SUB-FUND SUITABILITY

WHO IS THE SUB-FUND SUITABLE FOR?

-The ILP Sub-Fund is only suitable for investors who wishes to invest in USD-denominated short-term Debt Securities and Deposits with Credit Institutions and Reverse Repurchase Transactions. Please note the ILP Sub-Fund does not distribute income and where applicable will re-invest any income received from the underlying fund.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a fund may not be denominated in the currency of that fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited (“FPIL”) investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>-The value of an investment is not guaranteed and can go up and down depending on performance. You could get back less than you have paid in. At times, the ILP Sub-Fund (subject to the Appointed Actuary's agreement and provisions allowed for in the Policy Conditions), may need to change the way its price is calculated, to ensure that those moving into and out of the ILP Sub-Fund are treated fairly. This can have a negative effect on the ILP Sub-Fund's price and performance.</p> <p>-Fund managers have the ability, in exceptional circumstances, to suspend trading in their funds for as long as necessary. Market and Credit Risks

<p>Market Risks: The value of the securities in which a Sub-Fund invests changes continually and can fall based on a wide variety of factors affecting financial markets generally or individual sectors</p> <p>Credit Risks: A bond will generally lose value if the issuer's financial health deteriorates, or appears likely to. An issuer could go into default (become unwilling or unable to make payments on their bonds), which often will make the bond illiquid or worthless.</p>	
---	--

Liquidity Risks

<p>Liquidity risks: Certain securities, especially those that trade infrequently or on comparatively small markets, may be hard to buy or sell at a desired time and price, particularly in respect of larger transaction sizes.</p>	
---	--

Product-Specific Risks

<p>Reverse Repurchase Transactions Risks: The counterparty of Reverse Repurchase Transactions may fail to meet its obligations, which could result in losses to the Sub-Fund.</p> <p>Government Debt Risks: Government Debt Securities, including those issued by local governments and government agencies are subject to market risk, interest rate risk and credit risk. Governments may default on their sovereign debt and holders of sovereign debt (including the Sub-Fund) may be requested to participate in the rescheduling of such debt and to extend further loans to the governmental entities.</p> <p>Investment Grade Debt Risks: With Investment Grade Debt Securities, the likeliest form of credit risk is a credit downgrade, which typically will cause a security's value to fall.</p> <p>Below Investment Grade Debt Risks: Below Investment Grade Debt Securities are typically more volatile and less liquid than Investment Grade debt and have significantly greater risk of default.</p>

APPENDIX : GLOSSARY OF TERMS
Asset-Backed Commercial Paper

A short-term investment vehicle usually issued by a financial institution, with a maturity date that is typically between 90 and 270 days.

Debt Security

A debt investment, with which the investor loans money to an entity (company or government) that borrows the funds for a defined period of time at a specified interest rate. The indebted entity issues investors a certificate, or bond, that states the interest rate (coupon rate) that will be paid and when the loaned funds are to be returned (maturity date).

Expense Ratio

The Expense Ratio provides customers with an indication of the overall costs of investing in a particular fund.

The Expense Ratio as calculated in accordance with the Investment Management Association of Singapore's guidelines on the disclosure of Expense Ratios. Different methods of calculation of Expense Ratio can be used, including Total Expense Ratio (TER) and Ongoing Charges Figure (OCF) but these are broadly the same.

Investment Grade

A rating that indicates that a municipal or corporate bond has a relatively low risk of default.

Non-Investment Grade (High-Yield)

Often called junk bonds, these low-grade fixed income securities show significant upside potential. The bond has to pay a higher yield due to having a higher credit risk.

Net Asset Value (NAV)

Net Asset Value is the value of the net assets of the Fund after deduction of all expenses.

Ongoing Charges Figure (OCF)

A type of Expense Ratio. The Ongoing Charges Figure is based on expenses for the previous year and is a ratio of the total ongoing charges to the fund's average net asset value over its last reporting period. This figure may vary from year to year. The charges you pay are used to pay the costs of the underlying ILP sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

For more information about charges, please consult the Prospectus for the underlying fund of the ILP sub-fund invested in, available from <https://www.fpinternational.sg/fund-centre/product-highlight-sheets-phs/index.htm>

Details of the calculation methodology can be found in full at

https://www.esma.europa.eu/sites/default/files/library/2015/11/10_674.pdf

Open Ended Investment Company

An open-ended collective investment vehicle, structured as an investment company, where new shares are created or redeemed, depending on demand from investors.

Repurchase Transaction/Agreement

A financial transaction in which one party sells a security to the other party, with an obligation to buy it back at a specific later date. As the repurchase price is usually greater than the original sale price, the difference effectively represents interest.

Specified Investment Product (SIP)

SIP is a class of investment products defined by the Monetary Authority of Singapore (MAS). Generally, (although not in all instances), financial advisers have to carry out more due diligence, including a customer knowledge assessment, when advising about a SIP.
