SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

-The Sub-Fund is only suitable for investors with a low aversion to risk and a desire to invest in shares of companies worldwide, active in the forestry value chain.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore, we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited ('FPIL') investment products are intended for medium to long-term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

The standards call for economically appropriate transactions that reduce risk, reduce cost or generate additional capital or income. For example, a currency overlay strategy using Derivative instruments could be used to reduce volatility in asset returns resulting from currency fluctuations or be used to take advantage of these fluctuations to gain extra return.

The Expense Ratio as calculated in accordance with the Investment Management Association of Singapore's guidelines on the disclosure of Expense Ratios. Different methods of calculation of Expense Ratio can be used, including Total Expense Ratio (TER) and Ongoing Charges Figure (OCF) but these are broadly the same.

These charges reduce the potential growth of your investment.
