**WHO IS THE SUB-FUND SUITABLE FOR?**

-The ILP Sub-Fund is only suitable for investors who seek capital growth over a period of 5 years or longer, via investment in the global Equity market.

-It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

-Please note that Friends Provident International Limited ("FPIL") investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

Through this process, the Investment Manager: (1) avoids investments that are contrary to the goals of making positive contributions to society and/or the environment, taking into account both product based exclusions and conduct based exclusions; (2) predominantly invests in companies that provide sustainable solutions or that make positive contributions to society and/or the environment; and (3) improves companies by selecting those that, in the Investment Manager's opinion, will benefit from active investor engagement, leading to reduced risk, improved performance, best practices and, overall, long-term investor value</p> <p>-The Fund may use Derivatives for the purposes of Efficient Portfolio Management only.</p> <p>-To the extent that the Fund is not fully invested in Equities, the Fund may also invest in other transferable securities, other collective investment schemes, money market instruments, warrants, cash and near cash.</p>	<p>-Refer to the 'Appendix I - Fund Details' section of the underlying Fund's Prospectus for further information on the investment strategy of the Fund.</p>

KEY RISKS	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>-The value of an investment is not guaranteed and can go up and down depending on performance. You could get back less than you have paid in. At times, the ILP Sub-Fund (subject to the Appointed Actuary's agreement and provisions allowed for in the Policy Conditions), may need to change the way its price is calculated, to ensure that those moving in and out of the ILP Sub-Fund are treated fairly. This can have a negative effect on the ILP Sub-Fund's price and performance.</p> <p>-Fund managers have the ability, in exceptional circumstances, to suspend trading in their Funds for as long as necessary. **Market and Credit Risks**

**Emerging Markets risks:** This Fund invests in emerging markets which are less developed and have additional legal and political risks. Investments in emerging markets may be more volatile than investments in more developed markets. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets.

**Investment risks:** The investments of the Fund are subject to normal market fluctuations and other risks inherent in investing in securities. There can be no assurance that any appreciation in the value of investments will occur. The value of investments and the income derived from them may fall as well as rise and investors may not recoup the original amount they invest in the Fund. There is no certainty that the investment objective of the Fund will actually be achieved and no warranty or representation is given to this effect.

-Refer to the 'Risks' section of the relevant Product Summary for further information.

**Liquidity Risks**

**Liquidity risks:** There may be occasions when the manager is unable to sell some or all of the shares within the Fund, which could delay payment or redemption of proceeds.

**Product-Specific Risks**

**Foreign Exchange risks:** Currency fluctuations may adversely affect the value of a Fund's investments and the income thereon, and, depending on an investor's currency of reference, currency fluctuations may adversely affect the value of his/her investment in Shares.

**Derivative risks:** Derivative values rise and fall at a greater rate than Equities and Debt Instruments. Losses can be greater than the initial investment

**Ethical Screening risks:** The screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened Fund.
