acquired in a wide range of currencies other than the Base Currency of the Fund. Changes in the exchange rate between the Base Currency of the Fund and the currency of the asset may lead to a depreciation of the value of the Fund's assets as expressed in the Base Currency.

Sharia Investment Guidelines risks: The Fund may perform less well than other funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria. This may include disadvantageous divestments at the instruction of the advising Sharia scholar. It is intended that the Sharia Investment Guidelines will be complied with at all times, but no assurance can be given as there may be occasions when the Fund's investments do not fully comply with such criteria for factors outside the control of the Company.
