SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

The ILP Sub-Fund is only suitable for investors who pursue the objective of general capital formation/asset optimisation and/or above average participation in price changes, through investment in Japanese Equity markets. It may not be suitable for investors who wish to withdraw their capital from the Fund within a short or medium timeframe.

It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore, we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

Please note that Friends Provident International Limited (“FPIL”) investment products are intended for medium to long-term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Further Information

-For details of surrender charges refer to the section on ‘Fees and Charges’ in the relevant Product Summary.

- Refer to Appendix 6 Investor Profile of the underlying Fund’s Luxembourg Prospectus for further information on the suitability of the Sub-Fund.

Market and Credit Risks

General Market Risk: The Fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which are partially attributable to irrational factors. Such factors could lead to substantial and longer-lasting drops in prices affecting the entire market.

Emerging Markets Risk: A Sub-Fund's investments in Emerging Markets are subject to greater liquidity risk, currency risk and general market risk. Increased risks may arise in connection with the settlement of securities transactions in Emerging Markets, especially as it may not be possible to deliver securities directly when payment is made.

Country Risk in Japan: The Fund's investments focus on Japan, which may increase the concentration risk. Consequently, the Fund is particularly susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this country, or of companies based and / or operating in this country.

Currency Risk: The Fund may hold assets or have a share class denominated in foreign currencies other than the base currency of the Fund. Accordingly, the Fund is exposed to a currency risk that if these foreign currency positions have not been Hedged or if there is any change in the relevant exchange control regulations, the Net Asset Value of the Fund or Class may be affected unfavourably. Any devaluation of the foreign currency against the base currency of the Fund would cause the value of the assets denominated in the foreign currency to fall.

Liquidity Risks

Liquidity Risk: There may be occasions when the manager is unable to sell some or all of the shares within the Fund, which could delay payment or redemption of proceeds.

-Purchases or sales by the Fund of illiquid securities (securities that cannot be sold readily) can lead to significant price changes.

Product-Specific Risks

Derivatives Risk: The Fund may use derivatives such as futures, options and swaps for efficient portfolio management (including hedging) purposes. This may lead to correspondingly lower opportunities and risks in the general Funds profile. Hedging can be used in particular to reflect the different currency-hedged Share Classes and thus to mark the profile of the respective Share Class. The Fund may also employ derivatives in a speculative sense in order to increase returns in pursuing the investment objective, in particular, to represent the general Fund's profile and to increase the level of investment above the level of investment of a fund that is fully invested in securities.

Sustainable Strategy Investment Risk: The Fund follows a specific sustainable investment strategy which applies either minimum exclusion criteria and/or certain rating assessments, which may adversely affect the Fund's investment performance. The Fund focuses on sustainable investments and has a limited / reduced investment universe, which results in limited risk diversification compared to broadly investing funds. The securities held by the Fund may be subject to style drift which no longer meets the Fund's investment criteria, which may result in the Management Company disposing of such securities when it might be disadvantageous to do so.

The net asset value of the Fund may likely have a high volatility due to the investment policies or portfolio management techniques employed in respect of the Fund.
