### SUB-FUND SUITABILITY

#### WHO IS THE SUB-FUND SUITABLE FOR?

The ILP Sub-Fund is only suitable for investors who seek capital appreciation over the medium term through investment in Brazilian Equities.

It is important to remember that, as with most investments, the value of your investments are not guaranteed and can go down as well as up. Therefore we suggest that you only invest money that can be committed for the medium to long term. You should also bear in mind that securities held within a Fund may not be denominated in the currency of that Fund, so unit prices may fall purely on account of exchange rate fluctuations.

Please note that Friends Provident International Limited ("FPIL") investment products are intended for medium to long term investment and are not therefore designed for early surrender. If you do surrender early, a product surrender charge may be applied. Please note that the earlier you terminate your plan, the more you may lose.

### KEY FEATURES OF THE SUB-FUND

#### WHAT ARE YOU INVESTING IN?

You are investing in an ILP Sub-Fund that invests in the BNP Paribas Funds Brazil Equity Fund\* ("the Fund" or "underlying fund"), apart from a proportionately small amount which may be held in cash to optimise dealing efficiencies in the underlying fund. We endeavour to maintain a cash balance limit of up to 0.75%.

-The underlying fund of the ILP Sub-Fund is an accumulation fund, which means the fund will automatically reinvest any dividends.

\*The underlying fund is a Sub-Fund of BNP Paribas Funds. BNP Paribas Funds is an Open-Ended Investment Company incorporated in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

-Refer to 'Book I – General Provisions' section of the underlying fund's Luxembourg Prospectus for further information on the features of the Fund.

<sup>1</sup> For an ILP Sub-Fund that feeds 100% into an underlying fund, some information provided below could be similar to the underlying Fund. In this instance, this ILP Sub-Fund will at minimum feed 99.25% into the underlying fund, BNP Paribas Brazil Equity Fund.

<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b></p> <p>-The value of an investment is not guaranteed and can go up and down depending on performance. You could get back less than you have paid in. At times, the ILP Sub-Fund may (Subject to the Appointed Actuary's agreement and provisions allowed for in the Policy Conditions) need to change the way its price is calculated, to ensure that those moving in and out of the ILP Sub-Fund are fairly treated. This can have a negative effect on the ILP Sub-Fund's price and performance.</p> <p>-Fund managers have the ability, in exceptional circumstances, to suspend trading in their Funds for as long as necessary. **Market and Credit Risks**

**Foreign Exchange risk:** The underlying assets of the Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

**Liquidity Risks**

**Liquidity risk:** In general the Fund manages its investments, including cash, such that it can meet its liabilities for the redemption of any shares that investors wish to sell. Investments held may need to be sold if insufficient cash is available to finance such redemptions.

-If the size of the disposals is sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the Net Asset Value of the Fund.

**Product-Specific Risks**

**Country Concentration risk:** The Fund's concentrated investment in a single or small number of countries may increase its Volatility due to the greater exposure to market, political, policy, foreign exchange, liquidity, tax, legal, regulatory, economic and social risks of those countries.

**Equity risk:** The value of stocks may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events, including changes in investment sentiment, political and issuer-specific factors.

**Emerging Markets risk:** Investments in emerging markets involve certain risks such as currency fluctuations and economic and political uncertainties. These markets are generally smaller in size and have less liquidity than developed markets.

**Financial Derivative Instrument risk:** The Fund may have exposure to derivatives for investment purposes or for Efficient Portfolio Management. Given the Leverage effect embedded in derivatives, such investments may result in higher volatility or a significant loss in the Fund's assets within a short period of time.

-Refer to 'Book I– Appendix 3-Investment Risks' and 'Book II– Equity Brazil' sections of the underlying fund's Luxembourg Prospectus for further information on the specific risks of the Fund.
